THE ASTROPHYSICAL JOURNAL

AUTHOR INDEX

PARTS 1 & 2, VOLUMES 585–587

2003 MARCH 1 TO APRIL 20

ABAJAS, CRISTINA. See COLLEY, WESLEY N., et al. Around-the-Clock Observations of the Q9057+561A,B Gravitationally Lensed Quasar. II. Results for the Second Observing Season.

ABEL, TOM. Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

ABRAHAM, R. G. See CHEN, HSIAO-WEN, et al. The Las Campanas Infrared Survey. IV. The Photometric Redshift Survey and the Rest-Frame *R*-Band Galaxy Luminosity Function at $0.5 \leq z \leq 1.5$.

AGAFONOV, YU. N. Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

AGUDO, IVÁN. Three-dimensional Simulations of Relativistic Precessing Jets Probing the Structure of Superluminal Sources. *Miguel-Ángel Aloy, José-María Martí, José-Luís Gómez, Iván Agudo, Ewald Müller, & José-María Ibáñez.* 585, L109 (2003)

AHRENS, V. A Concise New Look at the *l*-Type Spectrum of $H^{12}C^{14}N$. *S. Thorwirth, H. S. P. Müller, F. Lewen, S. Brünken, V. Ahrens, & G. Winnewisser.* 585, L163 (2003)

AJIKI, MASARU. See TANIGUCHI, YOSHIAKI, et al. The Discovery of a Very Narrow Line Star-forming Object at a Redshift of 5.66.

See FUJITA, SHINOBU S., et al. The Hα Luminosity Function and Star Formation Rate at $z \approx 0.24$ Based on Subaru Deep Imaging Data.

AKE, THOMAS B. A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

AKERLOF, C. W. A Search for Correlations of TeV Gamma Rays with Ultra–High-Energy Cosmic Rays. *C. W. Akerlof, S. Biller, P. Boyle, J. Buckley, D. A. Carter-Lewis, M. Catanese, M. F. Cawley, V. Connaughton, D. J. Fegan, J. Finley, J. Gaidos, A. M. Hillas, F. Krennrich, R. C. Lamb, R. Lessard, J. McEnery, G. Mohanty, N. A. Porter, J. Quinn, A. Rodgers, H. J. Rose, F. Samuelson, M. S. Schubnell, G. Sembroski, R. Srinivasan, T. C. Weekes, & J. Zweerink.* 586, 1232 (2003)

ALCALDE, DAVID. See COLLEY, WESLEY N., et al. Around-the-Clock Observations of the Q9057+561A,B Gravitationally Lensed Quasar. II. Results for the Second Observing Season.

ALLEN, S. W. *Chandra* Observations of the Galaxy Cluster A478: The Interaction of Hot Gas and Radio Plasma in the Core, and an Improved Determination of the Compton *y*-Parameter. *M. Sun, C. Jones, S. S. Murray, S. W. Allen, A. C. Fabian, & A. C. Edge.* 587, 619 (2003)

ALLER, H. D. Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

ALLER, M. F. Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

ALONSO-HERRERO, ALMUDENA. Luminosity and Stellar Mass Functions of Local Star-forming Galaxies. *Pablo G. Pérez-González, Jesús Gallegeo, Jaime Zamorano, Almudena Alonso-Herrero, Armando Gil de Paz, & Alfonso Aragón-Salamanca.* 587, L27 (2003)

ALOY, MIGUEL-ÁNGEL. Three-dimensional Simulations of Relativistic Precessing Jets Probing the Structure of Superluminal Sources. *Miguel-Ángel Aloy, José-María Martí, José-Luís Gómez, Iván Agudo, Ewald Müller, & José-María Ibáñez.* 585, L109 (2003)

ALVES, J. Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

ALVES, JOÃO F. The Dynamical State of Barnard 68: A Thermally Supported, Pulsating Dark Cloud. *Charles J. Lada, Edwin A. Bergin, João F. Alves, & Tracy L. Huard.* 586, 286 (2003)

ALY, J. J. Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

AMARI, T. Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

ANDERSEN, D. R. The Kinematics in the Core of the Low Surface Brightness Galaxy DDO 39. *R. A. Swaters, M. A. W. Verheijen, M. A. Bershady, & D. R. Andersen.* 587, L19 (2003)

ANDO, HIROYASU. See TANIGUCHI, YOSHIAKI, et al. The Discovery of a Very Narrow Line Star-forming Object at a Redshift of 5.66.

ANGELINI, LORELLA. Evidence of a Cyclotron Feature in the Spectrum of the Anomalous X-Ray Pulsar 1RXS J170849−400910. *Nanda Rea, Gian Luca Israel, Luigi Stella, Tim Oosterbroek, Sandro Mereghetti, Lorella Angelini, Sergio Campana, & Stefano Covino.* 586, L65 (2003)

An *XMM-Newton* Observation of 4U 1755−33 in Quiescence: Evidence for a Fossil X-Ray Jet. *Lorella Angelini & Nicholas E. White.* 586, L71 (2003)

ANNIS, JAMES. See BAHCALL, NETA A., et al. The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications.

ANTIA, H. M. Changes in Solar Dynamics from 1995 to 2002. *Sarbani Basu & H. M. Antia.* 585, 553 (2003)

AOKI, WAKO. Measurement of the Europium Isotope Ratio for the Extremely Metal poor, *r*-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

APARICIO, A. Intergalactic Globular Clusters and the Faint End of the Galaxy Number Counts in A1656 (Coma). *A. Marín-Franch & A. Aparicio.* 585, 714 (2003)

APPLETON, P. N. Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

ARAGÓN-SALAMANCA, ALFONSO. Luminosity and Stellar Mass Functions of Local Star-forming Galaxies. *Pablo G. Pérez-González, Jesús Gallegeo, Jaime Zamorano, Almudena Alonso-Herrero, Armando Gil de Paz, & Alfonso Aragón-Salamanca.* 587, L27 (2003)

ARAI, KENZO. *p*-Process Nucleosynthesis inside Supernova-driven Supercritical Accretion Disks. *Shin-ichirou Fujimoto, Masa-aki Hashimoto, Osamu Koike, Kenzo Arai, & Ryuichi Matsuba.* 585, 418 (2003)

ARAYA, E. Resolution of Distance Ambiguities of Inner Galaxy Massive Star Formation Regions. II. *C. Watson, E. Araya, M. Sewilo, E. Churchwell, P. Hofner, & S. Kurtz.* 587, 714 (2003)

AREFIEV, VADIM A. Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

ARENDT, RICHARD G. An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

ARNABOLDI, M. Polar Ring Galaxies and the Tully-Fisher Relation: Implications for the Dark Halo Shape. *E. Iodice, M. Arnaboldi, F. Bournaud, F. Combes, L. S. Sparke, W. van Driel, & M. Capaccioli.* 585, 730 (2003)

ASAI, AYUMI. Evolution of Conjugate Footpoints inside Flare Ribbons during a Great Two-Ribbon Flare on 2001 April 10. *Ayumi Asai, Takako T. Ishii, Hiroki Kurokawa, Takaaki Yokoyama, & Masumi Shimojo.* 586, 624 (2003)

ASLAN, ZEKI. See COLLEY, WESLEY N., et al. Around-the-Clock Observations of the Q9057+561A,B Gravitationally Lensed Quasar. II. Results for the Second Observing Season.

ATHEY, ALEX E. X-Ray Spectral Properties of Low-Mass X-Ray Binaries in Nearby Galaxies. *Jimmy A. Irwin, Alex E. Athey, & Joel N. Bregman.* 587, 356 (2003)

ATKINSON, J. See MARCONI, A., et al. Is There Really a Black Hole at the Center of NGC 4041? Constraints from Gas Kinematics.

ATOYAN, ARMEN M. Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)

AUGEREAU, J.-C. Ground-based Near-Infrared Imaging of the HD 141569 Circumstellar Disk. *A. Boccaletti, J.-C. Augereau, F. Marchis, & J. Hahn.* 585, 494 (2003)

AXON, D. J. See MARCONI, A., et al. Is There Really a Black Hole at the Center of NGC 4041? Constraints from Gas Kinematics.

AYRES, THOMAS R. A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

BABUL, ARIF. On the Relationship between Cooling Flows and Bubbles. *Ian G. McCarthy, Arif Babul, Neal Katz, & Michael L. Balogh.* 587, L75 (2003)

BACHILLER, R. Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

BACMANN, A. CO Depletion and Deuterium Fractionation in Prestellar Cores. *A. Bacmann, B. Lefloch, C. Ceccarelli, J. Steinacker, A. Castets, & L. Loinard.* 585, L55 (2003)

BAHCALL, NETA A. The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

See HOGG, DAVID W., et al. The Overdensities of Galaxy Environments as a Function of Luminosity and Color.

Cosmological Contraints from a Combined Analysis of the Cluster Mass Function and Microwave Background Anisotropies. *Alessandro Melchiorri, Paul Bode, Neta A. Bahcall, & Joseph Silk.* 586, L1 (2003)

BAI, J. M. Radio/X-Ray Offsets of Large-Scale Jets Caused by Synchrotron Time Lags. *J. M. Bai & Myung Gyoon Lee.* 585, L113 (2003)

BAI, T. Hot Spots for Solar Flares Persisting for Decades: Longitude Distributions of Flares of Cycles 19–23. *T. Bai.* 585, 1114 (2003)

BALDRY, IVAN K. See GLAZEBROOK, KARL, et al. The Sloan Digital Sky Survey: The Cosmic Spectrum and Star Formation History.

BALE, S. D. Electron Properties and Coulomb Collisions in the Solar Wind at 1 AU: *WIND* Observations. *C. Salem, D. Hubert, C. Lacombe, S. D. Bale, A. Mangeney, D. E. Larson, & R. P. Lin.* 585, 1147 (2003)

BALLESTEROS-PAREDES, J. A Holistic Scenario of Turbulent Molecular Cloud Evolution and Control of the Star Formation Efficiency: First Tests. *E. Vázquez-Semadeni, J. Ballesteros-Paredes, & R. S. Klessen.* 585, L131 (2003)

BALLO, LUCIA. Detection of X-Ray Emission from the Eastern Radio Lobe of Pictor A. *Paola Grandi, Matteo Guainazzi, Laura Maraschi, Raffaella Morganti, Roberto Fusco-Femiano, Mariateresa Fiocchi, Lucia Ballo, & Fabrizio Tavecchio.* 586, 123 (2003)

BALLY, JOHN. Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

Evidence for Grain Growth in the Protostellar Disks of Orion. *R. Y. Shuping, John Bally, Mark Morris, & Henry Throop.* 587, L109 (2003)

SUBJECT INDEX

PARTS 1 & 2, VOLUMES 585–587

2003 MARCH 1 TO APRIL 20

ACCELERATION OF PARTICLES

Lepton Acceleration by Relativistic Collisionless Magnetic Reconnection. *D. A. Larrabee, R. V. E. Lovelace, & M. M. Romanova.* 586, 72 (2003)

Cause of Proton Depletion in Solar Impulsive Particle Events. *K. Ohki.* 586, 617 (2003)

Evolution of Conjugate Footpoints inside Flare Ribbons during a Great Two-Ribbon Flare on 2001 April 10. *Ayumi Asai, Takako T. Ishii, Hiroki Kurokawa, Takaaki Yokoyama, & Masumi Shimojo.* 586, 624 (2003)

The Origin of High-Energy ^{3}He-rich Solar Particle Events. *L. Kocharov & J. Torsti.* 586, 1430 (2003)

The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)

Gyrosynchrotron Emission from Anisotropic Electron Distributions. *G. D. Fleishman & V. F. Melnikov.* 587, 823 (2003)

ACCRETION, ACCRETION DISKS

Numerical Simulations of Mass Outflows Driven from Accretion Disks by Radiation and Magnetic Forces. *Daniel Proga.* 585, 406 (2003)

p-Process Nucleosynthesis inside Supernova-driven Supercritical Accretion Disks. *Shin-ichirou Fujimoto, Masa-aki Hashimoto, Osamu Koike, Kenzo Arai, & Ryuichi Matsuba.* 585, 418 (2003)

Global Three-dimensional Magnetohydrodynamic Simulations of Black Hole Accretion Disks: X-Ray Flares in the Plunging Region. *Mami Machida & Ryoji Matsumoto.* 585, 429 (2003)

The Optical Light Curves of XTE J2123−058. III. The Mass of the Binary Components and the Structure of the Quiescent Accretion Disk. *T. Shahbaz, C. Zurita, J. Casares, G. Dubus, P. A. Charles, R. Mark Wagner, & E. Ryan.* 585, 443 (2003)

Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)

Local Magnetohydrodynamic Models of Layered Accretion Disks. *Timothy Fleming & James M. Stone.* 585, 908 (2003)

Halting Planet Migration by Photoevaporation from the Central Source. *Isamu Matsuyama, Doug Johnstone, & Norman Murray.* 585, L143 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

Eddington Limit and Radiative Transfer in Highly Inhomogeneous Atmospheres. *Mateusz Ruszkowski & Mitchell C. Begelman.* 586, 384 (2003)

Two-dimensional Monte Carlo/Fokker-Planck Simulations of Flares in Accretion Disk Corona Models. *M. Böttcher, D. R. Jackson, & E. P. Liang.* 586, 389 (2003)

Modeling Accretional Heating in Dwarf Novae. *Patrick Godon & Edward M. Sion.* 586, 427 (2003)

Orbital Migration and Mass Accretion of Protoplanets in Three-dimensional Global Computations with Nested Grids. *Gennaro D'Angelo, Willy Kley, & Thomas Henning.* 586, 540 (2003)

Variability of Sagittarius A*: Flares at 1 Millimeter. *Jun-Hui Zhao, K. H. Young, R. M. Herrnstein, P. T. P. Ho, T. Tsutsumi, K. Y. Lo, W. M. Goss, & G. C. Bower.* 586, L29 (2003)

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

Nucleosynthesis in Gamma-Ray Burst Accretion Disks. *Jason Pruet, S. E. Woosley, & R. D. Hoffman.* 586, 1254 (2003)

Stability of Accretion Disk around Rotating Black Holes: A Pseudo–General-Relativistic Fluid Dynamical Study. *Banibrata Mukhopadhyay.* 586, 1268 (2003)

The Evolution of LMC X-4 Flares: Evidence for Super Eddington Radiation Oosing through Inhomogeneous Polar Cap Accretion Flows? *Dae-Sik Moon, Stephen S. Eikenberry, & Ira M. Wasserman.* 586, 1280 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

Some Nucleosynthesis Effects Associated with *r*-Process Jets. *A. G. W. Cameron.* 587, 327 (2003)

Saturation of the Corotation Resonance in a Gaseous Disk. *G. I. Ogilvie & S. H. Lubow.* 587, 398 (2003)

Spectra from a Magnetic Reconnection–heated Corona in Active Galactic Nuclei. *B. F. Liu, S. Mineshige, & K. Ohsuga.* 587, 571 (2003)

ASTROCHEMISTRY

Chemical Evolution in Protostellar Envelopes: Cocoon Chemistry. *S. D. Rodgers & S. B. Charnley.* 585, 355 (2003)

Time-dependent Density Functional Theory Calculations of Large Compact Polycyclic Aromatic Hydrocarbon Cations: Implications for the Diffuse Interstellar Bands. *Jennifer L. Weisman, Timothy J. Lee, Farid Salama, & Martin Head-Gordon.* 587, 256 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

ASTROMETRY

Transit Target Selection Using Reduced Proper Motions. *Andrew Gould & Christopher W. Morgan.* 585, 1056 (2003)

Angular Radii of Stars via Microlensing. *B. Scott Gaudi, David S. Graff, & Cheongho Han.* 586, 451 (2003)

The Position of Sagittarius A*. II. Accurate Positions and Proper Motions of Stellar SiO Masers near the Galactic Center. *M. J. Reid, K. M. Menten, R. Genzel, T. Ott, R. Schödel, & A. Eckart.* 587, 208 (2003)

Ejection of a Low-Mass Star in a Young Stellar System in Taurus. *Laurent Loinard, Luis F. Rodríquez, & Monica I. Rodríguez.* 587, L47 (2003)

ATOMIC DATA

Atomic Data and Spectral Line Intensities for Si VII. *A. K. Bhatia & E. Landi.* 585, 587 (2003)

Intensities of E2 Spectral Lines in the Astrophysically Important Ion Mg II. *E. Charro & I. Martín.* 585, 1191 (2003)

Experimental Transition Rate of the Green Coronal Line of Fe XIV. *P. Beiersdorfer, E. Trabert, & E. H. Pinnington.* 587, 836 (2003)

ATOMIC PROCESSES

Charge Abundances of the Solar Wind Ions Inferred from Cometary X-Ray Spectra. *V. Kharchenko, Matt Rigazio, A. Dalgarno, & V. A. Krasnopolsky.* 585, L73 (2003)

Intensities of E2 Spectral Lines in the Astrophysically Important Ion Mg II. *E. Charro & I. Martín.* 585, 1191 (2003)

BLACK HOLE PHYSICS

Global Three-dimensional Magnetohydrodynamic Simulations of Black Hole Accretion Disks: X-Ray Flares in the Plunging Region. *Mami Machida & Ryoji Matsumoto.* 585, 429 (2003)

Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)

X-Ray Spectroscopic Evidence for Intermediate-Mass Black Holes: Cool Accretion Disks in Two Ultraluminous X-Ray Sources. *J. M. Miller, G. Fabbiano, M. C. Miller, & A. C. Fabian.* 585, L37 (2003)

Does the Narrow [O III] λ5007 Line Reflect the Stellar Velocity Dispersion in Active Galactic Nuclei. *Todd A. Boroson.* 585, 647 (2003)

Collapse of a Magnetized Star to a Black Hole. *Thomas W. Baumgarte & Stuart L. Shapiro.* 585, 921 (2003)

Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)

Black Hole Mass and Spin Coevolution by Mergers. *Scott A. Hughes & Roger D. Blandford.* 585, L101 (2003)

Using Multiwavelength Observations to Determine the Black Hole Mass and Accretion Rate in the Type 1 Seyfert Galaxy NGC 5548. *James Chiang & Omer Blaes.* 586, 97 (2003)

X-Ray Temporal Properties of XTE J1650−500 during Outburst Decay. *E. Kalemci, J. A. Tomsick, R. E. Rothschild, K. Pottschmidt, S. Corbel, R. Wijnands, J. M. Miller, & P. Kaaret.* 586, 419 (2003)

Variability of Sagittarius A*: Flares at 1 Millimeter. *Jun-Hui Zhao, K. H. Young, R. M. Herrnstein, P. T. P. Ho, T. Tsutsumi, K. Y. Lo, W. M. Goss, & G. C. Bower.* 586, L29 (2003)

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

Is There Really a Black Hole at the Center of NGC 4041? Constraints from Gas Kinematics. *A. Marconi, D. J. Axon, A. Capetti, W. Maciejewski, J. Atkinson, D. Batcheldor, J. Binney, M. Carollo, L. Dressel, H. Ford, J. Gerssen, M. A. Hughes, D. Macchetto, M. R. Merrifield, C. Scarlata, W. Sparks, M. Stiavelli, Z. Tsvetanov, & R. P. van der Marel.* 586, 868 (2003)

High-Frequency Quasi-Periodic Oscillations in the Black Holes X-Ray Transient XTE J1650−500. *Jeroen Homan, Marc Klein-Wolt, Sabrina Rossi, Jon M. Miller, Rudy Wijnands, Tomaso Belloni, Michiel van der Klis, & Walter H. G. Lewin.* 586, 1262 (2003)

Stability of Accretion Disk around Rotating Black Holes: A Pseudo–General-Relativistic Fluid Dynamical Study. *Banibrata Mukhopadhyay.* 586, 1268 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

A Stringent Limit on the Accretion Luminosity of the Possible Central Black Hole in the Globular Cluster M15. *Luis C. Ho, Yuichi Terashima, & Takashi Okajima.* 587, L35 (2003)

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

BL LACERTAE OBJECTS

Relation between BL Lacertae Objects and Flat-Spectrum Radio Quasars. *J. H. Fan.* 585, L23 (2003)

Clear Evidence for Intranight Optical Variability in Radio-quiet Quasars. *Gopal-Krishna, C. S. Stalin, Ram Sagar, & Paul J. Witta.* 586, L25 (2003)

CELESTIAL MECHANICS

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Eccentricity Evolution of Extrasolar Multiple Planetary Systems Due to the Depletion of Nascent Protostellar Disks. *M. Nagasawa, D. N. C. Lin, & S. Ida.* 586, 1374 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

COMETS: GENERAL

Charge Abundances of the Solar Wind Ions Inferred from Cometary X-Ray Spectra. *V. Kharchenko, Matt Rigazio, A. Dalgarno, & V. A. Krasnopolsky.* 585, L73 (2003)

An S_2 Fluorescence Model for Interpreting High-Resolution Cometary Spectra. I. Model Description and Initial Results. *Celine Reyle & D. C. Boice.* 587, 464 (2003)

COMETS: INDIVIDUAL

Name: Ikeya-Zhang (C/2002 C1)

Heliocentric Dependence of the Sodium Emission of Comet 153P/Ikeya-Zhang. *Jun-ichi Watanabe, Hideyo Kawakita, Reiko Furusho, & Mitsugu Fujii.* 585, L159 (2003)

CONDUCTION

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

Chandra Temperature Map of A754 and Constraints on Thermal Conduction. *M. Markevitch, P. Mazzotta, A. Vikhlinin, D. Burke, Y. Butt, L. David, H. Donnelly, W. R. Forman, D. Harris, D.-W. Kim, S. Virani, & J. Vrtilek.* 586, L19 (2003)

CONVECTION

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

Magnetic Fields in Massive Stars. II. The Buoyant Rise of Magnetic Flux Tubes through the Radiative Interior. *K. B. MacGregor & J. P. Cassinelli.* 586, 480 (2003)

Numerical Modeling of the Solar Tachocline. II. Forced Turbulence with Imposed Shear. *Mark S. Miesch.* 586, 663 (2003)

COSMIC RAYS: GENERAL

WIND Observations of Anomalous Cosmic Rays from Solar Minimum to Maximum. *D. V. Reames & F. B. McDonald.* 586, L99 (2003)

COSMOLOGY: COSMIC MICROWAVE BACKGROUND

Inhomogeneities in the Microwave Background Radiation Interpreted within the Framework of the Quasi–Steady State Cosmology. *J. V. Narlikar, R. G. Vishwakarma, Amir Hajian, Tarun Souradeep, G. Burbridge, & F. Hoyle.* 585, 1 (2003)

The Optical Design and Characterization of the *Microwave Anisotropy Probe*. *L. Page, C. Jackson, C. Barnes, C. Bennett, M. Halpern, G. Hinshaw, N. Jarosik, A. Kogut, M. Limon, S. S. Meyer, D. N. Spergel, G. S. Tucker, D. T. Wilkinson, E. Wollack, & E. L. Wright.* 585, 566 (2003)

Importance of Cluster Structural Evolution in Using X-Ray and Sunyaev-Zeldovich Effect Galaxy Cluster Surveys to Study Dark Energy. *Subhabrata Majumdar & Joseph J. Mohr.* 585, 603 (2003)

Cosmological Contraints from a Combined Analysis of the Cluster Mass Function and Microwave Background Anisotropies. *Alessandro Melchiorri, Paul Bode, Neta A. Bahcall, & Joseph Silk.* 586, L1 (2003)

Ionization History of the Cosmic Plasma in the Light of the Recent Cosmic Background Imager and Future *Planck* Data. *A. G. Doroshkevich, I. P. Naselsky, P. D. Naselsky, & I. D. Novikov.* 586, 709 (2003)

COSMOLOGY: COSMOLOGICAL PARAMETERS

Constraints on Cardassian Expansion from Distant Type Ia Supernovae. *Zhong-Hong Zhu & Masa-Katsu Fujimoto.* 585, 52 (2003)

The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

Importance of Cluster Structural Evolution in Using X-Ray and Sunyaev-Zeldovich Effect Galaxy Cluster Surveys to Study Dark Energy. *Subhabrata Majumdar & Joseph J. Mohr.* 585, 603 (2003)

Chandra Observations of A2029: The Dark Matter Profile Down to below $0.01r_{\rm vir}$ in an Unusually Relaxed Cluster. *Aaron D. Lewis, David A. Buote, & John T. Stocke.* 586, 135 (2003)

Cosmological Contraints from a Combined Analysis of the Cluster Mass Function and Microwave Background Anisotropies. *Alessandro Melchiorri, Paul Bode, Neta A. Bahcall, & Joseph Silk.* 586, L1 (2003)

The Kinematic State of the Local Volume. *Alan B. Whiting.* 587, 186 (2003)

COSMOLOGY: DARK MATTER

Modeling Intracluster Gas in Triaxial Dark Halos: An Analytic Approach. *Jounghun Lee & Yasushi Suto.* 585, 151 (2003)

The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

The Failure of Self-Interacting Dark Matter to Solve the Overabundance of Dark Satellites and the Soft Core Question. *Elena D'Onghia & Andreas Burkert.* 586, 12 (2003)

On the Spiral Structure of NGC 2915 and Dark Matter. *F. S. Masset & M. Bureau.* 586, 152 (2003)

ROSAT HRI Investigation of the NGC 507 X-Ray Halo. *M. Paolillo, G. Fabbiano, G. Peres, & D.-W. Kim.* 586, 850 (2003)

COSMOLOGY: DIFFUSE RADIATION

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

A Model for *SIRTF* Galaxy Counts. *Jeremy Mould.* 587, L93 (2003)

COSMOLOGY: DISTANCE SCALE

Constraints on Cardassian Expansion from Distant Type Ia Supernovae. *Zhong-Hong Zhu & Masa-Katsu Fujimoto.* 585, 52 (2003)

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

Reconstructing Cepheid Light Curve with Fourier Techniques. I. The Fourier Expansion and Interrelations. *Chow-Choong Ngeow, Shashi M. Kanbur, Sergei Nikolaev, Nial R. Tanvir, & Martin A. Hendry.* 586, 959 (2003)

Chandra Observations of the Galaxy Cluster A478: The Interaction of Hot Gas and Radio Plasma in the Core, and an Improved Determination of the

Compton y-Parameter. *M. Sun, C. Jones, S. S. Murray, S. W. Allen, A. C. Fabian, & A. C. Edge.* 587, 619 (2003)

Fundamental Properties and Distances of Large Magellanic Cloud Eclipsing Binaries. IV. HV 5936. *E. L. Fitzpatrick, I. Ribas, E. F. Guinan, F. P. Maloney, & A. Claret.* 587, 685 (2003)

COSMOLOGY: EARLY UNIVERSE

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Reionization of Hydrogen and Helium by Early Stars and Quasars. *J. Stuart B. Wyithe & Abraham Loeb.* 586, 693 (2003)

Subaru Deep Survey. IV. Discovery of a Large-Scale Structure at Redshift $\simeq$5. *K. Shimasaku, M. Ouchi, S. Okamura, N. Kashikawa, M. Doi, H. Furusawa, M. Hamabe, T. Hayashino, K. Kawabata, M. Kimura, K. Kodaira, Y. Komiyama, Y. Matsuda, M. Miyazaki, S. Miyazaki, F. Nakata, K. Ohta, Y. Ohyama, M. Sekiguchi, Y. Shioya, H. Tamura, Y. Taniguchi, M. Yagi, T. Yamada, & N. Yasuda.* 586, L111 (2003)

On the Total Energy of Open Friedmann-Robertson-Walker Universes. *V. Faraoni & F. I. Cooperstock.* 587, 483 (2003)

COSMOLOGY: LARGE-SCALE STRUCTURE OF UNIVERSE

One-Point Statistics of the Cosmic Density Field in Real and Redshift Spaces with a Multiresolutional Decomposition. *Hu Zhan & Li-Zhi Fang.* 585, 12 (2003)

Toward a Measurement of the Cosmological Geometry at $z \sim 2$: Predicting Lyα Forest Correlation in Three Dimensions and the Potential of Future Data Sets. *Patrick McDonald.* 585, 34 (2003)

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)

Clusters of Galaxies in the Local Universe. *C. S. Kochanek, Martin White, J. Huchra, L. Macri, T. H. Jarrett, S. E. Schneider, & J. Mader.* 585, 161 (2003)

The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

Galaxy Clustering Evolution in the UH8K Weak-Lensing Fields. *Gillian Wilson.* 585, 191 (2003)

Bias and the Power Spectrum beyond the Turnover. *Ruth Durrer, Andrea Gabrielli, Michael Joyce, & Francesco Sylos Labini.* 585, L1 (2003)

The Overdensities of Galaxy Environments as a Function of Luminosity and Color. *David W. Hogg, Michael R. Blanton, Daniel J. Eisenstein, James E. Gunn, David J. Schlegel, Idit Zehavi, Neta A. Bahcall, Jon Brinkmann, Istvan Csabai, Donald P. Schneider, David H. Weinberg, & Donald G. York.* 585, L5 (2003)

A Massive Warm Baryonic Halo in the Coma Cluster. *Massimiliano Bonamente, Marshall K. Joy, & Richard Lieu.* 585, 722 (2003)

Imaging Large-Scale Structure in the X-Ray Sky. *Yuxuan Yang, R. F. Mushotzky, A. J. Barger, L. L. Cowie, D. B. Sanders, & A. T. Steffen.* 585, L85 (2003)

Deprojecting Densities from Angular Cross-Correlations. *Daniel J. Eisensten.* 586, 718 (2003)

Small-Scale Clustering in Isotropic Arrival Distribution of Ultra–High-Energy Cosmic Rays and Implications for Their Source Candidates. *Hiroyuki Yoshiguchi, Shigehiro Nagataki, Sin-ya Tsubaki, & Katsuhiko Sato.* 586, 1211 (2003)

Subaru Deep Survey. IV. Discovery of a Large-Scale Structure at Redshift $\simeq$5. *K. Shimasaku, M. Ouchi, S. Okamura, N. Kashikawa, M. Doi, H. Furusawa, M. Hamabe, T. Hayashino, K. Kawabata, M. York.* 587, 55 (2003)

The Kinematic State of the Local Volume. *Alan B. Whiting.* 587, 186 (2003)

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

Strong Gravitational Lensing and Galactic Bulges. *Da-Ming Chen.* 587, L55 (2003)

Iron Emission in $z \approx 6$ QSOs. *Wolfram Freudling, Michael R. Corbin, & Kirk Korista.* 587, L67 (2003)

The Rate and the Origin of Type Ia Supernovae in Radio Galaxies. *Massimo Della Valle & Nino Panagia.* 587, L71 (2003)

Spectroscopic Confirmation of a Substantial Population of Luminous Red Galaxies at Redshifts $z > 2$. *Pieter G. van Dokkum, Natascha M. Foerster Schreiber, Marijn Franx, Emanuele Daddi, Garth D. Illingworth, Ivo Labbe, Alan Moorwood, Hans-Walter Rix, Huub Roettgering, Gregory Rudnick, Arjen van der Wel, Paul van der Werf, & Lottie van Starkenburg.* 587, L83 (2003)

COSMOLOGY: THEORY

Inhomogeneities in the Microwave Background Radiation Interpreted within the Framework of the Quasi–Steady State Cosmology. *J. V. Narlikar, R. G. Vishwakarma, Amir Hajian, Tarun Souradeep, G. Burbridge, & F. Hoyle.* 585, 1 (2003)

One-Point Statistics of the Cosmic Density Field in Real and Redshift Spaces with a Multiresolutional Decomposition. *Hu Zhan & Li-Zhi Fang.* 585, 12 (2003)

Toward a Measurement of the Cosmological Geometry at $z \sim 2$: Predicting Lyα Forest Correlation in Three Dimensions and the Potential of Future Data Sets. *Patrick McDonald.* 585, 34 (2003)

Constraints on Cardassian Expansion from Distant Type Ia Supernovae. *Zhong-Hong Zhu & Masa-Katsu Fujimoto.* 585, 52 (2003)

Modeling Intracluster Gas in Triaxial Dark Halos: An Analytic Approach. *Jounghun Lee & Yasushi Suto.* 585, 151 (2003)

Clusters of Galaxies in the Local Universe. *C. S. Kochanek, Martin White, J. Huchra, L. Macri, T. H. Jarrett, S. E. Schneider, & J. Mader.* 585, 161 (2003)

The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

Bias and the Power Spectrum beyond the Turnover. *Ruth Durrer, Andrea Gabrielli, Michael Joyce, & Francesco Sylos Labini.* 585, L1 (2003)

Corrective Lenses for High-Redshift Supernovae. *Neal Dalal, Daniel E. Holz, Xuelei Chen, & Joshua A. Frieman.* 585, L11 (2003)

Importance of Cluster Structural Evolution in Using X-Ray and Sunyaev-Zeldovich Effect Galaxy Cluster Surveys to Study Dark Energy. *Subhabrata Majumdar & Joseph J. Mohr.* 585, 603 (2003)

On the Baryometric Status of ^{3}He. *Elisabeth Vangioni-Flam, Keith A. Olive, Brian D. Fields, & Michel Cassé.* 585, 611 (2003)

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Gravitational Potential Reconstruction from Peculiar Velocity and Weak Lensing Measurements. *Olivier Doré, Lloyd Knox, & Alan Peel.* 585, L81 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

The Failure of Self-Interacting Dark Matter to Solve the Overabundance of Dark Satellites and the Soft Core Question. *Elena D'Onghia & Andreas Burkert.* 586, 12 (2003)

Reionization of Hydrogen and Helium by Early Stars and Quasars. *J. Stuart B. Wyithe & Abraham Loeb.* 586, 693 (2003)

Ionization History of the Cosmic Plasma in the Light of the Recent Cosmic Background Imager and Future *Planck* Data. *A. G. Doroshkevich, I. P. Naselsky, P. D. Naselsky, & I. D. Novikov.* 586, 709 (2003)

Surveys of Galaxy Clusters with the Sunyaev-Zel'dovich Effect. *A. E. Schulz & Martin White.* 586, 723 (2003)

The Influence of Ω_b on High-Redshit Structure. *Jeffrey P. Gardner, Neal Katz, Lars Hernquist, & David H. Weinberg.* 587, 1 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

On the Total Energy of Open Friedmann-Robertson-Walker Universes. *V. Faraoni & F. I. Cooperstock.* 587, 483 (2003)

Intermittent Features of the Quasar Lyα Transmitted Flux: Results from Cosmological Hydrodynamic Simulations. *Long-Long Feng, Jesus Pando, & Li-Zhi Fang.* 587, 487 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

Strong Gravitational Lensing and Galactic Bulges. *Da-Ming Chen.* 587, L55 (2003)

DARK MATTER

The Mass Profile of Galaxy Clusters out to $\sim 2r_200$. *Andrea Biviano & Marisa Girardi.* 585, 205 (2003)

The Optical Design and Characterization of the *Microwave Anisotropy Probe*. *L. Page, C. Jackson, C. Barnes, C. Bennett, M. Halpern, G. Hinshaw, N. Jarosik, A. Kogut, M. Limon, S. S. Meyer, D. N. Spergel, G. S. Tucker, D. T. Wilkinson, E. Wollack, & E. L. Wright.* 585, 566 (2003)

Corrective Lenses for High-Redshift Supernovae. *Neal Dalal, Daniel E. Holz, Xuelei Chen, & Joshua A. Frieman.* 585, L11 (2003)

Chandra Observations of A2029: The Dark Matter Profile Down to below $0.01r_{\rm vir}$ in an Unusually Relaxed Cluster. *Aaron D. Lewis, David A. Buote, & John T. Stocke.* 586, 135 (2003)

Cluster-Cluster Microlensing as a Probe of Intracluster Stars, MACHOs, and Remnants of the First-Generation Stars. *Tomonori Totani.* 586, 735 (2003)

The Kinematic State of the Local Volume. *Alan B. Whiting.* 587, 186 (2003)

DENSE MATTER

The Critical Rotation of Strange Stars and Rapidly Rotating Pulsars. *Xiaoping Zheng, Shuhua Yang, & Jiarong Li.* 585, L135 (2003)

Gamma-Ray Bursts from Delayed Collapse of Neutron Stars to Quark Matter Stars. *Z. Berezhiani, I. Bombaci, A. Drago, F. Frontera, & A. Lavagno.* 586, 1250 (2003)

Enhancement of Resonant Thermonuclear Reaction Rates in Extremely Dense Stellar Plasmas. *Naoki Itoh, Nami Tomizawa, Shinya Wanajo, & Satoshi Nozawa.* 586, 1436 (2003)

DIFFUSION

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. I. Analytical Approach. *Sylvie Vauclair & Sylvie Théado.* 587, 777 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. III. Applications to Light Elements in Population I Main-Sequence Stars. *Sylvie Théado & Sylvie Vauclair.* 587, 795 (2003)

EARLY UNIVERSE

The Optical Design and Characterization of the *Microwave Anisotropy Probe*. *L. Page, C. Jackson, C. Barnes, C. Bennett, M. Halpern, G. Hinshaw, N. Jarosik, A. Kogut, M. Limon, S. S. Meyer, D. N. Spergel, G. S. Tucker, D. T. Wilkinson, E. Wollack, & E. L. Wright.* 585, 566 (2003)

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

The Evolution of the Global Stellar Mass Density at $0 < z < 3$. *Mark Dickinson, Casey Papovich, Henry C. Ferguson, & Tamás Budavári.* 587, 25 (2003)

EARTH

Ozone Depletion from Nearby Supernovae. *Neil Gehrels, Claude M. Laird, Charles H. Jackman, John K. Cannizzo, Barbara J. Mattson, & Wan Chen.* 585, 1169 (2003)

ECLIPSES

Method for Spot Detection on Solar-like Stars. *Adriana V. R. Silva.* 585, L147 (2003)

ELEMENTARY PARTICLES

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)

Electron Neutrino Pair Annihilation: A New Source for Muon and Tau Neutrinos in Supernovae. *Robert Buras, Hans-Thomas Janka, Mathias Th. Keil, Georg G. Raffelt, & Markus Rampp.* 587, 320 (2003)

EQUATION OF STATE

Equation of State and Opacities for Hydrogen Atmospheres of Neutron Stars with Strong Magnetic Fields. *Alexander Y. Potekhin & Gilles Chabrier.* 585, 955 (2003)

Gamma-Ray Bursts from Delayed Collapse of Neutron Stars to Quark Matter Stars. *Z. Berezhiani, I. Bombaci, A. Drago, F. Frontera, & A. Lavagno.* 586, 1250 (2003)

ERRATA, ADDENDA

The Dynamics of M15: Observations of the Velocity Dispersion Profile and Fokker-Planck Models: Addendum (ApJ, 481, 267 [1997]). *J. D. Dull, H. N. Cohn, P. M. Lugger, B. W. Murphy, P. O. Seitzer, P. J. Callanan, R. G. M. Rutten, & P. A. Charles.* 585, 598 (2003) (Orig. paper in 481, 267 (1997))

X-Ray Properties of Young Stellar Objects in OMC-2 and OMC-3 from the *Chandra X-Ray Observatory*: Erratum (ApJ, 566, 974 [2002]). *Masahiro Tsujimoto, Katsuji Koyama, Yohko Tsuboi, Miwa Goto, & Naoto Kobayashi.* 585, 602 (2003) (Orig. paper in 566, 974 (2002))

Erratum: Detection of a Super–Star Cluster as the Ionizing Source in the Low-Luminosity Active Galactic Nucleus NGC 4303: Erratum (ApJ, 582, 1269 [2003]). *Luis Colina, Rosa Gonzalez-Delgado, J. Miguel Mas-Hesse, Claus Leitherer, & Elena Jiménez-Bailón.* 586, 692 (2003) (Orig. paper in 582, 1269 (2003))

Chandra Observations of Variable Embedded X-Ray Sources in Orion. I. Resolving the Orion Trapezium: Erratum (ApJ, 549, 441 [2001]). *N. S. Schulz, C. Canizares, D. Huenemoerder, J. H. Kastner, S. C. Taylor, & E. J. Bergstrom.* 586, 1441 (2003) (Orig. paper in 549, 441 (2001))

On Pressure Gradients and Rapid Migration of Solids in a Nonuniform Solar Nebula: Erratum (ApJ, 583, 996 [2003]). *Nader Haghighipour & Alan P. Boss.* 586, 1442 (2003) (Orig. paper in 583, 996 (2003))

GALAXIES: ABUNDANCES

Average Spectra of Massive Galaxies in the Sloan Digital Sky Survey. *Daniel J. Eisenstein, David W. Hogg, Masataka Fukugita, Osamu Nakamura, Mariangela Bernardi, Douglas P. Finkbeiner, David J. Schlegel, J. Brinkmann, Andrew J. Connolly, István Csabai, James E. Gunn, Željko Ivezić, Don Q. Lamb, Jon Loveday, Jeffrey A. Munn, Robert C. Nichol, Donald P. Schneider, Michael A. Strauss, Alex Szalay, & Don G. York.* 585, 694 (2003)

Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

The Magnesium–Velocity Dispersion Relation and the Genesis of Early-Type Galaxies. *Guy Worthey & Maela Collobert.* 586, 17 (2003)

Measurement of the Europium Isotope Ratio for the Extremely Metal poor, r-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

Chandra X-Ray Observations of NGC 1316 (Fornax A). *Dong-Woo Kim & G. Fabbiano.* 586, 826 (2003)

GALAXIES: ACTIVE

Massive Elliptical Galaxies at High Redshift: NICMOS Imaging of $z \approx 1$ Radio Galaxies. *Andrew W. Zirm, Mark Dickinson, & Arjun Dey.* 585, 90 (2003)

Black Hole Masses in Three Seyfert Galaxies. *C. A. Onken, B. M. Peterson, M. Dietrich, A. Robinson, & I. M. Salamanca.* 585, 121 (2003)

No X-Ray–bright Type II Quasars among the Lyα Emitters. *S. Malhotra, J. X. Wang, J. E. Rhoads, T. M. Heckman, & C. A. Norman.* 585, L25 (2003)

Does the Narrow [O III] λ5007 Line Reflect the Stellar Velocity Dispersion in Active Galactic Nuclei. *Todd A. Boroson.* 585, 647 (2003)

An *Extreme Ultraviolet Explorer* Atlas of Seyfert Galaxy Light Curves: Search for Periodicity. *J. P. Halpern, K. M. Leighly, & H. L. Marshall.* 585, 665 (2003)

The Nuclear Accretion in the FR I Radio Galaxy IC 4296 from *Chandra* and Very Long Baseline Array Observations. *S. Pellegrini, T. Venturi, A. Comastri, G. Fabbiano, F. Fiore, C. Vignali, R. Morganti, & G. Trinchieri.* 585, 677 (2003)

Black Hole Mass and Spin Coevolution by Mergers. *Scott A. Hughes & Roger D. Blandford.* 585, L101 (2003)

The Host Galaxies of Optically Bright Quasi-stellar Objects: Molecular Gas in $z \leq 0.1$ Palomar-Green Quasi-stellar Objects. *N. Z. Scoville, D. T. Frayer, E. Schinnerer, & M. Christopher.* 585, L105 (2003)

Radio/X-Ray Offsets of Large-Scale Jets Caused by Synchrotron Time Lags. *J. M. Bai & Myung Gyoon Lee.* 585, L113 (2003)

Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

The Baldwin Effect and Black Hole Accretion: A Spectral Principal Component Analysis of a Complete Quasar Sample. *Zhaohui Shang, Beverley J. Wills, Edward L. Robinson, D. Wills, Ari Laor, Bingrong Xie, & Juntao Yuan.* 586, 52 (2003)

Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)

Using Multiwavelength Observations to Determine the Black Hole Mass and Accretion Rate in the Type 1 Seyfert Galaxy NGC 5548. *James Chiang & Omer Blaes.* 586, 97 (2003)

Clear Evidence for Intranight Optical Variability in Radio-quiet Quasars. *Gopal-Krishna, C. S. Stalin, Ram Sagar, & Paul J. Wiita.* 586, L25 (2003)

Variability of Sagittarius A*: Flares at 1 Millimeter. *Jun-Hui Zhao, K. H. Young, R. M. Herrnstein, P. T. P. Ho, T. Tsutsumi, K. Y. Lo, W. M. Goss, & G. C. Bower.* 586, L29 (2003)

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

Flaring X-Ray Emission from HST-1, a Knot in the M87 Jet. *D. E. Harris, J. A. Biretta, W. Junor, E. S. Perlman, W. B. Sparks, & A. S. Wilson.* 586, L41 (2003)

A Search for Correlations of TeV Gamma Rays with Ultra–High-Energy Cosmic Rays. *C. W. Akerlof, S. Biller, P. Boyle, J. Buckley, D. A. Carter-Lewis, M. Catanese, M. F. Cawley, V. Connaughton, D. J. Fegan, J. Finley, J. Gaidos, A. M. Hillas, F. Krennrich, R. C. Lamb, R. Lessard, J. McEnery, G. Mohanty, N. A. Porter, J. Quinn, A. Rodgers, H. J. Rose, F. Samuelson, M. S. Schubnell, G. Sembroski, R. Srinivasan, T. C. Weekes, & J. Zweerink.* 586, 1232 (2003)

An Intrinsic Baldwin Effect in the Hβ Broad Emission Line in the Spectrum of NGC 5548. *Karoline M. Gilbert & Bradley M. Peterson.* 587, 123 (2003)

Ultraviolet Continuum, Physical Conditions, and Filling Factor in Active Galactic Nuclei. *Lucimara P. Martins, Sueli M. Viegas, & Ruth Gruenwald.* 587, 562 (2003)

Spectra from a Magnetic Reconnection–heated Corona in Active Galactic Nuclei. *B. F. Liu, S. Mineshige, & K. Ohsuga.* 587, 571 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

Molecular Gas in Candidate Double-barred Galaxies. II. Cooler, Less Dense Gas Associated with Stronger Central Concentrations. *Glen R. Petitpas & Christine D. Wilson.* 587, 649 (2003)

Quasar Evolution Driven by Galaxy Encounters in Hierarchical Structures. *N. Menci, A. Cavaliere, A. Fontana, E. Giallongo, F. Poli, & V. Vittorini.* 587, L63 (2003)

Does the Narrow [O III] λ5007 Line Reflect the Stellar Velocity Dispersion in Active Galactic Nuclei. *Todd A. Boroson.* 585, 647 (2003)

Strong Gravitational Lensing and Galactic Bulges. *Da-Ming Chen.* 587, L55 (2003)

GALAXIES: CLUSTERS: GENERAL

The Fundamental Plane at $z = 1.27$: First Calibration of the Mass Scale of Red Galaxies at Redshifts $z > 1$. *Pieter G. van Dokkum & S. A. Stanford.* 585, 78 (2003)

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)

Modeling Intracluster Gas in Triaxial Dark Halos: An Analytic Approach. *Jounghun Lee & Yasushi Suto.* 585, 151 (2003)

Clusters of Galaxies in the Local Universe. *C. S. Kochanek, Martin White, J. Huchra, L. Macri, T. H. Jarrett, S. E. Schneider, & J. Mader.* 585, 161 (2003)

The Cluster Mass Function from Early Sloan Digital Sky Survey Data: Cosmological Implications. *Neta A. Bahcall, Feng Dong, Paul Bode, Rita Kim, James Annis, Timothy A. McKay, Sarah Hansen, Josh Schroeder, James Gunn, Jeremiah P. Ostriker, Marc Postman, Robert C. Nichol, Chris Miller, Tomotsugu Goto, Jon Brinkmann, Gillian R. Knapp, Don O. Lamb, Donald P. Schneider, Michael S. Vogeley, & Donald G. York.* 585, 182 (2003)

The Mass Profile of Galaxy Clusters out to $\sim 2r_2 00$. *Andrea Biviano & Marisa Girardi.* 585, 205 (2003)

Correlations of Richness and Global Properties in Galaxy Clusters. *H. K. C. Yee & E. Ellingson.* 585, 215 (2003)

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

The Overdensities of Galaxy Environments as a Function of Luminosity and Color. *David W. Hogg, Michael R. Blanton, Daniel J. Eisenstein, James E. Gunn, David J. Schlegel, Idit Zehavi, Neta A. Bahcall, Jon Brinkmann, Istvan Csabai, Donald P. Schneider, David H. Weinberg, & Donald G. York.* 585, L5 (2003)

Properties of the Brightest Cluster Galaxy and Its Host Cluster. *Haruyoshi Katayama, Kiyoshi Hayashida, Fumio Takahara, & Yutaka Fujita.* 585, 687 (2003)

Average Spectra of Massive Galaxies in the Sloan Digital Sky Survey. *Daniel J. Eisenstein, David W. Hogg, Masataka Fukugita, Osamu Nakamura, Mariangela Bernardi, Douglas P. Finkbeiner, David J. Schlegel, J. Brinkmann, Andrew J. Connolly, István Csabai, James E. Gunn, Željko Ivezić, Don Q. Lamb, Jon Loveday, Jeffrey A. Munn, Robert C. Nichol, Donald P. Schneider, Michael A. Strauss, Alex Szalay, & Don G. York.* 585, 694 (2003)

Cosmological Contraints from a Combined Analysis of the Cluster Mass Function and Microwave Background Anisotropies. *Alessandro Melchiorri, Paul Bode, Neta A. Bahcall, & Joseph Silk.* 586, L1 (2003)

Surveys of Galaxy Clusters with the Sunyaev-Zel'dovich Effect. *A. E. Schulz & Martin White.* 586, 723 (2003)

Determining Tangential Peculiar Velocities of Clusters of Galaxies Using Gravitational Lensing. *Sandor M. Molnar & Mark Birkinshaw.* 586, 731 (2003)

Cluster-Cluster Microlensing as a Probe of Intracluster Stars, MACHOs, and Remnants of the First-Generation Stars. *Tomonori Totani.* 586, 735 (2003)

Environmental Effects on Evolution of Cluster Galaxies in a Λ-dominated Cold Dark Matter Universe. *Takashi Okamoto & Masahiro Nagashima.* 587, 500 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

A Photometric and Spectroscopic Study of Dwarf and Giant Galaxies in the Coma Cluster. IV. The Luminosity Function. *Bahram Mobasher, Matthew Colless, Dave Carter, Bianca M. Poggianti, Terry J. Bridges, Kelly Kranz, Y. Komiyama, N. Kashikawa, M. Yagi, & S. Okamura.* 587, 605 (2003)

On the Relationship between Cooling Flows and Bubbles. *Ian G. McCarthy, Arif Babul, Neal Katz, & Michael L. Balogh.* 587, L75 (2003)

GALAXIES: CLUSTERS: INDIVIDUAL

Name: Abell 2052

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

Name: Coma

Intergalactic Globular Clusters and the Faint End of the Galaxy Number Counts in A1656 (Coma). *A. Marín-Franch & A. Aparicio.* 585, 714 (2003)

A Photometric and Spectroscopic Study of Dwarf and Giant Galaxies in the Coma Cluster. IV. The Luminosity Function. *Bahram Mobasher, Matthew Colless, Dave Carter, Bianca M. Poggianti, Terry J. Bridges, Kelly Kranz, Y. Komiyama, N. Kashikawa, M. Yagi, & S. Okamura.* 587, 605 (2003)

Name: Hercules

Cluster-Cluster Microlensing as a Probe of Intracluster Stars, MACHOs, and Remnants of the First-Generation Stars. *Tomonori Totani.* 586, 735 (2003)

Alphanumeric: A478

Chandra Observations of the Galaxy Cluster A478: The Interaction of Hot Gas and Radio Plasma in the Core, and an Improved Determination of the Compton y-Parameter. *M. Sun, C. Jones, S. S. Murray, S. W. Allen, A. C. Fabian, & A. C. Edge.* 587, 619 (2003)

Alphanumeric: A754

Chandra Temperature Map of A754 and Constraints on Thermal Conduction. *M. Markevitch, P. Mazzotta, A. Vikhlinin, D. Burke, Y. Butt, L. David, H. Donnelly, W. R. Forman, D. Harris, D.-W. Kim, S. Virani, & J. Vrtilek.* 586, L19 (2003)

Alphanumeric: A2029

Chandra Observations of A2029: The Dark Matter Profile Down to below $0.01r_{\rm vir}$ in an Unusually Relaxed Cluster. *Aaron D. Lewis, David A. Buote, & John T. Stocke.* 586, 135 (2003)

Alphanumeric: Cl J0152.7−1357

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

Alphanumeric: Cl J1113.1−2615

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

GALAXIES: COOLING FLOWS

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

On the Relationship between Cooling Flows and Bubbles. *Ian G. McCarthy, Arif Babul, Neal Katz, & Michael L. Balogh.* 587, L75 (2003)

GALAXIES: DISTANCES AND REDSHIFTS

Reconstructing Cepheid Light Curve with Fourier Techniques. I. The Fourier Expansion and Interrelations. *Chow-Choong Ngeow, Shashi M. Kanbur, Sergei Nikolaev, Nial R. Tanvir, & Martin A. Hendry.* 586, 959 (2003)

The Hα Luminosity Function and Star Formation Rate at $z \approx 0.24$ Based on Subaru Deep Imaging Data. *Shinobu S. Fujita, Masaru Ajiki, Yasuhiro Shioya, Tohru Nagao, Takashi Murayama, Yoshiaki Taniguchi, Kazuyoshi Umeda, Sanae Yamada, Masafumi Yagi, Sadonori Okamura, & Yutaka Komiyama.* 586, L115 (2003)

A European Southern Oobseratory Very Large Telescope Survey of Near-Infrared ($Z \leq 25$) Selected Galaxies at Redshifts $4.5 < z < 6$: Constraining the Cosmic Star Formation Rate near the Reionization Epoch. *A. Fontana, F. Poli, N. Menci, M. Nonino, E. Giallongo, S. Cristiani, & S. D'Odorico.* 587, 544 (2003)

A Photometric and Spectroscopic Study of Dwarf and Giant Galaxies in the Coma Cluster. IV. The Luminosity Function. *Bahram Mobasher, Matthew Colless, Dave Carter, Bianca M. Poggianti, Terry J. Bridges, Kelly Kranz, Y. Komiyama, N. Kashikawa, M. Yagi, & S. Okamura.* 587, 605 (2003)

The Extinction and Distance of Maffei 1. *Robin L. Fingerhut, Marshall L. McCall, Michael De Robertis, Robin L. Kingsburgh, Michael Komljenovic, Henry Lee, & Ronald J. Buta.* 587, 672 (2003)

GALAXIES: DWARF

The Failure of Self-Interacting Dark Matter to Solve the Overabundance of Dark Satellites and the Soft Core Question. *Elena D'Onghia & Andreas Burkert.* 586, 12 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

The Kinematics in the Core of the Low Surface Brightness Galaxy DDO 39. *R. A. Swaters, M. A. W. Verheijen, M. A. Bershady, & D. R. Andersen.* 587, L19 (2003)

Candidate Tidal Dwarf Galaxies in the Compact Group CG J1720−67.8. *S. Temporin, R. Weinberger, G. Galaz, & F. Kerber.* 587, 660 (2003)

GALAXIES: ELLIPTICAL AND LENTICULAR, CD

The Fundamental Plane at $z = 1.27$: First Calibration of the Mass Scale of Red Galaxies at Redshifts $z > 1$. *Pieter G. van Dokkum & S. A. Stanford.* 585, 78 (2003)

Massive Elliptical Galaxies at High Redshift: NICMOS Imaging of $z \approx 1$ Radio Galaxies. *Andrew W. Zirm, Mark Dickinson, & Arjun Dey.* 585, 90 (2003)

Average Spectra of Massive Galaxies in the Sloan Digital Sky Survey. *Daniel J. Eisenstein, David W. Hogg, Masataka Fukugita, Osamu Nakamura, Mariangela Bernardi, Douglas P. Finkbeiner, David J. Schlegel, J. Brinkmann, Andrew J. Connolly, István Csabai, James E. Gunn, Željko Ivezić, Don Q. Lamb, Jon Loveday, Jeffrey A. Munn, Robert C. Nichol, Donald P. Schneider, Michael A. Strauss, Alex Szalay, & Don G. York.* 585, 694 (2003)

X-Ray Source Population in the Elliptical Galaxy NGC 720 with *Chandra*. *Tesla E. Jeltema, Claude R. Canizares, David A. Buote, & Gordon P. Garmire.* 585, 756 (2003)

Evidence for an Intermediate-Age, Metal-rich Population of Globular Clusters in NGC 4365. *Søren S. Larsen, Jean P. Brodie, Michael A. Beasley, Duncan A. Forbes, Markus Kissler-Patig, Harald Kuntschner, & Thomas H. Puzia.* 585, 767 (2003)

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

The Magnesium–Velocity Dispersion Relation and the Genesis of Early-Type Galaxies. *Guy Worthey & Maela Collobert.* 586, 17 (2003)

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

Hubble Space Telescope WFPC2 Morphologies of *K*-selected Extremely Red Galaxies. *Lin Yan & David Thompson.* 586, 765 (2003)

The Evolution of a Mass-selected Sample of Early-Type Field Galaxies. *D. Rusin, C. S. Kochanek, E. E. Falco, C. R. Keeton, B. A. McLeod, C. D. Impey, J. Lehár, J. A. Muñoz, C. Y. Peng, & H.-W. Rix.* 587, 143 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

GALAXIES: EVOLUTION

The Properties of Microjansky Radio Sources in the Hubble Deep Field–North, SSA 13, and SSA 22 Fields. *S. C. Chapman, A. J. Barger, L. L. Cowie, D. Scott, C. Borys, P. Capak, E. B. Fomalont, G. F. Lewis, E. A. Richards, A. T. Steffen, G. Wilson, & M. Yun.* 585, 57 (2003)

The Infrared Counterparts of the Optically Unidentified Chandra Deep Field–South 1 Ms Sources. *Haojing Yan, Rogier A. Windhorst, Huub J. A. Röttgering, Seth H. Cohen, Stephen C. Odewahn, Scott C. Chapman, & William C. Keel.* 585, 67 (2003)

The Fundamental Plane at $z = 1.27$: First Calibration of the Mass Scale of Red Galaxies at Redshifts $z > 1$. *Pieter G. van Dokkum & S. A. Stanford.* 585, 78 (2003)

Galaxy Clustering Evolution in the UH8K Weak-Lensing Fields. *Gillian Wilson.* 585, 191 (2003)

Correlations of Richness and Global Properties in Galaxy Clusters. *H. K. C. Yee & E. Ellingson.* 585, 215 (2003)

Predictions for Cosmological Infrared Surveys from Space with the Multiband Imaging Photometer for *SIRTF*. *H. Dole, G. Lagache, & J.-L. Puget.* 585, 617 (2003)

Average Spectra of Massive Galaxies in the Sloan Digital Sky Survey. *Daniel J. Eisenstein, David W. Hogg, Masataka Fukugita, Osamu Nakamura, Mariangela Bernardi, Douglas P. Finkbeiner, David J. Schlegel, J. Brinkmann, Andrew J. Connolly, István Csabai, James E. Gunn, Željko Ivezić, Don Q. Lamb, Jon Loveday, Jeffrey A. Munn, Robert C. Nichol, Donald P. Schneider, Michael A. Strauss, Alex Szalay, & Don G. York.* 585, 694 (2003)

Intergalactic Globular Clusters and the Faint End of the Galaxy Number Counts in A1656 (Coma). *A. Marín-Franch & A. Aparicio.* 585, 714 (2003)

Extraordinary Diffuse Light in Hickson Compact Group 90. *P. M. White, G. Bothun, Martín A. Guerrero, Michael J. West, & Wayne A. Barkhouse.* 585, 739 (2003)

Evidence for an Intermediate-Age, Metal-rich Population of Globular Clusters in NGC 4365. *Søren S. Larsen, Jean P. Brodie, Michael A. Beasley, Duncan A. Forbes, Markus Kissler-Patig, Harald Kuntschner, & Thomas H. Puzia.* 585, 767 (2003)

Gravitational Potential Reconstruction from Peculiar Velocity and Weak Lensing Measurements. *Olivier Doré, Lloyd Knox, & Alan Peel.* 585, L81 (2003)

The Magnesium–Velocity Dispersion Relation and the Genesis of Early-Type Galaxies. *Guy Worthey & Maela Collobert.* 586, 17 (2003)

On the Spiral Structure of NGC 2915 and Dark Matter. *F. S. Masset & M. Bureau.* 586, 152 (2003)

Stellar Masses of Luminous Compact Blue Galaxies at Redshifts $z = 0.4$–1.2. *R. Guzmán, G. Östlin, D. Kunth, M. A. Bershady, D. C. Koo, & M. A. Pahre.* 586, L45 (2003)

The Las Campanas Infrared Survey. IV. The Photometric Redshift Survey and the Rest-Frame *R*-Band Galaxy Luminosity Function at $0.5 \leq z \leq 1.5$. *Hsiao-Wen Chen, Ronald O. Marzke, Patrick J. McCarthy, P. Martini, R. G. Carlberg, S. E. Persson, A. Bunker, C. R. Bridge, & R. G. Abraham.* 586, 745 (2003)

Subaru Deep Survey. IV. Discovery of a Large-Scale Structure at Redshift $\simeq 5$. *K. Shimasaku, M. Ouchi, S. Okamura, N. Kashikawa, M. Doi, H. Furusawa, M. Hamabe, T. Hayashino, K. Kawabata, M. Kimura, K. Kodaira, Y. Komiyama, Y. Matsuda, M. Miyazaki, S. Miyazaki, F. Nakata, K. Ohta, Y. Ohyama, M. Sekiguchi, Y. Shioya, H. Tamura, Y. Taniguchi, M. Yagi, T. Yamada, & N. Yasuda.* 586, L111 (2003)

The Hα Luminosity Function and Star Formation Rate at $z \approx 0.24$ Based on Subaru Deep Imaging Data. *Shinobu S. Fujita, Masaru Ajiki, Yasuhiro Shioya, Tohru Nagao, Takashi Murayama, Yoshiaki Taniguchi, Kazuyoshi Umeda, Sanae Yamada, Masafumi Yagi, Sadonori Okamura, & Yutaka Komiyama.* 586, L115 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

The Evolution of the Global Stellar Mass Density at $0 < z < 3$. *Mark Dickinson, Casey Papovich, Henry C. Ferguson, & Tamás Budavári.* 587, 25 (2003)

The Canada-UK Deep Submillimeter Survey. VI. The 3 Hour Field. *T. M. Webb, S. A. Eales, S. J. Lilly, D. L. Clements, L. Dunne, W. K. Gear, R. J. Ivison, H. Flores, & M. Yun.* 587, 41 (2003)

The Evolution of a Mass-selected Sample of Early-Type Field Galaxies. *D. Rusin, C. S. Kochanek, E. E. Falco, C. R. Keeton, B. A. McLeod, C. D. Impey, J. Lehár, J. A. Muñoz, C. Y. Peng, & H.-W. Rix.* 587, 143 (2003)

Environmental Effects on Evolution of Cluster Galaxies in a Λ-dominated Cold Dark Matter Universe. *Takashi Okamoto & Masahiro Nagashima.* 587, 500 (2003)

A Quadruple-Phase Strong Mg II Absorber at $z \sim 0.9902$ toward PG 1634+706. *Jie Ding, Jane C. Charlton, Nicholas A. Bond, Stephanie G. Zonak, & Christopher W. Churchill.* 587, 551 (2003)

Cosmic-Ray History and Its Implications for Galactic Magnetic Fields. *Ellen G. Zweibel.* 587, 625 (2003)

Candidate Tidal Dwarf Galaxies in the Compact Group CG J1720−67.8. *S. Temporin, R. Weinberger, G. Galaz, & F. Kerber.* 587, 660 (2003)

Quasar Evolution Driven by Galaxy Encounters in Hierarchical Structures. *N. Menci, A. Cavaliere, A. Fontana, E. Giallongo, F. Poli, & V. Vittorini.* 587, L63 (2003)

A Significant Population of Red, Near-Infrared–selected High-Redshift Galaxies. *Marijn Franx, Ivo Labbe, Gregory Rudnick, Pieter G. van Dokkum, Emanuele Daddi, Natascha M. Foerster Schreiber, Alan Moorwood, Hans-Walter Rix, Huub Roettgering, Arjen van de Wel, Paul van der Werf, & Lottie van Starkenburg.* 587, L79 (2003)

Spectroscopic Confirmation of a Substantial Population of Luminous Red Galaxies at Redshifts $z > 2$. *Pieter G. van Dokkum, Natascha M. Foerster Schreiber, Marijn Franx, Emanuele Daddi, Garth D. Illingworth, Ivo Labbe, Alan Moorwood, Hans-Walter Rix, Huub Roettgering, Gregory*

Rudnick, Arjen van der Wel, Paul van der Werf, & Lottie van Starkenburg. 587, L83 (2003)

GALAXIES: FORMATION

The Properties of Microjansky Radio Sources in the Hubble Deep Field–North, SSA 13, and SSA 22 Fields. *S. C. Chapman, A. J. Barger, L. L. Cowie, D. Scott, C. Borys, P. Capak, E. B. Fomalont, G. F. Lewis, E. A. Richards, A. T. Steffen, G. Wilson, & M. Yun.* 585, 57 (2003)

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Properties of the Brightest Cluster Galaxy and Its Host Cluster. *Haruyoshi Katayama, Kiyoshi Hayashida, Fumio Takahara, & Yutaka Fujita.* 585, 687 (2003)

Intergalactic Globular Clusters and the Faint End of the Galaxy Number Counts in A1656 (Coma). *A. Marín-Franch & A. Aparicio.* 585, 714 (2003)

Gravitational Potential Reconstruction from Peculiar Velocity and Weak Lensing Measurements. *Olivier Doré, Lloyd Knox, & Alan Peel.* 585, L81 (2003)

The Discovery of a Very Narrow Line Star-forming Object at a Redshift of 5.66. *Yoshiaki Taniguchi, Masaru Ajiki, Takashi Murayama, Tohru Nagao, Sylvain Veilleux, David B. Sanders, Yutaka Komiyama, Yasuhiro Shioya, Shinobu S. Fujita, Yuko Kakazu, Sadanori Okamura, Hiroyasu Ando, Tetsuo Nishimura, Masahiko Hayashi, Ryusuke Ogasawara, & Shin-ichi Ichikawa.* 585, L97 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

The Magnesium–Velocity Dispersion Relation and the Genesis of Early-Type Galaxies. *Guy Worthey & Maela Collobert.* 586, 17 (2003)

The Influence of Ω_b on High-Redshit Structure. *Jeffrey P. Gardner, Neal Katz, Lars Hernquist, & David H. Weinberg.* 587, 1 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

The Canada-UK Deep Submillimeter Survey. VI. The 3 Hour Field. *T. M. Webb, S. A. Eales, S. J. Lilly, D. L. Clements, L. Dunne, W. K. Gear, R. J. Ivison, H. Flores, & M. Yun.* 587, 41 (2003)

A 3×10^9 $M_\odot$ Black Hole in the Quasar SDSS J1148+5251 at $z = 6.41$. *Chris J. Willott, Ross J. McLure, & Matt J. Jarvis.* 587, L15 (2003)

Environmental Effects on Evolution of Cluster Galaxies in a Λ-dominated Cold Dark Matter Universe. *Takashi Okamoto & Masahiro Nagashima.* 587, 500 (2003)

A European Southern Oobseratory Very Large Telescope Survey of Near-Infrared ($Z \leq 25$) Selected Galaxies at Redshifts $4.5 < z < 6$: Constraining the Cosmic Star Formation Rate near the Reionization Epoch. *A. Fontana, F. Poli, N. Menci, M. Nonino, E. Giallongo, S. Cristiani, & S. D'Odorico.* 587, 544 (2003)

Bars and Dark Matter Halo Cores. *J. A. Sellwood.* 587, 638 (2003)

Quasar Evolution Driven by Galaxy Encounters in Hierarchical Structures. *N. Menci, A. Cavaliere, A. Fontana, E. Giallongo, F. Poli, & V. Vittorini.* 587, L63 (2003)

Spectroscopic Confirmation of a Substantial Population of Luminous Red Galaxies at Redshifts $z > 2$. *Pieter G. van Dokkum, Natascha M. Foerster Schreiber, Marijn Franx, Emanuele Daddi, Garth D. Illingworth, Ivo Labbe, Alan Moorwood, Hans-Walter Rix, Huub Roettgering, Gregory Rudnick, Arjen van der Wel, Paul van der Werf, & Lottie van Starkenburg.* 587, L83 (2003)

GALAXIES: FUNDAMENTAL PARAMETERS

The Overdensities of Galaxy Environments as a Function of Luminosity and Color. *David W. Hogg, Michael R. Blanton, Daniel J. Eisenstein, James E. Gunn, David J. Schlegel, Idit Zehavi, Neta A. Bahcall, Jon Brinkmann, Istvan Csabai, Donald P. Schneider, David H. Weinberg, & Donald G. York.* 585, L5 (2003)

Stellar Masses of Luminous Compact Blue Galaxies at Redshifts $z = 0.4$–1.2. *R. Guzmán, G. Östlin, D. Kunth, M. A. Bershady, D. C. Koo, & M. A. Pahre.* 586, L45 (2003)

Hubble Space Telescope WFPC2 Morphologies of *K*-selected Extremely Red Galaxies. *Lin Yan & David Thompson.* 586, 765 (2003)

GALAXIES: GENERAL

A First Estimate of the Baryonic Mass Function of Galaxies. *Eric F. Bell, Daniel H. McIntosh, Neal Katz, & Martin D. Weinberg.* 585, L117 (2003)

Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

Small-Scale Clustering in Isotropic Arrival Distribution of Ultra–High-Energy Cosmic Rays and Implications for Their Source Candidates. *Hiroyuki Yoshiguchi, Shigehiro Nagataki, Sin-ya Tsubaki, & Katsuhiko Sato.* 586, 1211 (2003)

The Rate and the Origin of Type Ia Supernovae in Radio Galaxies. *Massimo Della Valle & Nino Panagia.* 587, L71 (2003)

GALAXIES: HALOS

High-Latitude H I in NGC 2613: Buoyant Disk-Halo Outflow. *Judith A. Irwin & Tara Chaves.* 585, 268 (2003)

Dark Matter within High Surface Brightness Spiral Galaxies. *Thilo Kranz, Adrianne Slyz, & Hans-Walter Rix.* 586, 143 (2003)

On the Spiral Structure of NGC 2915 and Dark Matter. *F. S. Masset & M. Bureau.* 586, 152 (2003)

ROSAT HRI Investigation of the NGC 507 X-Ray Halo. *M. Paolillo, G. Fabbiano, G. Peres, & D.-W. Kim.* 586, 850 (2003)

The Kinematics in the Core of the Low Surface Brightness Galaxy DDO 39. *R. A. Swaters, M. A. W. Verheijen, M. A. Bershady, & D. R. Andersen.* 587, L19 (2003)

Environmental Effects on Evolution of Cluster Galaxies in a Λ-dominated Cold Dark Matter Universe. *Takashi Okamoto & Masahiro Nagashima.* 587, 500 (2003)

A Quadruple-Phase Strong Mg II Absorber at $z \sim 0.9902$ toward PG 1634+706. *Jie Ding, Jane C. Charlton, Nicholas A. Bond, Stephanie G. Zonak, & Christopher W. Churchill.* 587, 551 (2003)

GALAXIES: HIGH-REDSHIFT

Three Emission-Line Galaxies at $z \sim 2.4$. *Richard Meyer, David Thompson, & Filippo Mannucci.* 585, 73 (2003)

Massive Elliptical Galaxies at High Redshift: NICMOS Imaging of $z \approx 1$ Radio Galaxies. *Andrew W. Zirm, Mark Dickinson, & Arjun Dey.* 585, 90 (2003)

Correlations of Richness and Global Properties in Galaxy Clusters. *H. K. C. Yee & E. Ellingson.* 585, 215 (2003)

No X-Ray–bright Type II Quasars among the Lyα Emitters. *S. Malhotra, J. X. Wang, J. E. Rhoads, T. M. Heckman, & C. A. Norman.* 585, L25 (2003)

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Searching for $z \simeq 6$ Objects with the *Hubble Space Telescope* Advanced Camera for Surveys: Preliminary Analysis of a Deep Parallel Field. *Haojing Yan, Rogier A. Windhorst, & Seth H. Cohen.* 585, L93 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

Keck Spectroscopy and *Hubble Space Telescope* Imaging of GRB 000926: Probing a Host Galaxy at $z = 2.038$. *S. Castro, T. J. Galama, F. A. Harrison, J. A. Holtzman, J. S. Bloom, S. G. Djorgovski, & S. R. Kulkarni.* 586, 128 (2003)

Discovery of Early Optical Emission from GRB 021211. *D. W. Fox, P. A. Price, A. M. Soderberg, E. Berger, S. R. Kulkarni, R. Sari, D. A. Frail, F. A. Harrison, S. A. Yost, K. Matthews, B. A. Peterson, I. Tanaka, J. Christiansen, & G. H. Moriarty-Schieven.* 586, L5 (2003)

The Las Campanas Infrared Survey. IV. The Photometric Redshift Survey and the Rest-Frame *R*-Band Galaxy Luminosity Function at $0.5 \leq z \leq 1.5$. *Hsiao-Wen Chen, Ronald O. Marzke, Patrick J. McCarthy, P. Martini, R. G. Carlberg, S. E. Persson, A. Bunker, C. R. Bridge, & R. G. Abraham.* 586, 745 (2003)

Hubble Space Telescope WFPC2 Morphologies of *K*-selected Extremely Red Galaxies. *Lin Yan & David Thompson.* 586, 765 (2003)

Subaru Deep Survey. IV. Discovery of a Large-Scale Structure at Redshift $\simeq$5. *K. Shimasaku, M. Ouchi, S. Okamura, N. Kashikawa, M. Doi, H. Furusawa, M. Hamabe, T. Hayashino, K. Kawabata, M. Kimura, K. Kodaira, Y. Komiyama, Y. Matsuda, M. Miyazaki, S. Miyazaki, F. Nakata, K. Ohta, Y. Ohyama, M. Sekiguchi, Y. Shioya, H. Tamura, Y. Taniguchi, M. Yagi, T. Yamada, & N. Yasuda.* 586, L111 (2003)

The Evolution of the Global Stellar Mass Density at $0 < z < 3$. *Mark Dickinson, Casey Papovich, Henry C. Ferguson, & Tamás Budavári.* 587, 25 (2003)

The Canada-UK Deep Submillimeter Survey. VI. The 3 Hour Field. *T. M. Webb, S. A. Eales, S. J. Lilly, D. L. Clements, L. Dunne, W. K. Gear, R. J. Ivison, H. Flores, & M. Yun.* 587, 41 (2003)

The Dust in Lyman Break Galaxies. *Uma P. Vijh, Adolph N. Witt, & Karl D. Gordon.* 587, 533 (2003)

A European Southern Oobseratory Very Large Telescope Survey of Near-Infrared ($Z \leq 25$) Selected Galaxies at Redshifts $4.5 < z < 6$: Constraining the Cosmic Star Formation Rate near the Reionization Epoch. *A. Fontana, F. Poli, N. Menci, M. Nonino, E. Giallongo, S. Cristiani, & S. D'Odorico.* 587, 544 (2003)

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

A Significant Population of Red, Near-Infrared–selected High-Redshift Galaxies. *Marijn Franx, Ivo Labbe, Gregory Rudnick, Pieter G. van Dokkum, Emanuele Daddi, Natascha M. Foerster Schreiber, Alan Moorwood, Hans-Walter Rix, Huub Roettgering, Arjen van de Wel, Paul van der Werf, & Lottie van Starkenburg.* 587, L79 (2003)

GALAXIES: INDIVIDUAL

Messier Number: M31

Chandra Studies of the X-Ray Point Source Luminosity Functions of M31. *Albert K. H. Kong, Rosanne DiStefano, Michael R. Garcia, & Jochen Greiner.* 585, 298 (2003)

Messier Number: M33

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

Messier Number: M51

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

Messier Number: M81

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

Messier Number: M82

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

A ^{12}CO Map of M82: The Significance of Warm Molecular Gas. *John S. Ward, Jonas Zmuidzinas, Andrew I. Harris, & Kate G. Isaak.* 587, 171 (2003)

Messier Number: M87

Flaring X-Ray Emission from HST-1, a Knot in the M87 Jet. *D. E. Harris, J. A. Biretta, W. Junor, E. S. Perlman, W. B. Sparks, & A. S. Wilson.* 586, L41 (2003)

NGC Number: NGC 253

Signatures of Hadronic Cosmic Rays in Starbursts? High-Energy Photons and Neutrinos from NGC 253. *Gustavo E. Romero & Diego F. Torres.* 586, L33 (2003)

CO $J = 7 \rightarrow 6$ Observations of NGC 253: Cosmic-Ray–heated Warm Molecular Gas. *C. M. Bradford, T. Nikola, G. J. Stacey, A. D. Bolatto, J. M. Jackson, M. L. Savage, J. A. Davidson, & S. J. Higdon.* 586, 891 (2003)

NGC Number: NGC 1097

A Minor-Merger Interpretation for NGC 1097's "Jets." *James L. Higdon & John F. Wallin.* 585, 281 (2003)

NGC Number: NGC 1097A

A Minor-Merger Interpretation for NGC 1097's "Jets." *James L. Higdon & John F. Wallin.* 585, 281 (2003)

NGC Number: NGC 1097B

A Minor-Merger Interpretation for NGC 1097's "Jets." *James L. Higdon & John F. Wallin.* 585, 281 (2003)

NGC Number: NGC 1143

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

NGC Number: NGC 1144

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

NGC Number: NGC 1316

Chandra X-Ray Observations of NGC 1316 (Fornax A). *Dong-Woo Kim & G. Fabbiano.* 586, 826 (2003)

NGC Number: NGC 2613

High-Latitude H I in NGC 2613: Buoyant Disk-Halo Outflow. *Judith A. Irwin & Tara Chaves.* 585, 268 (2003)

NGC Number: NGC 2915

On the Spiral Structure of NGC 2915 and Dark Matter. *F. S. Masset & M. Bureau.* 586, 152 (2003)

NGC Number: NGC 3227

Black Hole Masses in Three Seyfert Galaxies. *C. A. Onken, B. M. Peterson, M. Dietrich, A. Robinson, & I. M. Salamanca.* 585, 121 (2003)

NGC Number: NGC 3516

Black Hole Masses in Three Seyfert Galaxies. *C. A. Onken, B. M. Peterson, M. Dietrich, A. Robinson, & I. M. Salamanca.* 585, 121 (2003)

NGC Number: NGC 4041

Is There Really a Black Hole at the Center of NGC 4041? Constraints from Gas Kinematics. *A. Marconi, D. J. Axon, A. Capetti, W. Maciejewski, J. Atkinson, D. Batcheldor, J. Binney, M. Carollo, L. Dressel, H. Ford, J. Gerssen, M. A. Hughes, D. Macchetto, M. R. Merrifield, C. Scarlata, W. Sparks, M. Stiavelli, Z. Tsvetanov, & R. P. van der Marel.* 586, 868 (2003)

NGC Number: NGC 4151

Resolved Mid-Infrared Emission in the Narrow-Line Region of NGC 4151. *James T. Radomski, Robert K. Piña, Christopher Packham, Charles M. Telesco, James M. De Buizer, R. Scott Fisher, & A. Robinson.* 587, 117 (2003)

NGC Number: NGC 4261

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

NGC Number: NGC 4365

Evidence for an Intermediate-Age, Metal-rich Population of Globular Clusters in NGC 4365. *Søren S. Larsen, Jean P. Brodie, Michael A. Beasley, Duncan A. Forbes, Markus Kissler-Patig, Harald Kuntschner, & Thomas H. Puzia.* 585, 767 (2003)

NGC Number: NGC 4449

Chandra Observations of the Luminous, Oxygen-rich Supernova Remnants in the Irregular Galaxy NGC 4449. *Daniel J. Patnaude & Robert A. Fesen.* 587, 221 (2003)

NGC Number: NGC 4472

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

NGC Number: NGC 4593

Black Hole Masses in Three Seyfert Galaxies. *C. A. Onken, B. M. Peterson, M. Dietrich, A. Robinson, & I. M. Salamanca.* 585, 121 (2003)

NGC Number: NGC 4639

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

NGC Number: NGC 4649

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

NGC Number: NGC 4650A

Stellar Motions in the Polar Ring Galaxy NGC 4650A. *Rob A. Swaters & Vera C. Rubin.* 587, L23 (2003)

NGC Number: NGC 5195

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

NGC Number: NGC 5548

Using Multiwavelength Observations to Determine the Black Hole Mass and Accretion Rate in the Type 1 Seyfert Galaxy NGC 5548. *James Chiang & Omer Blaes.* 586, 97 (2003)

An Intrinsic Baldwin Effect in the Hβ Broad Emission Line in the Spectrum of NGC 5548. *Karoline M. Gilbert & Bradley M. Peterson.* 587, 123 (2003)

NGC NUmber: NGC 6753

Ultraviolet-Optical Pixel Maps of Face-on Spiral Galaxies: Clues for Dynamics and Star Formation Histories. *Paul B. Eskridge, Jay A. Frogel, Violet A. Taylor, Rogier A. Windhorst, Stephen C. Odewahn, Claudia A. T. C. Chiarenza, Christopher J. Conselice, Richard de Grijs, Lynn D. Matthews, Robert W. O'Connell, & John S. Gallagher III.* 586, 923 (2003)

NGC Number: NGC 6782

Ultraviolet-Optical Pixel Maps of Face-on Spiral Galaxies: Clues for Dynamics and Star Formation Histories. *Paul B. Eskridge, Jay A. Frogel, Violet A. Taylor, Rogier A. Windhorst, Stephen C. Odewahn, Claudia A. T. C. Chiarenza, Christopher J. Conselice, Richard de Grijs, Lynn D. Matthews, Robert W. O'Connell, & John S. Gallagher III.* 586, 923 (2003)

Name: Arp 118

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

Name: Arp 188

Advanced Camera for Surveys Observations of Young Star Clusters in the Interacting Galaxy UGC 10214. *H. D. Tran, M. Sirianni, H. C. Ford, G. D. Illingworth, M. Clampin, G. Hartig, R. H. Becker, R. L. White, F. Bartko, N. Benítez, J. P. Blakeslee, R. Bouwens, T. J. Broadhurst, R. Brown, C. Burrows, E. Cheng, N. Cross, P. D. Feldman, M. Franx, D. A. Golimowski, C. Gronwall, L. Infante, R. A. Kimble, J. Krist, M. Lesser, D. Magee, A. R. Martel, Wm. J. McCann, G. R. Meurer, G. Miley, M. Postman, P. Rosati, W. B. Sparks, & Z. Tsvetanov.* 585, 750 (2003)

Name: Henize 2-10

The Stellar Content of Henize 2-10 from Space Telescope Imaging Spectrograph Ultraviolet Spectroscopy. *Rupali Chandar, Claus Leitherer, Christy Tremonti, & Daniela Calzetti.* 586, 939 (2003)

Name: Large Magellanic Cloud

Constraints on the Ionization Balance of Hot-Star Winds from *FUSE* Observations of O Stars in the Large Magellanic Cloud. *D. Massa, A. W. Fullerton, G. Sonneborn, & J. B. Hutchings.* 586, 996 (2003)

Name: Maffei 1

The Extinction and Distance of Maffei 1. *Robin L. Fingerhut, Marshall L. McCall, Michael De Robertis, Robin L. Kingsburgh, Michael Komljenovic, Henry Lee, & Ronald J. Buta.* 587, 672 (2003)

Name: Pictor A

Detection of X-Ray Emission from the Eastern Radio Lobe of Pictor A. *Paola Grandi, Matteo Guainazzi, Laura Maraschi, Raffaella Morganti, Roberto Fusco-Femiano, Mariateresa Fiocchi, Lucia Ballo, & Fabrizio Tavecchio.* 586, 123 (2003)

Name: Small Magellanic Cloud

Constraints on the Ionization Balance of Hot-Star Winds from *FUSE* Observations of O Stars in the Large Magellanic Cloud. *D. Massa, A. W. Fullerton, G. Sonneborn, & J. B. Hutchings.* 586, 996 (2003)

Name: Ursa Minor

A New Method of Estimating the Mass-to-Light Ratio of the Ursa Minor Dwarf Spheroidal Galaxy. *M. Ángeles Gómez-Flechoso & D. Martínez-Delgado.* 586, L123 (2003)

Alphanumeric: 3C 147

A Search for Correlations of TeV Gamma Rays with Ultra–High-Energy Cosmic Rays. *C. W. Akerlof, S. Biller, P. Boyle, J. Buckley, D. A. Carter-Lewis, M. Catanese, M. F. Cawley, V. Connaughton, D. J. Fegan, J. Finley, J. Gaidos, A. M. Hillas, F. Krennrich, R. C. Lamb, R. Lessard, J. McEnery, G. Mohanty, N. A. Porter, J. Quinn, A. Rodgers, H. J. Rose, F. Samuelson, M. S. Schubnell, G. Sembroski, R. Srinivasan, T. C. Weekes, & J. Zweerink.* 586, 1232 (2003)

Alphanumeric: 3C 270

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

Alphanumeric: IC 4296

The Nuclear Accretion in the FR I Radio Galaxy IC 4296 from *Chandra* and Very Long Baseline Array Observations. *S. Pellegrini, T. Venturi, A. Comastri, G. Fabbiano, F. Fiore, C. Vignali, R. Morganti, & G. Trinchieri.* 585, 677 (2003)

Alphanumeric: IRAS 17208−0014

Very Long Baseline Array Continuum and H I Absorption Observations of the Ultraluminous Infrared Galaxy IRAS 17208−0014. *Emmanuel Momjian, Jonathan D. Romney, Christopher L. Carilli, Thomas H. Troland, & Gregory B. Taylor.* 587, 160 (2003)

Alphanumeric: LAE J1044−0130

The Discovery of a Very Narrow Line Star-forming Object at a Redshift of 5.66. *Yoshiaki Taniguchi, Masaru Ajiki, Takashi Murayama, Tohru Nagao, Sylvain Veilleux, David B. Sanders, Yutaka Komiyama, Yasuhiro Shioya, Shinobu S. Fujita, Yuko Kakazu, Sadanori Okamura, Hiroyasu Ando, Tetsuo Nishimura, Masahiko Hayashi, Ryusuke Ogasawara, & Shin-ichi Ichikawa.* 585, L97 (2003)

Alphanumeric: UGC 10214

Advanced Camera for Surveys Observations of Young Star Clusters in the Interacting Galaxy UGC 10214. *H. D. Tran, M. Sirianni, H. C. Ford, G. D. Illingworth, M. Clampin, G. Hartig, R. H. Becker, R. L. White, F. Bartko, N. Benítez, J. P. Blakeslee, R. Bouwens, T. J. Broadhurst, R. Brown, C. Burrows, E. Cheng, N. Cross, P. D. Feldman, M. Franx, D. A. Golimowski, C. Gronwall, L. Infante, R. A. Kimble, J. Krist, M. Lesser, D. Magee, A. R. Martel, Wm. J. McCann, G. R. Meurer, G. Miley, M. Postman, P. Rosati, W. B. Sparks, & Z. Tsvetanov.* 585, 750 (2003)

Alphanumeric: VV 29

Advanced Camera for Surveys Observations of Young Star Clusters in the Interacting Galaxy UGC 10214. *H. D. Tran, M. Sirianni, H. C. Ford, G. D. Illingworth, M. Clampin, G. Hartig, R. H. Becker, R. L. White, F. Bartko, N. Benítez, J. P. Blakeslee, R. Bouwens, T. J. Broadhurst, R. Brown, C. Burrows, E. Cheng, N. Cross, P. D. Feldman, M. Franx, D. A. Golimowski, C. Gronwall, L. Infante, R. A. Kimble, J. Krist, M. Lesser, D. Magee, A. R. Martel, Wm. J. McCann, G. R. Meurer, G. Miley, M. Postman, P. Rosati, W. B. Sparks, & Z. Tsvetanov.* 585, 750 (2003)

GALAXIES: INTERACTIONS

A Minor-Merger Interpretation for NGC 1097's "Jets." *James L. Higdon & John F. Wallin.* 585, 281 (2003)

Extraordinary Diffuse Light in Hickson Compact Group 90. *P. M. White, G. Bothun, Martín A. Guerrero, Michael J. West, & Wayne A. Barkhouse.* 585, 739 (2003)

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

The Magellanic Stream, High-Velocity Clouds, and the Sculptor Group. *Mary E. Putman, Lister Staveley-Smith, Kenneth C. Freeman, Brad K. Gibson, & David G. Barnes.* 586, 170 (2003)

Morphological and Kinematic Properties of Disk Galaxies Perturbed by a Satellite. *R. Chan & S. Junqueira.* 586, 780 (2003)

Environmental Effects on Evolution of Cluster Galaxies in a Λ-dominated Cold Dark Matter Universe. *Takashi Okamoto & Masahiro Nagashima.* 587, 500 (2003)

Candidate Tidal Dwarf Galaxies in the Compact Group CG J1720−67.8. *S. Temporin, R. Weinberger, G. Galaz, & F. Kerber.* 587, 660 (2003)

Quasar Evolution Driven by Galaxy Encounters in Hierarchical Structures. *N. Menci, A. Cavaliere, A. Fontana, E. Giallongo, F. Poli, & V. Vittorini.* 587, L63 (2003)

A Model for *SIRTF* Galaxy Counts. *Jeremy Mould.* 587, L93 (2003)

GALAXIES: INTERGALACTIC MEDIUM

Heavy-Element Abundances and Dust Depletions in the Host Galaxies of Three Gamma-Ray Bursts. *Sandra Savaglio, S. Michael Fall, & Fabrizio Fiore.* 585, 638 (2003)

The Magellanic Stream, High-Velocity Clouds, and the Sculptor Group. *Mary E. Putman, Lister Staveley-Smith, Kenneth C. Freeman, Brad K. Gibson, & David G. Barnes.* 586, 170 (2003)

Reionization of Hydrogen and Helium by Early Stars and Quasars. *J. Stuart B. Wyithe & Abraham Loeb.* 586, 693 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

GALAXIES: ISM

The Contribution of H I–rich Galaxies to the Damped Lyα Absorber Population at $z = 0$. *Jessica L. Rosenberg & Stephen E. Schneider.* 585, 256 (2003)

A Minor-Merger Interpretation for NGC 1097's "Jets." *James L. Higdon & John F. Wallin.* 585, 281 (2003)

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Time-dependent Photoionization in a Dusty Medium. II. Evolution of Dust Distributions and Optical Opacities. *Rosalba Perna, Davide Lazzati, & Fabrizio Fiore.* 585, 775 (2003)

The Host Galaxies of Optically Bright Quasi-stellar Objects: Molecular Gas in $z \leq 0.1$ Palomar-Green Quasi-stellar Objects. *N. Z. Scoville, D. T. Frayer, E. Schinnerer, & M. Christopher.* 585, L105 (2003)

A First Estimate of the Baryonic Mass Function of Galaxies. *Eric F. Bell, Daniel H. McIntosh, Neal Katz, & Martin D. Weinberg.* 585, L117 (2003)

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

Chandra X-Ray Observations of NGC 1316 (Fornax A). *Dong-Woo Kim & G. Fabbiano.* 586, 826 (2003)

CO $J = 7 \rightarrow 6$ Observations of NGC 253: Cosmic-Ray–heated Warm Molecular Gas. *C. M. Bradford, T. Nikola, G. J. Stacey, A. D. Bolatto, J. M. Jackson, M. L. Savage, J. A. Davidson, & S. J. Higdon.* 586, 891 (2003)

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

A ^{12}CO Map of M82: The Significance of Warm Molecular Gas. *John S. Ward, Jonas Zmuidzinas, Andrew I. Harris, & Kate G. Isaak.* 587, 171 (2003)

The Dust in Lyman Break Galaxies. *Uma P. Vijh, Adolph N. Witt, & Karl D. Gordon.* 587, 533 (2003)

Molecular Gas in Candidate Double-barred Galaxies. II. Cooler, Less Dense Gas Associated with Stronger Central Concentrations. *Glen R. Petitpas & Christine D. Wilson.* 587, 649 (2003)

GALAXIES: JETS

Relation between BL Lacertae Objects and Flat-Spectrum Radio Quasars. *J. H. Fan.* 585, L23 (2003)

The Nuclear Accretion in the FR I Radio Galaxy IC 4296 from *Chandra* and Very Long Baseline Array Observations. *S. Pellegrini, T. Venturi, A. Comastri, G. Fabbiano, F. Fiore, C. Vignali, R. Morganti, & G. Trinchieri.* 585, 677 (2003)

Three-dimensional Simulations of Relativistic Precessing Jets Probing the Structure of Superluminal Sources. *Miguel-Ángel Aloy, José-María Martí, José-Luís Gómez, Iván Agudo, Ewald Müller, & José-María Ibáñez.* 585, L109 (2003)

Radio/X-Ray Offsets of Large-Scale Jets Caused by Synchrotron Time Lags. *J. M. Bai & Myung Gyoon Lee.* 585, L113 (2003)

Lepton Acceleration by Relativistic Collisionless Magnetic Reconnection. *D. A. Larrabee, R. V. E. Lovelace, & M. M. Romanova.* 586, 72 (2003)

Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)

Clear Evidence for Intranight Optical Variability in Radio-quiet Quasars. *Gopal-Krishna, C. S. Stalin, Ram Sagar, & Paul J. Wiita.* 586, L25 (2003)

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

Flaring X-Ray Emission from HST-1, a Knot in the M87 Jet. *D. E. Harris, J. A. Biretta, W. Junor, E. S. Perlman, W. B. Sparks, & A. S. Wilson.* 586, L41 (2003)

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

Signatures of Hadronic Cosmic Rays in Starbursts? High-Energy Photons and Neutrinos from NGC 253. *Gustavo E. Romero & Diego F. Torres.* 586, L33 (2003)

Stellar Masses of Luminous Compact Blue Galaxies at Redshifts $z = 0.4$–1.2. *R. Guzmán, G. Östlin, D. Kunth, M. A. Bershady, D. C. Koo, & M. A. Pahre.* 586, L45 (2003)

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

CO $J = 7 \rightarrow 6$ Observations of NGC 253: Cosmic-Ray–heated Warm Molecular Gas. *C. M. Bradford, T. Nikola, G. J. Stacey, A. D. Bolatto, J. M. Jackson, M. L. Savage, J. A. Davidson, & S. J. Higdon.* 586, 891 (2003)

The Stellar Content of Henize 2-10 from Space Telescope Imaging Spectrograph Ultraviolet Spectroscopy. *Rupali Chandar, Claus Leitherer, Christy Tremonti, & Daniela Calzetti.* 586, 939 (2003)

Models for Evolution of Dusty and E/S0 Galaxies Seen in Multiband Surveys. *C. K. Xu, C. J. Lonsdale, D. L. Shupe, A. Franceschini, C. Martin, & D. Schiminovich.* 587, 90 (2003)

Very Long Baseline Array Continuum and H I Absorption Observations of the Ultraluminous Infrared Galaxy IRAS 17208−0014. *Emmanuel Momjian, Jonathan D. Romney, Christopher L. Carilli, Thomas H. Troland, & Gregory B. Taylor.* 587, 160 (2003)

A ^{12}CO Map of M82: The Significance of Warm Molecular Gas. *John S. Ward, Jonas Zmuidzinas, Andrew I. Harris, & Kate G. Isaak.* 587, 171 (2003)

Luminosity and Stellar Mass Functions of Local Star-forming Galaxies. *Pablo G. Pérez-González, Jesús Gallegeo, Jaime Zamorano, Almudena Alonso-Herrero, Armando Gil de Paz, & Alfonso Aragón-Salamanca.* 587, L27 (2003)

Molecular Gas in Candidate Double-barred Galaxies. II. Cooler, Less Dense Gas Associated with Stronger Central Concentrations. *Glen R. Petitpas & Christine D. Wilson.* 587, 649 (2003)

Candidate Tidal Dwarf Galaxies in the Compact Group CG J1720−67.8. *S. Temporin, R. Weinberger, G. Galaz, & F. Kerber.* 587, 660 (2003)

A Model for *SIRTF* Galaxy Counts. *Jeremy Mould.* 587, L93 (2003)

GALAXIES: STAR CLUSTERS

Orbital Decay and Tidal Disruption of a Star Cluster: Analytical Calculation. *Hideaki Mouri & Yoshiaki Taniguchi.* 585, 250 (2003)

Intergalactic Globular Clusters and the Faint End of the Galaxy Number Counts in A1656 (Coma). *A. Marín-Franch & A. Aparicio.* 585, 714 (2003)

Advanced Camera for Surveys Observations of Young Star Clusters in the Interacting Galaxy UGC 10214. *H. D. Tran, M. Sirianni, H. C. Ford, G. D. Illingworth, M. Clampin, G. Hartig, R. H. Becker, R. L. White, F. Bartko, N. Benítez, J. P. Blakeslee, R. Bouwens, T. J. Broadhurst, R. Brown, C. Burrows, E. Cheng, N. Cross, P. D. Feldman, M. Franx, D. A. Golimowski, C. Gronwall, L. Infante, R. A. Kimble, J. Krist, M. Lesser, D. Magee, A. R. Martel, Wm. J. McCann, G. R. Meurer, G. Miley, M. Postman, P. Rosati, W. B. Sparks, & Z. Tsvetanov.* 585, 750 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

The Stellar Content of Henize 2-10 from Space Telescope Imaging Spectrograph Ultraviolet Spectroscopy. *Rupali Chandar, Claus Leitherer, Christy Tremonti, & Daniela Calzetti.* 586, 939 (2003)

An X-Ray Investigation of the NGC 346 Field in the Small Magellanic Cloud. II. The Field Population. *Y. Nazé, J. M. Hartwell, I. R. Stevens, J. Manfroid, S. Marchenko, M. F. Corcoran, A. F. J. Moffat, & G. Skalkowski.* 586, 983 (2003)

Effects of the Dissolution of Low-Concentration Globular Clusters on the Evolution of Globular Cluster Systems. *E. Vesperini & S. E. Zepf.* 587, L97 (2003)

GALAXIES: STATISTICS

The Overdensities of Galaxy Environments as a Function of Luminosity and Color. *David W. Hogg, Michael R. Blanton, Daniel J. Eisenstein, James E. Gunn, David J. Schlegel, Idit Zehavi, Neta A. Bahcall, Jon Brinkmann, Istvan Csabai, Donald P. Schneider, David H. Weinberg, & Donald G. York.* 585, L5 (2003)

The Luminosity Function of *IRAS* Point Source Catalog Redshift Survey Galaxies. *Tsutomu T. Takeuchi, Kohji Yoshikawa, & Takako T. Ishii.* 587, L89 (2003)

GALAXIES: STELLAR CONTENT

A First Estimate of the Baryonic Mass Function of Galaxies. *Eric F. Bell, Daniel H. McIntosh, Neal Katz, & Martin D. Weinberg.* 585, L117 (2003)

The Magnesium–Velocity Dispersion Relation and the Genesis of Early-Type Galaxies. *Guy Worthey & Maela Collobert.* 586, 17 (2003)

Stellar Masses of Luminous Compact Blue Galaxies at Redshifts $z = 0.4$–1.2. *R. Guzmán, G. Östlin, D. Kunth, M. A. Bershady, D. C. Koo, & M. A. Pahre.* 586, L45 (2003)

The Stellar Content of Henize 2-10 from Space Telescope Imaging Spectrograph Ultraviolet Spectroscopy. *Rupali Chandar, Claus Leitherer, Christy Tremonti, & Daniela Calzetti.* 586, 939 (2003)

The Evolution of the Global Stellar Mass Density at $0 < z < 3$. *Mark Dickinson, Casey Papovich, Henry C. Ferguson, & Tamás Budavári.* 587, 25 (2003)

GALAXIES: STRUCTURE

The Fundamental Plane at $z = 1.27$: First Calibration of the Mass Scale of Red Galaxies at Redshifts $z > 1$. *Pieter G. van Dokkum & S. A. Stanford.* 585, 78 (2003)

Dark Matter within High Surface Brightness Spiral Galaxies. *Thilo Kranz, Adrianne Slyz, & Hans-Walter Rix.* 586, 143 (2003)

Ultraviolet-Optical Pixel Maps of Face-on Spiral Galaxies: Clues for Dynamics and Star Formation Histories. *Paul B. Eskridge, Jay A. Frogel, Violet A. Taylor, Rogier A. Windhorst, Stephen C. Odewahn, Claudia A. T. C. Chiarenza, Christopher J. Conselice, Richard de Grijs, Lynn D. Matthews, Robert W. O'Connell, & John S. Gallagher III.* 586, 923 (2003)

Investigation of the Possible Third Image and Mass Models of the Gravitational Lens PMN J1632−0033. *Joshua N. Winn, David Rusin, & Christopher S. Kochanek.* 587, 80 (2003)

H I Absorption toward Ultracompact H II Regions: Distances and Galactic Structure. *Vincent L. Fish, Mark J. Reid, David J. Wilner, & Ed Churchwell.* 587, 701 (2003)

GALAXIES: THE GALAXY

A New Method of Estimating the Mass-to-Light Ratio of the Ursa Minor Dwarf Spheroidal Galaxy. *M. Ángeles Gómez-Flechoso & D. Martínez-Delgado.* 586, L123 (2003)

GALAXY: ABUNDANCES

A *Far Ultraviolet Spectroscopic Explorer* Survey of Molecular Hydrogen in Intermediate-Velocity Clouds in the Milky Way Halo. *Philipp Richter, Bart P. Wakker, Blair D. Savage, & Kenneth R. Sembach.* 586, 230 (2003)

GALAXY: CENTER

Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)

Variability of Sagittarius A*: Flares at 1 Millimeter. *Jun-Hui Zhao, K. H. Young, R. M. Herrnstein, P. T. P. Ho, T. Tsutsumi, K. Y. Lo, W. M. Goss, & G. C. Bower.* 586, L29 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

The Position of Sagittarius A*. II. Accurate Positions and Proper Motions of Stellar SiO Masers near the Galactic Center. *M. J. Reid, K. M. Menten, R. Genzel, T. Ott, R. Schödel, & A. Eckart.* 587, 208 (2003)

Strong Gravitational Lensing and Galactic Bulges. *Da-Ming Chen.* 587, L55 (2003)

GALAXY: DISK

H I Absorption toward Ultracompact H II Regions: Distances and Galactic Structure. *Vincent L. Fish, Mark J. Reid, David J. Wilner, & Ed Churchwell.* 587, 701 (2003)

Resolution of Distance Ambiguities of Inner Galaxy Massive Star Formation Regions. II. *C. Watson, E. Araya, M. Sewilo, E. Churchwell, P. Hofner, & S. Kurtz.* 587, 714 (2003)

GALAXY: EVOLUTION

On the Baryometric Status of ^{3}He. *Elisabeth Vangioni-Flam, Keith A. Olive, Brian D. Fields, & Michel Cassé.* 585, 611 (2003)

Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

Galactic Halo Stars in Phase Space: A Hint of Satellite Accretion? *Chris B. Brook, Daisuke Kawata, Brad K. Gibson, & Chris Flynn.* 585, L125 (2003)

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

GALAXY: FORMATION

Galactic Halo Stars in Phase Space: A Hint of Satellite Accretion? *Chris B. Brook, Daisuke Kawata, Brad K. Gibson, & Chris Flynn.* 585, L125 (2003)

A New Method of Estimating the Mass-to-Light Ratio of the Ursa Minor Dwarf Spheroidal Galaxy. *M. Ángeles Gómez-Flechoso & D. Martínez-Delgado.* 586, L123 (2003)

GALAXY: GENERAL

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivezić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)

GALAXY: GLOBULAR CLUSTERS: GENERAL

Evidence for an Intermediate-Age, Metal-rich Population of Globular Clusters in NGC 4365. *Søren S. Larsen, Jean P. Brodie, Michael A.*

Beasley, Duncan A. Forbes, Markus Kissler-Patig, Harald Kuntschner, & Thomas H. Puzia. 585, 767 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

Effects of the Dissolution of Low-Concentration Globular Clusters on the Evolution of Globular Cluster Systems. *E. Vesperini & S. E. Zepf.* 587, L97 (2003)

GALAXY: GLOBULAR CLUSTERS: INDIVIDUAL

Messier Number: M4

Carbon Isotopes in Globular Clusters Down to the Bump in the Luminosity Function. *Matthew D. Shetrone.* 585, L45 (2003)

Messier Number: M15

A Stringent Limit on the Accretion Luminosity of the Possible Central Black Hole in the Globular Cluster M15. *Luis C. Ho, Yuichi Terashima, & Takashi Okajima.* 587, L35 (2003)

NGC Number: NGC 6397

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

NGC Number: NGC 6528

Carbon Isotopes in Globular Clusters Down to the Bump in the Luminosity Function. *Matthew D. Shetrone.* 585, L45 (2003)

NGC Number: NGC 6553

Carbon Isotopes in Globular Clusters Down to the Bump in the Luminosity Function. *Matthew D. Shetrone.* 585, L45 (2003)

Name: 47 Tucanae

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

GALAXY: HALO

A Survey of *Far Ultraviolet Spectroscopic Explorer* and *Hubble Space Telescope* Sight Lines through High-Velocity Cloud Complex C. *Joseph A. Collins, J. Michael Shull, & Mark L. Giroux.* 585, 336 (2003)

Galactic Halo Stars in Phase Space: A Hint of Satellite Accretion? *Chris B. Brook, Daisuke Kawata, Brad K. Gibson, & Chris Flynn.* 585, L125 (2003)

The Failure of Self-Interacting Dark Matter to Solve the Overabundance of Dark Satellites and the Soft Core Question. *Elena D'Onghia & Andreas Burkert.* 586, 12 (2003)

The Magellanic Stream, High-Velocity Clouds, and the Sculptor Group. *Mary E. Putman, Lister Staveley-Smith, Kenneth C. Freeman, Brad K. Gibson, & David G. Barnes.* 586, 170 (2003)

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivesić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

A Critical Examination of Halo White Dwarf Candidates. *P. Bergeron.* 586, 201 (2003)

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

Highly Ionized Gas in the Galactic Halo: A *FUSE* Survey of O VI Absorption toward 22 Halo Stars. *J. Zsargó, K. R. Sembach, J. C. Howk, & B. D. Savage.* 586, 1019 (2003)

A New Method of Estimating the Mass-to-Light Ratio of the Ursa Minor Dwarf Spheroidal Galaxy. *M. Ángeles Gómez-Flechoso & D. Martínez-Delgado.* 586, L123 (2003)

GALAXY: KINEMATICS AND DYNAMICS

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: GENERAL

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

GALAXY: OPEN CLUSTERS AND ASSOCIATIONS: INDIVIDUAL

Name: TW Hydrae

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

Name: ρ Ophiuchi Dark Cloud

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Name: β Pictoris Moving Group

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

Name: Tucana

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

GALAXY: SOLAR NEIGHBORHOOD

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Spectroscopic Identification of White Dwarfs in the New Luyten Two-Tenths Survey. *Stéphane Vennes & Adela Kawka.* 586, L95 (2003)

GALAXY: STELLAR CONTENT

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

Discovery of an Ultracool Subdwarf: LSR 1425+7102, the First Star with Spectral Type sdM8.0. *Sébastien Lépine, Michael M. Shara, & R. Michael Rich.* 585, L69 (2003)

The Galactic Disk Mass Function: Reconciliation of the *Hubble Space Telescope* and Nearby Determinations. *Gilles Chabrier.* 586, L133 (2003)

GALAXY: STRUCTURE

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivesić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

Highly Ionized Gas in the Galactic Halo: A *FUSE* Survey of O VI Absorption toward 22 Halo Stars. *J. Zsargó, K. R. Sembach, J. C. Howk, & B. D. Savage.* 586, 1019 (2003)

A New Method of Estimating the Mass-to-Light Ratio of the Ursa Minor Dwarf Spheroidal Galaxy. *M. Ángeles Gómez-Flechoso & D. Martínez-Delgado.* 586, L123 (2003)

GAMMA RAYS: BURSTS

The Sources of Gamma-Ray Bursts and Their Connections with QSOs and Active Galaxies. *G. R. Burbidge.* 585, 112 (2003)

Is the Afterglow of Gamma-Ray Burst GRB 021004 Unusual? *Shlomo Dado, Arnon Dar, & A. De Rújula.* 585, L15 (2003)

Neutron-fed Afterglows of Gamma-Ray Bursts. *Andrei M. Beloborodov.* 585, L19 (2003)

Heavy-Element Abundances and Dust Depletions in the Host Galaxies of Three Gamma-Ray Bursts. *Sandra Savaglio, S. Michael Fall, & Fabrizio Fiore.* 585, 638 (2003)

High-Energy Emission from the Prompt Gamma-Ray Burst. *Dafne Guetta & Jonathan Granot.* 585, 885 (2003)

On the X-Ray Lines in the Afterglows of Gamma-Ray Bursts. *Shlomo Dado, Arnon Dar, & A. De Rújula.* 585, 890 (2003)

Continued Radio Monitoring of the Gamma-Ray Burst 991208. *T. J. Galama, D. A. Frail, R. Sari, E. Berger, G. B. Taylor, & S. R. Kulkarni.* 585, 899 (2003)

Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)

Keck Spectroscopy and *Hubble Space Telescope* Imaging of GRB 000926: Probing a Host Galaxy at $z = 2.038$. *S. Castro, T. J. Galama, F. A. Harrison, J. A. Holtzman, J. S. Bloom, S. G. Djorgovski, & S. R. Kulkarni.* 586, 128 (2003)

Relativistic Jets in Collapsars. *Weiqun Zhang, S. E. Woosley, & A. I. MacFadyen.* 586, 356 (2003)

Discovery of Early Optical Emission from GRB 021211. *D. W. Fox, P. A. Price, A. M. Soderberg, E. Berger, S. R. Kulkarni, R. Sari, D. A. Frail, F. A. Harrison, S. A. Yost, K. Matthews, B. A. Peterson, I. Tanaka, J. Christiansen, & G. H. Moriarty-Schieven.* 586, L5 (2003)

The Early Light Curve of the Optical Afterglow of GRB 021211. *Weidong Li, Alexei V. Filippenko, Ryan Chornock, & Saurabh Jha.* 586, L9 (2003)

Broadband Modeling of GRB 021004. *Jeremy S. Heyl & Rosalba Perna.* 586, L13 (2003)

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

Gamma-Ray Bursts from Delayed Collapse of Neutron Stars to Quark Matter Stars. *Z. Berezhiani, I. Bombaci, A. Drago, F. Frontera, & A. Lavagno.* 586, 1250 (2003)

Nucleosynthesis in Gamma-Ray Burst Accretion Disks. *Jason Pruet, S. E. Woosley, & R. D. Hoffman.* 586, 1254 (2003)

High-Resolution Grating Spectroscopy of GRB 020405 with the *Chandra* Low Energy Transmission Grating Spectrometer. *N. Mirabal, F. Paerels, & J. P. Halpern.* 587, 128 (2003)

Hubble Space Telescope and Ground-based Optical and Ultraviolet Observations of GRB 010222. *T. J. Galama, D. Reichart, T. M. Brown, R. A. Kimble, P .A. Price, E. Berger, D. A. Frail, S. R. Kulkarni, S. A. Yost, A. Gal-Yam, J. S. Bloom, F. A. Harrison, R. Sari, D. Fox, & S. G. Djorgovski.* 587, 135 (2003)

A Radio Flare from GRB 020405: Evidence for a Uniform Medium around a Massive Stellar Progenitor. *E. Berger, A. M. Soderberg, D. A. Frail, & S. R. Kulkarni.* 587, L5 (2003)

GAMMA RAYS: OBSERVATIONS

Signatures of Hadronic Cosmic Rays in Starbursts? High-Energy Photons and Neutrinos from NGC 253. *Gustavo E. Romero & Diego F. Torres.* 586, L33 (2003)

A Search for Correlations of TeV Gamma Rays with Ultra–High-Energy Cosmic Rays. *C. W. Akerlof, S. Biller, P. Boyle, J. Buckley, D. A. Carter-Lewis, M. Catanese, M. F. Cawley, V. Connaughton, D. J. Fegan, J. Finley, J. Gaidos, A. M. Hillas, F. Krennrich, R. C. Lamb, R. Lessard, J. McEnery, G. Mohanty, N. A. Porter, J. Quinn, A. Rodgers, H. J. Rose, F. Samuelson, M. S. Schubnell, G. Sembroski, R. Srinivasan, T. C. Weekes, & J. Zweerink.* 586, 1232 (2003)

GAMMA RAYS: THEORY

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)

Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)

Signatures of Hadronic Cosmic Rays in Starbursts? High-Energy Photons and Neutrinos from NGC 253. *Gustavo E. Romero & Diego F. Torres.* 586, L33 (2003)

GRAVITATION

Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

Black Hole Mass and Spin Coevolution by Mergers. *Scott A. Hughes & Roger D. Blandford.* 585, L101 (2003)

The Critical Rotation of Strange Stars and Rapidly Rotating Pulsars. *Xiaoping Zheng, Shuhua Yang, & Jiarong Li.* 585, L135 (2003)

Stability of Accretion Disk around Rotating Black Holes: A Pseudo–General-Relativistic Fluid Dynamical Study. *Banibrata Mukhopadhyay.* 586, 1268 (2003)

The Lack of Observational Evidence for the Quantum Structure of Spacetime at Planck Scales. *Roberto Ragazzoni, Massimo Turatto, & Wolfgang Gaessler.* 587, L1 (2003)

GRAVITATIONAL LENSING

Corrective Lenses for High-Redshift Supernovae. *Neal Dalal, Daniel E. Holz, Xuelei Chen, & Joshua A. Frieman.* 585, L11 (2003)

A Brown Dwarf Microlens Candidate from the Second Phase of the Optical Gravitational Lensing Experiment. *Martin C. Smith, Shude Mao, & Przemysław Woźniak.* 585, L65 (2003)

Angular Radii of Stars via Microlensing. *B. Scott Gaudi, David S. Graff, & Cheongho Han.* 586, 451 (2003)

Probing Structures of Distant Extrasolar Planets with Microlensing. *B. Scott Gaudi, Heon-Young Chang, & Cheongho Han.* 586, 527 (2003)

Determining Tangential Peculiar Velocities of Clusters of Galaxies Using Gravitational Lensing. *Sandor M. Molnar & Mark Birkinshaw.* 586, 731 (2003)

Cluster-Cluster Microlensing as a Probe of Intracluster Stars, MACHOs, and Remnants of the First-Generation Stars. *Tomonori Totani.* 586, 735 (2003)

Around-the-Clock Observations of the Q9057+561A,B Gravitationally Lensed Quasar. II. Results for the Second Observing Season. *Wesley N. Colley, Rudolph E. Schild, Cristina Abajas, David Alcalde, Zeki Aslan, Ilfan Bikmaev, Vahram Chavushyan, Luis Chinarro, Jean-Philippe Cournoyer, Richard Crowe, Vladimir Dudinov, Anna Kathinka Dalland Evans, Young-Beom Jeon, Luis J. Goicoechea, Orhan Golbasi, Irek Khamitov, Kjetil Kjernsmo, Hyun Ju Lee, Jonghwan Lee, Ki Won Lee, Myung Gyoon Lee, Omar Lopez-Cruz, Evenvio Mediavilla, Anthony F. J. Moffat, Raul Mujica, Aurora Ullan, José Muñoz, Alexander Oscoz, Myeong-Gu Park, Norman Purves, Oyvind Saanum, Nail Sakhibullin, Miquel Serra-Ricart, Igor Sinelnikov, Rolf Stabell, Alan Stockton, Jan Teuber, Roy Thompson, Hwa-Sung Woo, & Alexander Zheleznyak.* 587, 71 (2003)

Investigation of the Possible Third Image and Mass Models of the Gravitational Lens PMN J1632−0033. *Joshua N. Winn, David Rusin, & Christopher S. Kochanek.* 587, 80 (2003)

The Evolution of a Mass-selected Sample of Early-Type Field Galaxies. *D. Rusin, C. S. Kochanek, E. E. Falco, C. R. Keeton, B. A. McLeod, C. D. Impey, J. Lehár, J. A. Muñoz, C. Y. Peng, & H.-W. Rix.* 587, 143 (2003)

Strong Gravitational Lensing and Galactic Bulges. *Da-Ming Chen.* 587, L55 (2003)

GRAVITATIONAL WAVES

Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)

Detectability of Gravitational Waves from SN 1987A. *Giovanni Santostasi, Warren Johnson, & Juhan Frank.* 586, 1191 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

HYDRODYNAMICS

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

The Formation of Massive Stars from Turbulent Cores. *Christopher F. McKee & Jonathan C. Tan.* 585, 850 (2003)

Three-dimensional Simulations of Relativistic Precessing Jets Probing the Structure of Superluminal Sources. *Miguel-Ángel Aloy, José-María Martí, José-Luís Gómez, Iván Agudo, Ewald Müller, & José-María Ibáñez.* 585, L109 (2003)

Relativistic Jets in Collapsars. *Weiqun Zhang, S. E. Woosley, & A. I. MacFadyen.* 586, 356 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

Orbital Migration and Mass Accretion of Protoplanets in Three-dimensional Global Computations with Nested Grids. *Gennaro D'Angelo, Willy Kley, & Thomas Henning.* 586, 540 (2003)

Stability of Accretion Disk around Rotating Black Holes: A Pseudo–General-Relativistic Fluid Dynamical Study. *Banibrata Mukhopadhyay.* 586, 1268 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

Saturation of the Corotation Resonance in a Gaseous Disk. *G. I. Ogilvie & S. H. Lubow.* 587, 398 (2003)

Transition Region and Coronal Explorer and Soft X-Ray Telescope Active Region Loop Observations: Comparisons with Static Solutions of the Hydrodynamic Equations. *Amy R. Winebarger, Harry P. Warren, & John T. Mariska.* 587, 439 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. I. Analytical Approach. *Sylvie Vauclair & Sylvie Théado.* 587, 777 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

INFRARED: GALAXIES

The Infrared Counterparts of the Optically Unidentified Chandra Deep Field–South 1 Ms Sources. *Haojing Yan, Rogier A. Windhorst, Huub J. A. Röttgering, Seth H. Cohen, Stephen C. Odewahn, Scott C. Chapman, & William C. Keel.* 585, 67 (2003)

Massive Elliptical Galaxies at High Redshift: NICMOS Imaging of $z \approx 1$ Radio Galaxies. *Andrew W. Zirm, Mark Dickinson, & Arjun Dey.* 585, 90 (2003)

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

Predictions for Cosmological Infrared Surveys from Space with the Multiband Imaging Photometer for *SIRTF*. *H. Dole, G. Lagache, & J.-L. Puget.* 585, 617 (2003)

Predictions for the Counts of Faint, High-Redshift Galaxies in the Mid-Infrared. *Zoltán Haiman, David N. Spergel, & Edwin L. Turner.* 585, 630 (2003)

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

Azimuthal and Kinematic Segregation of Neutral and Molecular Gas in Arp 118: The Yin-Yang Galaxy NGC 1144. *P. N. Appleton, V. Charmandaris, Yu Gao, Tom Jarrett, & M. A. Bransford.* 586, 112 (2003)

The Las Campanas Infrared Survey. IV. The Photometric Redshift Survey and the Rest-Frame *R*-Band Galaxy Luminosity Function at $0.5 \leq z \leq 1.5$. *Hsiao-Wen Chen, Ronald O. Marzke, Patrick J. McCarthy, P. Martini, R. G. Carlberg, S. E. Persson, A. Bunker, C. R. Bridge, & R. G. Abraham.* 586, 745 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

The Evolution of the Global Stellar Mass Density at $0 < z < 3$. *Mark Dickinson, Casey Papovich, Henry C. Ferguson, & Tamás Budavári.* 587, 25 (2003)

Models for Evolution of Dusty and E/S0 Galaxies Seen in Multiband Surveys. *C. K. Xu, C. J. Lonsdale, D. L. Shupe, A. Franceschini, C. Martin, & D. Schiminovich.* 587, 90 (2003)

Resolved Mid-Infrared Emission in the Narrow-Line Region of NGC 4151. *James T. Radomski, Robert K. Piña, Christopher Packham, Charles M. Telesco, James M. De Buizer, R. Scott Fisher, & A. Robinson.* 587, 117 (2003)

Luminosity and Stellar Mass Functions of Local Star-forming Galaxies. *Pablo G. Pérez-González, Jesús Gallegeo, Jaime Zamorano, Almudena Alonso-Herrero, Armando Gil de Paz, & Alfonso Aragón-Salamanca.* 587, L27 (2003)

The Luminosity Function of *IRAS* Point Source Catalog Redshift Survey Galaxies. *Tsutomu T. Takeuchi, Kohji Yoshikawa, & Takako T. Ishii.* 587, L89 (2003)

A Model for *SIRTF* Galaxy Counts. *Jeremy Mould.* 587, L93 (2003)

INFRARED: ISM

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Detection of Far-Infrared Features in Star-forming Regions. *Takashi Onaka & Yoko Okada.* 585, 872 (2003)

Dust in Hot Gas: Far-Infrared Emission from Three Local Elliptical Galaxies. *Pasquale Temi, William G. Mathews, Fabrizio Brighenti, & Jesse D. Bregman.* 585, L121 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

INFRARED: STARS

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

A Survey for Circumstellar Disks around Young Substellar Objects. *Michael C. Liu, Joan Najita, & Alan T. Tokunaga.* 585, 372 (2003)

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Hubble Space Telescope/NICMOS Near-Infrared Imaging of the Proto–Planetary Nebula OH 231.8+4.2. *C. A. Meakin, J. H. Bieging, W. B. Latter, J. L. Hora, & A. G. G. M. Tielens.* 585, 482 (2003)

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Mid-Infrared Imaging of the First-Ascent Giant HD 233517. *R. Scott Fisher, C. M. Telesco, Robert K. Piña, & Roger F. Knacke.* 586, L91 (2003)

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

2-Dust: A Dust Radiative Transfer Code for an Axisymmetric System. *Toshiya Ueta & Margaret Meixner.* 586, 1338 (2003)

Cool Companions to White Dwarfs from the Two Micron All-Sky Survey Second Incremental Data Release. *Stefanie Wachter, D. W. Hoard, Kathryn H. Hansen, Rebecca E. Wilcox, Hilda M. Taylor, & Steven L. Finkelstein.* 586, 1356 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

INSTABILITIES

Nonaxisymmetric Instabilities of a Toroidal Magnetic Field in a Rotating Sphere. *Keke Zhang, Xinhao Liao, & Gerald Schubert.* 585, 1124 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

r-Modes of Neutron Stars with Superfluid Cores. *Umin Lee & Shijun Yoshida.* 586, 403 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

INSTRUMENTATION: ADAPTIVE OPTICS

ι Cassiopeiae: Orbit, Masses, and Photometry from Adaptive Optics Imaging in the *I* and *H* Bands. *Jack Drummond, Scott Milster, Patrick Ryan, & Lewis C. Roberts, Jr.* 585, 1007 (2003)

Detection of Nine M8.0–L0.5 Binaries: The Very Loss Mass Binary Population and Its Implications for Brown Dwarf and Very Low Mass Star Formation. *Laird M. Close, Nick Siegler, Melanie Freed, & Beth Biller.* 587, 407 (2003)

INSTRUMENTATION: HIGH ANGULAR RESOLUTION

Ground-based Near-Infrared Imaging of the HD 141569 Circumstellar Disk. *A. Boccaletti, J.-C. Augereau, F. Marchis, & J. Hahn.* 585, 494 (2003)

INSTRUMENTATION: SPECTROGRAPHS

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

SPINR—a Wide-Field Ultraviolet Spectral Imaging System. *T. A. Cook, V. J. Gsell, J. Golub, & S. Chakrabarti.* 585, 1177 (2003)

INTERGALACTIC MEDIUM

Toward a Measurement of the Cosmological Geometry at $z \sim 2$: Predicting Lyα Forest Correlation in Three Dimensions and the Potential of Future Data Sets. *Patrick McDonald.* 585, 34 (2003)

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

Chandra Observations of A2029: The Dark Matter Profile Down to below $0.01r_{\rm vir}$ in an Unusually Relaxed Cluster. *Aaron D. Lewis, David A. Buote, & John T. Stocke.* 586, 135 (2003)

Chandra Temperature Map of A754 and Constraints on Thermal Conduction. *M. Markevitch, P. Mazzotta, A. Vikhlinin, D. Burke, Y. Butt, L. David, H. Donnelly, W. R. Forman, D. Harris, D.-W. Kim, S. Virani, & J. Vrtilek.* 586, L19 (2003)

Chandra Detection of Local O II Heα Absorption along the Sight Line toward 3C 273. *Taotao Fang, Kenneth R. Sembach, & Claude R. Canizares.* 586, L49 (2003)

INTERPLANETARY MEDIUM

Heliocentric Dependence of the Sodium Emission of Comet 153P/Ikeya-Zhang. *Jun-ichi Watanabe, Hideyo Kawakita, Reiko Furusho, & Mitsugu Fujii.* 585, L159 (2003)

WIND Observations of Anomalous Cosmic Rays from Solar Minimum to Maximum. *D. V. Reames & F. B. McDonald.* 586, L99 (2003)

The Solar Wind and Its Magnetic Sources at Sunspot Maximum. *Y.-M. Wang & N. R. Sheeley, Jr.* 587, 818 (2003)

ISM: ABUNDANCES

A Survey of *Far Ultraviolet Spectroscopic Explorer* and *Hubble Space Telescope* Sight Lines through High-Velocity Cloud Complex C. *Joseph A. Collins, J. Michael Shull, & Mark L. Giroux.* 585, 336 (2003)

Chemical Evolution in Protostellar Envelopes: Cocoon Chemistry. *S. D. Rodgers & S. B. Charnley.* 585, 355 (2003)

CO Depletion and Deuterium Fractionation in Prestellar Cores. *A. Bacmann, B. Lefloch, C. Ceccarelli, J. Steinacker, A. Castets, & L. Loinard.* 585, L55 (2003)

Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Molecular Hydrogen in Intermediate-Velocity Clouds in the Milky Way Halo. *Philipp Richter, Bart P. Wakker, Blair D. Savage, & Kenneth R. Sembach.* 586, 230 (2003)

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Deuterium toward Two Milky Way Disk Stars: Probing Extended Sight Lines with the *Far Ultraviolet Spectroscopic Explorer*. *Charles G. Hoopes, Kenneth R. Sembach, Guillaume Hébrard, H. Warren Moos, & David C. Knauth.* 586, 1094 (2003)

CH, CO, and $E(B-V)$ as Molecular Gas Tracers in a Translucent Cloud. *Loris Magnani, Raymond J. Chastain, Hyekyung Clarisse Kim, Dap Hartmann, Anthony T. Truong, & Patrick Thaddeus.* 586, 1111 (2003)

On the Variation of Deuterium and Oxygen Abundances in the Local Interstellar Medium. *Gary Steigman.* 586, 1120 (2003)

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

ISM: ATOMS

Fitting Together the H I Absorption and Emission in the Southern Galactic Plane Survey. *John M. Dickey, N. M. McClure-Griffiths, B. M. Gaensler, & A. J. Green.* 585, 801 (2003)

H I Narrow Self-Absorption in Dark Clouds. *D. Li & P. F. Goldsmith.* 585, 823 (2003)

Intensities of E2 Spectral Lines in the Astrophysically Important Ion Mg II. *E. Charro & I. Martín.* 585, 1191 (2003)

Structure of the H I near the Northeast Limb of the Cygnus Loop. *D. A. Leahy.* 586, 224 (2003)

Ionized Gas in the First 10 Kiloparsecs of the Interstellar Galactic Halo. *J. Christopher Howk, Kenneth R. Sembach, & Blair D. Savage.* 586, 249 (2003)

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

The Millennium Arecibo 21 Centimeter Absorption-Line Survey. II. Properties of the Warm and Cold Neutral Media. *Carl Heiles & T. H. Troland.* 586, 1067 (2003)

ISM: BUBBLES

High-Latitude H I in NGC 2613: Buoyant Disk-Halo Outflow. *Judith A. Irwin & Tara Chaves.* 585, 268 (2003)

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

ISM: CLOUDS

OH (1720 MHz) Masers and Mixed-Morphology Supernova Remnants. *F. Yusef-Zadeh, M. Wardle, J. Rho, & M. Sakano.* 585, 319 (2003)

A Survey of *Far Ultraviolet Spectroscopic Explorer* and *Hubble Space Telescope* Sight Lines through High-Velocity Cloud Complex C. *Joseph A. Collins, J. Michael Shull, & Mark L. Giroux.* 585, 336 (2003)

Chemical Evolution in Protostellar Envelopes: Cocoon Chemistry. *S. D. Rodgers & S. B. Charnley.* 585, 355 (2003)

Fitting Together the H I Absorption and Emission in the Southern Galactic Plane Survey. *John M. Dickey, N. M. McClure-Griffiths, B. M. Gaensler, & A. J. Green.* 585, 801 (2003)

H I Narrow Self-Absorption in Dark Clouds. *D. Li & P. F. Goldsmith.* 585, 823 (2003)

The Formation of Massive Stars from Turbulent Cores. *Christopher F. McKee & Jonathan C. Tan.* 585, 850 (2003)

A Holistic Scenario of Turbulent Molecular Cloud Evolution and Control of the Star Formation Efficiency: First Tests. *E. Vázquez-Semadeni, J. Ballesteros-Paredes, & R. S. Klessen.* 585, L131 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Molecular Hydrogen in Intermediate-Velocity Clouds in the Milky Way Halo. *Philipp Richter, Bart P. Wakker, Blair D. Savage, & Kenneth R. Sembach.* 586, 230 (2003)

The Dynamical State of Barnard 68: A Thermally Supported, Pulsating Dark Cloud. *Charles J. Lada, Edwin A. Bergin, João F. Alves, & Tracy L. Huard.* 586, 286 (2003)

Chandra Detection of Local O II Heα Absorption along the Sight Line toward 3C 273. *Taotao Fang, Kenneth R. Sembach, & Claude R. Canizares.* 586, L49 (2003)

CH, CO, and $E(B-V)$ as Molecular Gas Tracers in a Translucent Cloud. *Loris Magnani, Raymond J. Chastain, Hyekyung Clarisse Kim, Dap Hartmann, Anthony T. Truong, & Patrick Thaddeus.* 586, 1111 (2003)

Interactions between a Bright Young Stellar Object and the *Micourse Space Experiment* Infrared-dark Cloud G79.3+0.3: An Early Stage of Triggered Star Formation? *R. O. Redman, P. A. Feldman, F. Wyrowski, S. Côté, S. J. Carey, & M. P. Egan.* 586, 1127 (2003)

Massive Quiescent Cores in Orion. I. Temperature Structure. *D. Li, P. F. Goldsmith, & K. Menten.* 587, 262 (2003)

Neutral Atomic Phases of the Interstellar Medium in the Galaxy. *Mark G. Wolfire, Christopher F. McKee, David Hollenbach, & A. G. G. M. Tielens.* 587, 278 (2003)

ISM: COSMIC RAYS

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

Ozone Depletion from Nearby Supernovae. *Neil Gehrels, Claude M. Laird, Charles H. Jackman, John K. Cannizzo, Barbara J. Mattson, & Wan Chen.* 585, 1169 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)

Small-Scale Clustering in Isotropic Arrival Distribution of Ultra–High-Energy Cosmic Rays and Implications for Their Source Candidates. *Hiroyuki Yoshiguchi, Shigehiro Nagataki, Sin-ya Tsubaki, & Katsuhiko Sato.* 586, 1211 (2003)

A Search for Correlations of TeV Gamma Rays with Ultra–High-Energy Cosmic Rays. *C. W. Akerlof, S. Biller, P. Boyle, J. Buckley, D. A. Carter-Lewis, M. Catanese, M. F. Cawley, V. Connaughton, D. J. Fegan, J. Finley, J. Gaidos, A. M. Hillas, F. Krennrich, R. C. Lamb, R. Lessard, J. McEnery, G. Mohanty, N. A. Porter, J. Quinn, A. Rodgers, H. J. Rose,*

F. Samuelson, M. S. Schubnell, G. Sembroski, R. Srinivasan, T. C. Weekes, & J. Zweerink. 586, 1232 (2003)

Cosmic-Ray History and Its Implications for Galactic Magnetic Fields. *Ellen G. Zweibel.* 587, 625 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

ISM: DUST, EXTINCTION

An Empirical Decomposition of Near-Infrared Emission into Galactic and Extragalactic Components. *Richard G. Arendt & Eli Dwek.* 585, 305 (2003)

Heavy-Element Abundances and Dust Depletions in the Host Galaxies of Three Gamma-Ray Bursts. *Sandra Savaglio, S. Michael Fall, & Fabrizio Fiore.* 585, 638 (2003)

Time-dependent Photoionization in a Dusty Medium. II. Evolution of Dust Distributions and Optical Opacities. *Rosalba Perna, Davide Lazzati, & Fabrizio Fiore.* 585, 775 (2003)

Detection of Far-Infrared Features in Star-forming Regions. *Takashi Onaka & Yoko Okada.* 585, 872 (2003)

Explaining the Observed Polarization from Brown Dwarfs by Single Dust Scattering. *Sujan Sengupta.* 585, L155 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

Interactions between a Bright Young Stellar Object and the *Micourse Space Experiment* Infrared-dark Cloud G79.3+0.3: An Early Stage of Triggered Star Formation? *R. O. Redman, P. A. Feldman, F. Wyrowski, S. Côté, S. J. Carey, & M. P. Egan.* 586, 1127 (2003)

2-DUST: A Dust Radiative Transfer Code for an Axisymmetric System. *Toshiya Ueta & Margaret Meixner.* 586, 1338 (2003)

The Dust in Lyman Break Galaxies. *Uma P. Vijh, Adolph N. Witt, & Karl D. Gordon.* 587, 533 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

Are TiC Grains a Carrier of the 21 Micron Emission Band Observed around Post–Asymptotic Giant Branch Objects? *Takeshi Chigai, Tetsuo Yamamoto, Chihiro Kaito, & Yuki Kimura.* 587, 771 (2003)

Evidence for Grain Growth in the Protostellar Disks of Orion. *R. Y. Shuping, John Bally, Mark Morris, & Henry Throop.* 587, L109 (2003)

ISM: EVOLUTION

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

The Dust in Lyman Break Galaxies. *Uma P. Vijh, Adolph N. Witt, & Karl D. Gordon.* 587, 533 (2003)

ISM: GENERAL

OH (1720 MHz) Masers and Mixed-Morphology Supernova Remnants. *F. Yusef-Zadeh, M. Wardle, J. Rho, & M. Sakano.* 585, 319 (2003)

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)

Neutral Atomic Phases of the Interstellar Medium in the Galaxy. *Mark G. Wolfire, Christopher F. McKee, David Hollenbach, & A. G. G. M. Tielens.* 587, 278 (2003)

ISM: GLOBULES

The Dynamical State of Barnard 68: A Thermally Supported, Pulsating Dark Cloud. *Charles J. Lada, Edwin A. Bergin, João F. Alves, & Tracy L. Huard.* 586, 286 (2003)

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

ISM: H II REGIONS

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)

An X-Ray Investigation of the NGC 346 Field in the Small Magellanic Cloud. II. The Field Population. *Y. Nazé, J. M. Hartwell, I. R. Stevens, J. Manfroid, S. Marchenko, M. F. Corcoran, A. F. J. Moffat, & G. Skalkowski.* 586, 983 (2003)

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

H I Absorption toward Ultracompact H II Regions: Distances and Galactic Structure. *Vincent L. Fish, Mark J. Reid, David J. Wilner, & Ed Churchwell.* 587, 701 (2003)

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

ISM: INDIVIDUAL

Name: Carina Nebula

Detection of Far-Infrared Features in Star-forming Regions. *Takashi Onaka & Yoko Okada.* 585, 872 (2003)

Name: Cassiopeia A

The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)

Name: Cepheus A

Expansion of the R4 H_2O Maser Arc near Cepheus A HW2. *J. F. Gallimore, R. J. Cool, M. D. Thornley, & J. McMullin.* 586, 306 (2003)

Name: Cygnus Loop

Structure of the H I near the Northeast Limb of the Cygnus Loop. *D. A. Leahy.* 586, 224 (2003)

Name: Local Interstellar Medium

Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

Name: Orion

Massive Quiescent Cores in Orion. I. Temperature Structure. *D. Li, P. F. Goldsmith, & K. Menten.* 587, 262 (2003)

Name: Perseus OB2

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Name: Scorpius OB2

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Name: Sharpless 171

Detection of Far-Infrared Features in Star-forming Regions. *Takashi Onaka & Yoko Okada.* 585, 872 (2003)

NGC Number: NGC 346

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

NGC Number: NGC 3372

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

Alphanumeric: IRAS 16547−4247

A Triple Radio Continuum Source Associated with IRAS 16547−4247: A Collimated Stellar Wind Emanating from a Massive Protostar. *Guido Garay, Kate J. Brooks, Diego Mardones, & Ray P. Norris.* 587, 739 (2003)

Alphanumeric: L1448

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Alphanumeric: L1448 IRS 3

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Alphanumeric: N49

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

Alphanumeric: N66

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

Alphanumeric: SN 1006

The SN 1006 Remnant: Optical Proper Motions, Deep Imaging, Distance, and Brightness at Maximum. *P. Frank Winkler, Gaurav Gupta, & Knox S. Long.* 585, 324 (2003)

Chandra CCD Imagery of the Northeast and Northwest Limbs of SN 1006. *Knox S. Long, Stephen P. Reynolds, John C. Raymond, P. Frank Winkler, Kristy K. Dyer, & Robert Petre.* 586, 1162 (2003)

Alphanumeric: SNR 0057−7226

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

Alphanumeric: SNR G327.6+14.6

The SN 1006 Remnant: Optical Proper Motions, Deep Imaging, Distance, and Brightness at Maximum. *P. Frank Winkler, Gaurav Gupta, & Knox S. Long.* 585, 324 (2003)

ISM: JETS AND OUTFLOWS

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

High-Energy Emission from the Prompt Gamma-Ray Burst. *Dafne Guetta & Jonathan Granot.* 585, 885 (2003)

The Binary Jet in L1551 IRS 5. *Luis F. Rodríguez, Alicia Porras, Mark J. Claussen, Salvador Curiel, David J. Wilner, & Paul T. P. Ho.* 586, L137 (2003)

A Triple Radio Continuum Source Associated with IRAS 16547−4247: A Collimated Stellar Wind Emanating from a Massive Protostar. *Guido Garay, Kate J. Brooks, Diego Mardones, & Ray P. Norris.* 587, 739 (2003)

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

ISM: KINEMATICS AND DYNAMICS

On the Spiral Structure of NGC 2915 and Dark Matter. *F. S. Masset & M. Bureau.* 586, 152 (2003)

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

ISM: LINES AND BANDS

Detection of Far-Infrared Features in Star-forming Regions. *Takashi Onaka & Yoko Okada.* 585, 872 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

ISM: MAGNETIC FIELDS

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)

Small-Scale Clustering in Isotropic Arrival Distribution of Ultra–High-Energy Cosmic Rays and Implications for Their Source Candidates. *Hiroyuki Yoshiguchi, Shigehiro Nagataki, Sin-ya Tsubaki, & Katsuhiko Sato.* 586, 1211 (2003)

Dynamo Action in Magnetohydrodynamics and Hall-Magnetohydrodynamics. *Pablo D. Mininni, Daniel O. Gómez, & Swadesh M. Mahajan.* 587, 472 (2003)

ISM: MOLECULES

CO Depletion and Deuterium Fractionation in Prestellar Cores. *A. Bacmann, B. Lefloch, C. Ceccarelli, J. Steinacker, A. Castets, & L. Loinard.* 585, L55 (2003)

H I Narrow Self-Absorption in Dark Clouds. *D. Li & P. F. Goldsmith.* 585, 823 (2003)

The Dynamical State of Barnard 68: A Thermally Supported, Pulsating Dark Cloud. *Charles J. Lada, Edwin A. Bergin, João F. Alves, & Tracy L. Huard.* 586, 286 (2003)

Solid-Phase Formation of Interstellar Vinyl Alchohol. *R. L. Hudson & M. H. Moore.* 586, L107 (2003)

CO $J = 7 \rightarrow 6$ Observations of NGC 253: Cosmic-Ray–heated Warm Molecular Gas. *C. M. Bradford, T. Nikola, G. J. Stacey, A. D. Bolatto, J. M. Jackson, M. L. Savage, J. A. Davidson, & S. J. Higdon.* 586, 891 (2003)

CH, CO, and $E(B - V)$ as Molecular Gas Tracers in a Translucent Cloud. *Loris Magnani, Raymond J. Chastain, Hyekyung Clarisse Kim, Dap Hartmann, Anthony T. Truong, & Patrick Thaddeus.* 586, 1111 (2003)

Time-dependent Density Functional Theory Calculations of Large Compact Polycyclic Aromatic Hydrocarbon Cations: Implications for the Diffuse Interstellar Bands. *Jennifer L. Weisman, Timothy J. Lee, Farid Salama, & Martin Head-Gordon.* 587, 256 (2003)

ISM: PLANETARY NEBULAE: GENERAL

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

Fuel-Supply–limited Stellar Relaxation Oscillations: Application to Multiple Rings around Asymptotic Giant Branch Stars and Planetary Nebulae. *Hugh M. Van Horn, John H. Thomas, Adam Frank, & Eric G. Blackman.* 585, 983 (2003)

Shaping Proto–Planetary and Young Planetary Nebulae with Collimated Fast Winds. *Chin-Fei Lee & Raghvendra Sahai.* 586, 319 (2003)

An Icy, Bipolar Proto–Planetary Nebula with Knotty Jets: IRAS 22036+5306. *R. Sahai, A. Zijlstra, C. Sánchez Contreras, & M. Morris.* 586, L81 (2003)

Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

ISM: PLANETARY NEBULAE: INDIVIDUAL

NGC Number: NGC 6302

Neutral Carbon in Post–Asymptotic Giant Branch Stars and Planetary Nebulae. *Tatsuhiko I. Hasegawa & Sun Kwok.* 585, 475 (2003)

Alphanumeric: AFGL 618

Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

Alphanumeric: IRAS 21282+5050

Neutral Carbon in Post–Asymptotic Giant Branch Stars and Planetary Nebulae. *Tatsuhiko I. Hasegawa & Sun Kwok.* 585, 475 (2003)

Alphanumeric: OH 231.8+4.2

Hubble Space Telescope/NICMOS Near-Infrared Imaging of the Proto–Planetary Nebula OH 231.8+4.2. *C. A. Meakin, J. H. Bieging, W. B. Latter, J. L. Hora, & A. G. G. M. Tielens.* 585, 482 (2003)

ISM: REFLECTION NEBULAE

SPINR—a Wide-Field Ultraviolet Spectral Imaging System. *T. A. Cook, V. J. Gsell, J. Golub, & S. Chakrabarti.* 585, 1177 (2003)

ISM: STRUCTURE

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

Rapid Variability and Annual Cycles in the Characteristic Timescale of the Scintillating Source PKS 1257−326. *H. E. Bignall, D. L. Jauncey, J. E. J. Lovell, A. K. Tzioumis, L. Kedziora-Chudczer, J.-P. Macquart, S. J. Tingay, D. P. Rayner, & R. W. Clay.* 585, 653 (2003)

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)

Fitting Together the H I Absorption and Emission in the Southern Galactic Plane Survey. *John M. Dickey, N. M. McClure-Griffiths, B. M. Gaensler, & A. J. Green.* 585, 801 (2003)

Ionized Gas in the First 10 Kiloparsecs of the Interstellar Galactic Halo. *J. Christopher Howk, Kenneth R. Sembach, & Blair D. Savage.* 586, 249 (2003)

Far Ultraviolet Spedtroscopic Explorer Detection of Galactic O VI Emission in the Halo above the Perseus Arm. *Birgit Otte, W. Van Dyke Dixon, & Ravi Sankrit.* 586, L53 (2003)

Optical Spectroscopy and Ionization Models of the Diffuse Ionized Gas in M33, M51/NGC 5195, and M81. *Charles G. Hoopes & René A. M. Walterbos.* 586, 902 (2003)

Highly Ionized Gas in the Galactic Halo: A *FUSE* Survey of O VI Absorption toward 22 Halo Stars. *J. Zsargó, K. R. Sembach, J. C. Howk, & B. D. Savage.* 586, 1019 (2003)

The Millennium Arecibo 21 Centimeter Absorption-Line Survey. II. Properties of the Warm and Cold Neutral Media. *Carl Heiles & T. H. Troland.* 586, 1067 (2003)

Neutral Atomic Phases of the Interstellar Medium in the Galaxy. *Mark G. Wolfire, Christopher F. McKee, David Hollenbach, & A. G. G. M. Tielens.* 587, 278 (2003)

ISM: SUPERNOVA REMNANTS

OH (1720 MHz) Masers and Mixed-Morphology Supernova Remnants. *F. Yusef-Zadeh, M. Wardle, J. Rho, & M. Sakano.* 585, 319 (2003)

The SN 1006 Remnant: Optical Proper Motions, Deep Imaging, Distance, and Brightness at Maximum. *P. Frank Winkler, Gaurav Gupta, & Knox S. Long.* 585, 324 (2003)

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

Structure of the H I near the Northeast Limb of the Cygnus Loop. *D. A. Leahy.* 586, 224 (2003)

Chandra CCD Imagery of the Northeast and Northwest Limbs of SN 1006. *Knox S. Long, Stephen P. Reynolds, John C. Raymond, P. Frank Winkler, Kristy K. Dyer, & Robert Petre.* 586, 1162 (2003)

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

Chandra Observations of the Luminous, Oxygen-rich Supernova Remnants in the Irregular Galaxy NGC 4449. *Daniel J. Patnaude & Robert A. Fesen.* 587, 221 (2003)

The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)

KUIPER BELT

Occultation Searches for Kuiper Belt Objects. *Asantha Cooray & Alison J. Farmer.* 587, L125 (2003)

LINE: FORMATION

Solid-Phase Formation of Interstellar Vinyl Alchohol. *R. L. Hudson & M. H. Moore.* 586, L107 (2003)

Determination of Primordial Metallicity and Mixing in the Type II-P Supernova 1993W. *E. Baron, Peter E. Nugent, David Branch, Peter H. Hauschildt, M. Turatto, & E. Cappellaro.* 586, 1199 (2003)

LINE: IDENTIFICATION

Detection of HCN Direct *l*-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)

LINE IDENTIFICATIONS

Solid-Phase Formation of Interstellar Vinyl Alchohol. *R. L. Hudson & M. H. Moore.* 586, L107 (2003)

LINE: PROFILES

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

MAGNETIC FIELDS

Equation of State and Opacities for Hydrogen Atmospheres of Neutron Stars with Strong Magnetic Fields. *Alexander Y. Potekhin & Gilles Chabrier.* 585, 955 (2003)

Nonaxisymmetric Instabilities of a Toroidal Magnetic Field in a Rotating Sphere. *Keke Zhang, Xinhao Liao, & Gerald Schubert.* 585, 1124 (2003)

Large-Scale Magnetic Field Fluctuations and Development of the 1999–2000 Global Merged Interaction Region: 1–60 AU. *L. F. Burlaga, C. Wang, J. D. Richardson, & N. F. Ness.* 585, 1158 (2003)

Lepton Acceleration by Relativistic Collisionless Magnetic Reconnection. *D. A. Larrabee, R. V. E. Lovelace, & M. M. Romanova.* 586, 72 (2003)

The Long-Term Evolution of AR 7978: Testing Coronal Heating Models. *P. Démoulin, L. van Driel-Gesztelyi, C. H. Mandrini, J. A. Klimchuk, & L. Harra.* 586, 592 (2003)

Fast Dynamo Action for a Family of Parametrized Flows. *S. E. M. Tanner & D. W. Hughes.* 586, 685 (2003)

Chandra Temperature Map of A754 and Constraints on Thermal Conduction. *M. Markevitch, P. Mazzotta, A. Vikhlinin, D. Burke, Y. Butt, L. David, H. Donnelly, W. R. Forman, D. Harris, D.-W. Kim, S. Virani, & J. Vrtilek.* 586, L19 (2003)

Flaring X-Ray Emission from HST-1, a Knot in the M87 Jet. *D. E. Harris, J. A. Biretta, W. Junor, E. S. Perlman, W. B. Sparks, & A. S. Wilson.* 586, L41 (2003)

The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)

Dynamo Action in Magnetohydrodynamics and Hall-Magnetohydrodynamics. *Pablo D. Mininni, Daniel O. Gómez, & Swadesh M. Mahajan.* 587, 472 (2003)

Cosmic-Ray History and Its Implications for Galactic Magnetic Fields. *Ellen G. Zweibel.* 587, 625 (2003)

MAGNETOHYDRODYNAMICS: MHD

Numerical Simulations of Mass Outflows Driven from Accretion Disks by Radiation and Magnetic Forces. *Daniel Proga.* 585, 406 (2003)

Global Three-dimensional Magnetohydrodynamic Simulations of Black Hole Accretion Disks: X-Ray Flares in the Plunging Region. *Mami Machida & Ryoji Matsumoto.* 585, 429 (2003)

Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

Local Magnetohydrodynamic Models of Layered Accretion Disks. *Timothy Fleming & James M. Stone.* 585, 908 (2003)

General Relativistic Magnetohydrodynamics for the Numerical Construction of Dynamical Spacetimes. *Thomas W. Baumgarte & Stuart L. Shapiro.* 585, 921 (2003)

Collapse of a Magnetized Star to a Black Hole. *Thomas W. Baumgarte & Stuart L. Shapiro.* 585, 930 (2003)

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

Kink and Longitudinal Oscillations in the Magnetic Network on the Sun: Nonlinear Effects and Mode Transformation. *S. S. Hasan, W. Kalkofen, A. A. van Ballegooijen, & P. Ulmschneider.* 585, 1138 (2003)

Lepton Acceleration by Relativistic Collisionless Magnetic Reconnection. *D. A. Larrabee, R. V. E. Lovelace, & M. M. Romanova.* 586, 72 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

Injection of Magnetic Energy and Magnetic Helicity into the Solar Atmosphere by an Emerging Magnetic Flux Tube. *T. Magara & D. W. Longcope.* 586, 630 (2003)

Fast Dynamo Action for a Family of Parametrized Flows. *S. E. M. Tanner & D. W. Hughes.* 586, 685 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

Petschek-like Reconnection with Current-driven Anomalous Resistivity and Its Application to Solar Flares. *Dmitri A. Uzdensky.* 587, 450 (2003)

Dynamo Action in Magnetohydrodynamics and Hall-Magnetohydrodynamics. *Pablo D. Mininni, Daniel O. Gómez, & Swadesh M. Mahajan.* 587, 472 (2003)

Cosmic-Ray History and Its Implications for Galactic Magnetic Fields. *Ellen G. Zweibel.* 587, 625 (2003)

Observational Evidence for Mode Coupling in the Chromospheric Network. *R. T. James McAteer, Peter T. Gallagher, David R. Williams, Mihalis Mathioudakis, D. Shaun Bloomfield, Kenneth J. H. Phillips, & Francis P. Keenan.* 587, 806 (2003)

MASERS

Expansion of the R4 H_2O Maser Arc near Cepheus A HW2. *J. F. Gallimore, R. J. Cool, M. D. Thornley, & J. McMullin.* 586, 306 (2003)

The Position of Sagittarius A*. II. Accurate Positions and Proper Motions of Stellar SiO Masers near the Galactic Center. *M. J. Reid, K. M. Menten, R. Genzel, T. Ott, R. Schödel, & A. Eckart.* 587, 208 (2003)

METEORS, METEOROIDS

Heliocentric Dependence of the Sodium Emission of Comet 153P/Ikeya-Zhang. *Jun-ichi Watanabe, Hideyo Kawakita, Reiko Furusho, & Mitsugu Fujii.* 585, L159 (2003)

Some Nucleosynthesis Effects Associated with *r*-Process Jets. *A. G. W. Cameron.* 587, 327 (2003)

METHODS: ANALYTICAL

Eddington Limit and Radiative Transfer in Highly Inhomogeneous Atmospheres. *Mateusz Ruszkowski & Mitchell C. Begelman.* 586, 384 (2003)

Time-dependent Density Functional Theory Calculations of Large Compact Polycyclic Aromatic Hydrocarbon Cations: Implications for the Diffuse

Interstellar Bands. *Jennifer L. Weisman, Timothy J. Lee, Farid Salama, & Martin Head-Gordon.* 587, 256 (2003)

METHODS: DATA ANALYSIS

Electron Properties and Coulomb Collisions in the Solar Wind at 1 AU: *WIND* Observations. *C. Salem, D. Hubert, C. Lacombe, S. D. Bale, A. Mangeney, D. E. Larson, & R. P. Lin.* 585, 1147 (2003)

Reconstructing Cepheid Light Curve with Fourier Techniques. I. The Fourier Expansion and Interrelations. *Chow-Choong Ngeow, Shashi M. Kanbur, Sergei Nikolaev, Nial R. Tanvir, & Martin A. Hendry.* 586, 959 (2003)

METHODS: LABORATORY

A Concise New Look at the *l*-Type Spectrum of $H^{12}C^{14}N$. *S. Thorwirth, H. S. P. Müller, F. Lewen, S. Brünken, V. Ahrens, & G. Winnewisser.* 585, L163 (2003)

The Effects of Ion Irradiation on the Evolution of the Carrier of the 3.4 Micron Interstellar Absoprtion Band. *V. Mennella, G. A. Baratta, A. Esposito, G. Ferini, & Y. J. Pendleton.* 587, 727 (2003)

Experimental Transition Rate of the Green Coronal Line of Fe XIV. *P. Beiersdorfer, E. Trabert, & E. H. Pinnington.* 587, 836 (2003)

METHODS: *N*-BODY SIMULATIONS

Toward a Measurement of the Cosmological Geometry at $z \sim 2$: Predicting Lyα Forest Correlation in Three Dimensions and the Potential of Future Data Sets. *Patrick McDonald.* 585, 34 (2003)

Smooth Potential Chaos and *N*-Body Simulations. *Henry E. Kandrup & Ioannis V. Sideris.* 585, 244 (2003)

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Morphological and Kinematic Properties of Disk Galaxies Perturbed by a Satellite. *R. Chan & S. Junqueira.* 586, 780 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

Shadowing-based Reliability Decay in Softened n-Body Simulations. *Wayne Hayes.* 587, L59 (2003)

METHODS: NUMERICAL

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)

Numerical Simulations of Mass Outflows Driven from Accretion Disks by Radiation and Magnetic Forces. *Daniel Proga.* 585, 406 (2003)

Relativistic Jets in Collapsars. *Weiqun Zhang, S. E. Woosley, & A. I. MacFadyen.* 586, 356 (2003)

Eddington Limit and Radiative Transfer in Highly Inhomogeneous Atmospheres. *Mateusz Ruszkowski & Mitchell C. Begelman.* 586, 384 (2003)

Orbital Migration and Mass Accretion of Protoplanets in Three-dimensional Global Computations with Nested Grids. *Gennaro D'Angelo, Willy Kley, & Thomas Henning.* 586, 540 (2003)

Injection of Magnetic Energy and Magnetic Helicity into the Solar Atmosphere by an Emerging Magnetic Flux Tube. *T. Magara & D. W. Longcope.* 586, 630 (2003)

Small-Scale Clustering in Isotropic Arrival Distribution of Ultra–High-Energy Cosmic Rays and Implications for Their Source Candidates. *Hiroyuki Yoshiguchi, Shigehiro Nagataki, Sin-ya Tsubaki, & Katsuhiko Sato.* 586, 1211 (2003)

2-DUST: A Dust Radiative Transfer Code for an Axisymmetric System. *Toshiya Ueta & Margaret Meixner.* 586, 1338 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

The Influence of Ω_b on High-Redshit Structure. *Jeffrey P. Gardner, Neal Katz, Lars Hernquist, & David H. Weinberg.* 587, 1 (2003)

Electron Neutrino Pair Annihilation: A New Source for Muon and Tau Neutrinos in Supernovae. *Robert Buras, Hans-Thomas Janka, Mathias Th. Keil, Georg G. Raffelt, & Markus Rampp.* 587, 320 (2003)

White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

METHODS: OBSERVATIONAL

Predictions for Cosmological Infrared Surveys from Space with the Multiband Imaging Photometer for *SIRTF*. *H. Dole, G. Lagache, & J.-L. Puget.* 585, 617 (2003)

METHODS: STATISTICAL

Average Spectra of Massive Galaxies in the Sloan Digital Sky Survey. *Daniel J. Eisenstein, David W. Hogg, Masataka Fukugita, Osamu Nakamura, Mariangela Bernardi, Douglas P. Finkbeiner, David J. Schlegel, J. Brinkmann, Andrew J. Connolly, István Csabai, James E. Gunn, Željko Ivezić, Don Q. Lamb, Jon Loveday, Jeffrey A. Munn, Robert C. Nichol, Donald P. Schneider, Michael A. Strauss, Alex Szalay, & Don G. York.* 585, 694 (2003)

Transit Target Selection Using Reduced Proper Motions. *Andrew Gould & Christopher W. Morgan.* 585, 1056 (2003)

Deprojecting Densities from Angular Cross-Correlations. *Daniel J. Eisensten.* 586, 718 (2003)

The Rate and the Origin of Type Ia Supernovae in Radio Galaxies. *Massimo Della Valle & Nino Panagia.* 587, L71 (2003)

The Luminosity Function of *IRAS* Point Source Catalog Redshift Survey Galaxies. *Tsutomu T. Takeuchi, Kohji Yoshikawa, & Takako T. Ishii.* 587, L89 (2003)

MINOR PLANETS, ASTEROIDS

Occultation Searches for Kuiper Belt Objects. *Asantha Cooray & Alison J. Farmer.* 587, L125 (2003)

MOLECULAR DATA

A Concise New Look at the *l*-Type Spectrum of $H^{12}C^{14}N$. *S. Thorwirth, H. S. P. Müller, F. Lewen, S. Brünken, V. Ahrens, & G. Winnewisser.* 585, L163 (2003)

MOLECULAR PROCESSES

Chemical Evolution in Protostellar Envelopes: Cocoon Chemistry. *S. D. Rodgers & S. B. Charnley.* 585, 355 (2003)

Ozone Depletion from Nearby Supernovae. *Neil Gehrels, Claude M. Laird, Charles H. Jackman, John K. Cannizzo, Barbara J. Mattson, & Wan Chen.* 585, 1169 (2003)

Transition from L to T Dwarfs of the Color-Magnitude Diagram. *Takashi Tsuji & Tadashi Nakajima.* 585, L151 (2003)

Solid-Phase Formation of Interstellar Vinyl Alchohol. *R. L. Hudson & M. H. Moore.* 586, L107 (2003)

CH, CO, and $E(B-V)$ as Molecular Gas Tracers in a Translucent Cloud. *Loris Magnani, Raymond J. Chastain, Hyekyung Clarisse Kim, Dap Hartmann, Anthony T. Truong, & Patrick Thaddeus.* 586, 1111 (2003)

An S_2 Fluorescence Model for Interpreting High-Resolution Cometary Spectra. I. Model Description and Initial Results. *Celine Reyle & D. C. Boice.* 587, 464 (2003)

Radiative Relaxation and Isomeric Branching of Highly Excited H/C/N: The Importance of Delocalized Vibrational States. *Troy Barger, Alec M. Wodtke, & Joel M. Bowman.* 587, 841 (2003)

MOON

Heliocentric Dependence of the Sodium Emission of Comet 153P/Ikeya-Zhang. *Jun-ichi Watanabe, Hideyo Kawakita, Reiko Furusho, & Mitsugu Fujii.* 585, L159 (2003)

NEUTRINOS

Electron Neutrino Pair Annihilation: A New Source for Muon and Tau Neutrinos in Supernovae. *Robert Buras, Hans-Thomas Janka, Mathias Th. Keil, Georg G. Raffelt, & Markus Rampp.* 587, 320 (2003)

NUCLEAR REACTIONS, NUCLEOSYNTHESIS, ABUNDANCES

p-Process Nucleosynthesis inside Supernova-driven Supercritical Accretion Disks. *Shin-ichirou Fujimoto, Masa-aki Hashimoto, Osamu Koike, Kenzo Arai, & Ryuichi Matsuba.* 585, 418 (2003)

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

Magnetic Protoneutron Star Winds and r-Process Nucleosynthesis. *Todd A. Thompson.* 585, L33 (2003)

On the Baryometric Status of ^{3}He. *Elisabeth Vangioni-Flam, Keith A. Olive, Brian D. Fields, & Michel Cassé.* 585, 611 (2003)

Measurement of the Europium Isotope Ratio for the Extremely Metal poor, r-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

Challenging Cosmic-Ray Propagation with Antiprotons: Evidence for a "Fresh" Nuclei Component? *Igor V. Moskalenko, Andrew W. Strong, Stepan G. Mashnik, & Jonathan F. Ormes.* 586, 1050 (2003)
On the Variation of Deuterium and Oxygen Abundances in the Local Interstellar Medium. *Gary Steigman.* 586, 1120 (2003)
Determination of Primordial Metallicity and Mixing in the Type II-P Supernova 1993W. *E. Baron, Peter E. Nugent, David Branch, Peter H. Hauschildt, M. Turatto, & E. Cappellaro.* 586, 1199 (2003)
Nucleosynthesis in Gamma-Ray Burst Accretion Disks. *Jason Pruet, S. E. Woosley, & R. D. Hoffman.* 586, 1254 (2003)
s-Process Nucleosynthesis in Asymptotic Giant Branch Stars: A Test for Stellar Evolution. *Maria Lugaro, Falk Herwig, John C. Lattanzio, Roberto Gallino, & Oscar Straniero.* 586, 1305 (2003)
Enhancement of Resonant Thermonuclear Reaction Rates in Extremely Dense Stellar Plasmas. *Naoki Itoh, Nami Tomizawa, Shinya Wanajo, & Satoshi Nozawa.* 586, 1436 (2003)
Some Nucleosynthesis Effects Associated with *r*-Process Jets. *A. G. W. Cameron.* 587, 327 (2003)
White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)
Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

OCCULTATIONS

Scintillation Caustics in Planetary Occultation Light Curves. *Asantha R. Cooray & J. L. Elliot.* 587, L121 (2003)
Occultation Searches for Kuiper Belt Objects. *Asantha Cooray & Alison J. Farmer.* 587, L125 (2003)

PLANETS: RINGS

Probing Structures of Distant Extrasolar Planets with Microlensing. *B. Scott Gaudi, Heon-Young Chang, & Cheongho Han.* 586, 527 (2003)

PLANETS AND SATELLITES: GENERAL

Transit Target Selection Using Reduced Proper Motions. *Andrew Gould & Christopher W. Morgan.* 585, 1056 (2003)
Probing Structures of Distant Extrasolar Planets with Microlensing. *B. Scott Gaudi, Heon-Young Chang, & Cheongho Han.* 586, 527 (2003)
Saturation of the Corotation Resonance in a Gaseous Disk. *G. I. Ogilvie & S. H. Lubow.* 587, 398 (2003)
"Weather" Variability of Close-in Extrasolar Giant Planets. *Kristen Menou, James Y-K. Cho, Sara Seager, & Bradley M. S. Hansen.* 587, L113 (2003)
The Changing Face of the Extrasolar Giant Planet HD 209458b. *Kristen Menou, James Y-K. Cho, Bradley M. S. Hansen, & Sara Seager.* 587, L117 (2003)

PLANETS AND SATELLITES: FORMATION

Halting Planet Migration by Photoevaporation from the Central Source. *Isamu Matsuyama, Doug Johnstone, & Norman Murray.* 585, L143 (2003)

PLANETS AND SATELLITES: INDIVIDUAL

Saturn

Scintillation Caustics in Planetary Occultation Light Curves. *Asantha R. Cooray & J. L. Elliot.* 587, L121 (2003)

PLASMAS

Atomic Data and Spectral Line Intensities for Si VII. *A. K. Bhatia & E. Landi.* 585, 587 (2003)
Equation of State and Opacities for Hydrogen Atmospheres of Neutron Stars with Strong Magnetic Fields. *Alexander Y. Potekhin & Gilles Chabrier.* 585, 955 (2003)
Nonthermal Mass Motions within the High-Temperature Plasmas above a Complex Solar Active Region. *U. Feldman, E. Landi, & W. Curdt.* 585, 1087 (2003)
Electron Properties and Coulomb Collisions in the Solar Wind at 1 AU: *WIND* Observations. *C. Salem, D. Hubert, C. Lacombe, S. D. Bale, A. Mangeney, D. E. Larson, & R. P. Lin.* 585, 1147 (2003)
Lepton Acceleration by Relativistic Collisionless Magnetic Reconnection. *D. A. Larrabee, R. V. E. Lovelace, & M. M. Romanova.* 586, 72 (2003)
Enhancement of Resonant Thermonuclear Reaction Rates in Extremely Dense Stellar Plasmas. *Naoki Itoh, Nami Tomizawa, Shinya Wanajo, & Satoshi Nozawa.* 586, 1436 (2003)

POLARIZATION

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)
Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)
Explaining the Observed Polarization from Brown Dwarfs by Single Dust Scattering. *Sujan Sengupta.* 585, L155 (2003)
Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)
The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)
Optical Polarization and Near-Infrared Photometry of the Proto–Planetary Nebula Henize 3-1475. *Claudia V. Rodrigues, Francisco J. Jablonski, Jane Gregario-Hetem, Gabriel R. Hickel, & Marilla J. Sartori.* 587, 312 (2003)

PULSARS

Chandra Observations of the Anomalous X-Ray Pulsar 4U 0142+61. *Sandeep K. Patel, Chryssa Kouveliotou, Peter M. Woods, Allyn F. Tennant, Martin C. Weisskopf, Mark H. Finger, Colleen Wilson-Hodge, Ersin Gogus, Michiel van der Klis, & Tomaso Belloni.* 587, 367 (2003)

QUASARS

Relation between BL Lacertae Objects and Flat-Spectrum Radio Quasars. *J. H. Fan.* 585, L23 (2003)
Black Hole Mass and Spin Coevolution by Mergers. *Scott A. Hughes & Roger D. Blandford.* 585, L101 (2003)
The Host Galaxies of Optically Bright Quasi-stellar Objects: Molecular Gas in $z \leq 0.1$ Palomar-Green Quasi-stellar Objects. *N. Z. Scoville, D. T. Frayer, E. Schinnerer, & M. Christopher.* 585, L105 (2003)
Clear Evidence for Intranight Optical Variability in Radio-quiet Quasars. *Gopal-Krishna, C. S. Stalin, Ram Sagar, & Paul J. Wiita.* 586, L25 (2003)

RADIATION MECHANISMS: GENERAL

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

RADIATION MECHANISMS: NONTHERMAL

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)
Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)
Neutron-fed Afterglows of Gamma-Ray Bursts. *Andrei M. Beloborodov.* 585, L19 (2003)
Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)
High-Energy Emission from the Prompt Gamma-Ray Burst. *Dafne Guetta & Jonathan Granot.* 585, 885 (2003)
Three-dimensional Simulations of Relativistic Precessing Jets Probing the Structure of Superluminal Sources. *Miguel-Ángel Aloy, José-María Martí, José-Luís Gómez, Iván Agudo, Ewald Müller, & José-María Ibáñez.* 585, L109 (2003)
Radio/X-Ray Offsets of Large-Scale Jets Caused by Synchrotron Time Lags. *J. M. Bai & Myung Gyoon Lee.* 585, L113 (2003)
Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)
Detection of X-Ray Emission from the Eastern Radio Lobe of Pictor A. *Paola Grandi, Matteo Guainazzi, Laura Maraschi, Raffaella Morganti, Roberto Fusco-Femiano, Mariateresa Fiocchi, Lucia Ballo, & Fabrizio Tavecchio.* 586, 123 (2003)
Detection of HCN Direct *l*-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)
Two-dimensional Monte Carlo/Fokker-Planck Simulations of Flares in Accretion Disk Corona Models. *M. Böttcher, D. R. Jackson, & E. P. Liang.* 586, 389 (2003)
Flaring X-Ray Emission from HST-1, a Knot in the M87 Jet. *D. E. Harris, J. A. Biretta, W. Junor, E. S. Perlman, W. B. Sparks, & A. S. Wilson.* 586, L41 (2003)
The Identification of Infrared Synchrotron Radiation from Cassiopeia A. *T. J. Jones, L. Rudnick, T. DeLaney, & J. Bowden.* 587, 227 (2003)
Gyrosynchrotron Emission from Anisotropic Electron Distributions. *G. D. Fleishman & V. F. Melnikov.* 587, 823 (2003)
Radiative Relaxation and Isomeric Branching of Highly Excited H/C/N: The Importance of Delocalized Vibrational States. *Troy Barger, Alec M. Wodtke, & Joel M. Bowman.* 587, 841 (2003)

RADIATION MECHANISMS: THERMAL

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

Detection of X-Ray Emission from the Eastern Radio Lobe of Pictor A. *Paola Grandi, Matteo Guainazzi, Laura Maraschi, Raffaella Morganti, Roberto Fusco-Femiano, Mariateresa Fiocchi, Lucia Ballo, & Fabrizio Tavecchio.* 586, 123 (2003)

Two-dimensional Monte Carlo/Fokker-Planck Simulations of Flares in Accretion Disk Corona Models. *M. Böttcher, D. R. Jackson, & E. P. Liang.* 586, 389 (2003)

RADIATIVE TRANSFER

Eddington Limit and Radiative Transfer in Highly Inhomogeneous Atmospheres. *Mateusz Ruszkowski & Mitchell C. Begelman.* 586, 384 (2003)

Two-dimensional Monte Carlo/Fokker-Planck Simulations of Flares in Accretion Disk Corona Models. *M. Böttcher, D. R. Jackson, & E. P. Liang.* 586, 389 (2003)

Determination of Primordial Metallicity and Mixing in the Type II-P Supernova 1993W. *E. Baron, Peter E. Nugent, David Branch, Peter H. Hauschildt, M. Turatto, & E. Cappellaro.* 586, 1199 (2003)

2-DUST: A Dust Radiative Transfer Code for an Axisymmetric System. *Toshiya Ueta & Margaret Meixner.* 586, 1338 (2003)

Optical Polarization and Near-Infrared Photometry of the Proto–Planetary Nebula Henize 3-1475. *Claudia V. Rodrigues, Francisco J. Jablonski, Jane Gregario-Hetem, Gabriel R. Hickel, & Marilla J. Sartori.* 587, 312 (2003)

RADIO CONTINUUM: GALAXIES

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

The Nuclear Accretion in the FR I Radio Galaxy IC 4296 from *Chandra* and Very Long Baseline Array Observations. *S. Pellegrini, T. Venturi, A. Comastri, G. Fabbiano, F. Fiore, C. Vignali, R. Morganti, & G. Trinchieri.* 585, 677 (2003)

Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

Variability of Sagittarius A*: Flares at 1 Millimeter. *Jun-Hui Zhao, K. H. Young, R. M. Herrnstein, P. T. P. Ho, T. Tsutsumi, K. Y. Lo, W. M. Goss, & G. C. Bower.* 586, L29 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

ROSAT HRI Investigation of the NGC 507 X-Ray Halo. *M. Paolillo, G. Fabbiano, G. Peres, & D.-W. Kim.* 586, 850 (2003)

Very Long Baseline Array Continuum and H I Absorption Observations of the Ultraluminous Infrared Galaxy IRAS 17208−0014. *Emmanuel Momjian, Jonathan D. Romney, Christopher L. Carilli, Thomas H. Troland, & Gregory B. Taylor.* 587, 160 (2003)

Chandra Observations of the Galaxy Cluster A478: The Interaction of Hot Gas and Radio Plasma in the Core, and an Improved Determination of the Compton y-Parameter. *M. Sun, C. Jones, S. S. Murray, S. W. Allen, A. C. Fabian, & A. C. Edge.* 587, 619 (2003)

RADIO CONTINUUM: GENERAL

Rapid Variability and Annual Cycles in the Characteristic Timescale of the Scintillating Source PKS 1257−326. *H. E. Bignall, D. L. Jauncey, J. E. J. Lovell, A. K. Tzioumis, L. Kedziora-Chudczer, J.-P. Macquart, S. J. Tingay, D. P. Rayner, & R. W. Clay.* 585, 653 (2003)

Continued Radio Monitoring of the Gamma-Ray Burst 991208. *T. J. Galama, D. A. Frail, R. Sari, E. Berger, G. B. Taylor, & S. R. Kulkarni.* 585, 899 (2003)

RADIO CONTINUUM: ISM

Radio Polarization from the Galactic Plane in Cygnus. *B. Uyaniker, T. L. Landecker, A. D. Gray, & R. Kothes.* 585, 785 (2003)

RADIO CONTINUUM: STARS

Interferometric Observations of the T Tauri Stars in the MBM 12 Cloud. *Yoichi Itoh, Koji Sugitani, Naoya Fukuda, Kouichiro Nakanishi, Katsuo Ogura, Motohide Tamura, Kazuko Marui, Kenta Fujita, Yumiko Oasa, & Misato Fukagawa.* 586, L141 (2003)

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

A Triple Radio Continuum Source Associated with IRAS 16547−4247: A Collimated Stellar Wind Emanating from a Massive Protostar. *Guido Garay, Kate J. Brooks, Diego Mardones, & Ray P. Norris.* 587, 739 (2003)

RADIO LINES: GALAXIES

The Contribution of H I–rich Galaxies to the Damped Lyα Absorber Population at $z = 0$. *Jessica L. Rosenberg & Stephen E. Schneider.* 585, 256 (2003)

Very Long Baseline Array Continuum and H I Absorption Observations of the Ultraluminous Infrared Galaxy IRAS 17208−0014. *Emmanuel Momjian, Jonathan D. Romney, Christopher L. Carilli, Thomas H. Troland, & Gregory B. Taylor.* 587, 160 (2003)

RADIO LINES: GENERAL

The Magellanic Stream, High-Velocity Clouds, and the Sculptor Group. *Mary E. Putman, Lister Staveley-Smith, Kenneth C. Freeman, Brad K. Gibson, & David G. Barnes.* 586, 170 (2003)

Resolution of Distance Ambiguities of Inner Galaxy Massive Star Formation Regions. II. *C. Watson, E. Araya, M. Sewilo, E. Churchwell, P. Hofner, & S. Kurtz.* 587, 714 (2003)

RADIO LINES: ISM

Fitting Together the H I Absorption and Emission in the Southern Galactic Plane Survey. *John M. Dickey, N. M. McClure-Griffiths, B. M. Gaensler, & A. J. Green.* 585, 801 (2003)

H I Narrow Self-Absorption in Dark Clouds. *D. Li & P. F. Goldsmith.* 585, 823 (2003)

Structure of the H I near the Northeast Limb of the Cygnus Loop. *D. A. Leahy.* 586, 224 (2003)

The Dynamical State of Barnard 68: A Thermally Supported, Pulsating Dark Cloud. *Charles J. Lada, Edwin A. Bergin, João F. Alves, & Tracy L. Huard.* 586, 286 (2003)

The Millennium Arecibo 21 Centimeter Absorption-Line Survey. II. Properties of the Warm and Cold Neutral Media. *Carl Heiles & T. H. Troland.* 586, 1067 (2003)

Massive Quiescent Cores in Orion. I. Temperature Structure. *D. Li, P. F. Goldsmith, & K. Menten.* 587, 262 (2003)

H I Absorption toward Ultracompact H II Regions: Distances and Galactic Structure. *Vincent L. Fish, Mark J. Reid, David J. Wilner, & Ed Churchwell.* 587, 701 (2003)

RADIO LINES: STARS

Detection of HCN Direct l-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

RELATIVITY

Diffuse X-Rays from a Distributed Component of Dark Surrounding Sagittarius A*. *Martin Pessah & Fulvio Melia.* 585, L29 (2003)

General Relativistic Magnetohydrodynamics for the Numerical Construction of Dynamical Spacetimes. *Thomas W. Baumgarte & Stuart L. Shapiro.* 585, 921 (2003)

Collapse of a Magnetized Star to a Black Hole. *Thomas W. Baumgarte & Stuart L. Shapiro.* 585, 930 (2003)

Relativistic Jets in Collapsars. *Weiqun Zhang, S. E. Woosley, & A. I. MacFadyen.* 586, 356 (2003)

On the Total Energy of Open Friedmann-Robertson-Walker Universes. *V. Faraoni & F. I. Cooperstock.* 587, 483 (2003)

SCATTERING

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

Rapid Variability and Annual Cycles in the Characteristic Timescale of the Scintillating Source PKS 1257−326. *H. E. Bignall, D. L. Jauncey, J. E. J. Lovell, A. K. Tzioumis, L. Kedziora-Chudczer, J.-P. Macquart, S. J. Tingay, D. P. Rayner, & R. W. Clay.* 585, 653 (2003)

Explaining the Observed Polarization from Brown Dwarfs by Single Dust Scattering. *Sujan Sengupta.* 585, L155 (2003)

SHOCK WAVES

Gamma Rays from Intergalactic Shocks. *Uri Keshet, Eli Waxman, Abraham Loeb, Volker Springel, & Lars Hernquist.* 585, 128 (2003)

OH (1720 MHz) Masers and Mixed-Morphology Supernova Remnants. *F. Yusef-Zadeh, M. Wardle, J. Rho, & M. Sakano.* 585, 319 (2003)

The SN 1006 Remnant: Optical Proper Motions, Deep Imaging, Distance, and Brightness at Maximum. *P. Frank Winkler, Gaurav Gupta, & Knox S. Long.* 585, 324 (2003)

Neutron-fed Afterglows of Gamma-Ray Bursts. *Andrei M. Beloborodov.* 585, L19 (2003)

Pearson-Readhead Survey Sources. II. The Long-Term Centimeter-Band Total Flux and Linear Polarization Properties of a Complete Radio Sample. *M. F. Aller, H. D. Aller, & P. A. Hughes.* 586, 33 (2003)

Cause of Proton Depletion in Solar Impulsive Particle Events. *K. Ohki.* 586, 617 (2003)

Stability of Accretion Disk around Rotating Black Holes: A Pseudo–General-Relativistic Fluid Dynamical Study. *Banibrata Mukhopadhyay.* 586, 1268 (2003)

Slow Temperature Equilibration behind the Shock Front of SN 1006. *Jacco Vink, J. Martin Laming, Ming Feng Gu, Andrew Rasmussen, & Jelle S. Kaastra.* 587, L31 (2003)

SOLAR SYSTEM: FORMATION

Halting Planet Migration by Photoevaporation from the Central Source. *Isamu Matsuyama, Doug Johnstone, & Norman Murray.* 585, L143 (2003)

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

Occultation Searches for Kuiper Belt Objects. *Asantha Cooray & Alison J. Farmer.* 587, L125 (2003)

SOLAR SYSTEM: GENERAL

Scintillation Caustics in Planetary Occultation Light Curves. *Asantha R. Cooray & J. L. Elliot.* 587, L121 (2003)

SPACE VEHICLES

Measurement of ^{3}He/^{4}He in the Local Interstellar Medium: The Collisa Experiment on *Mir*. *E. Salerno, F. Bühler, P. Bochsler, H. Busemann, M. L. Bassi, G. N. Zastenker, Yu. N. Agafonov, & N. A. Eismont.* 585, 840 (2003)

SPACE VEHICLES: INSTRUMENTS

The Optical Design and Characterization of the *Microwave Anisotropy Probe*. *L. Page, C. Jackson, C. Barnes, C. Bennett, M. Halpern, G. Hinshaw, N. Jarosik, A. Kogut, M. Limon, S. S. Meyer, D. N. Spergel, G. S. Tucker, D. T. Wilkinson, E. Wollack, & E. L. Wright.* 585, 566 (2003)

STARS: ABUNDANCES

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

Carbon Isotopes in Globular Clusters Down to the Bump in the Luminosity Function. *Matthew D. Shetrone.* 585, L45 (2003)

X-Ray Spectroscopy of η Carinae with *XMM-Newton*. *Maurice A. Leutenegger, Steven M. Kahn, & Gavin Ramsay.* 585, 1015 (2003)

Measurement of the Europium Isotope Ratio for the Extremely Metal poor, r-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

Some Nucleosynthesis Effects Associated with r-Process Jets. *A. G. W. Cameron.* 587, 327 (2003)

Abundances of Post–Iron-Peak Elements in HD 35155: A Symbiotic Star of Spectral Type S. *Andrew D. Vanture, George Wallerstein, Roberto Gallino, & Stefano Masera.* 587, 384 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. I. Analytical Approach. *Sylvie Vauclair & Sylvie Théado.* 587, 777 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. III. Applications to Light Elements in Population I Main-Sequence Stars. *Sylvie Théado & Sylvie Vauclair.* 587, 795 (2003)

STARS: ACTIVITY

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

STARS: AGB AND POST-AGB

Neutral Carbon in Post–Asymptotic Giant Branch Stars and Planetary Nebulae. *Tatsuhiko I. Hasegawa & Sun Kwok.* 585, 475 (2003)

Hubble Space Telescope/NICMOS Near-Infrared Imaging of the Proto–Planetary Nebula OH 231.8+4.2. *C. A. Meakin, J. H. Bieging, W. B. Latter, J. L. Hora, & A. G. G. M. Tielens.* 585, 482 (2003)

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

Fuel-Supply–limited Stellar Relaxation Oscillations: Application to Multiple Rings around Asymptotic Giant Branch Stars and Planetary Nebulae. *Hugh M. Van Horn, John H. Thomas, Adam Frank, & Eric G. Blackman.* 585, 983 (2003)

Shaping Proto–Planetary and Young Planetary Nebulae with Collimated Fast Winds. *Chin-Fei Lee & Raghvendra Sahai.* 586, 319 (2003)

Detection of HCN Direct l-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

An Icy, Bipolar Proto–Planetary Nebula with Knotty Jets: IRAS 22036+5306. *R. Sahai, A. Zijlstra, C. Sánchez Contreras, & M. Morris.* 586, L81 (2003)

Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

s-Process Nucleosynthesis in Asymptotic Giant Branch Stars: A Test for Stellar Evolution. *Maria Lugaro, Falk Herwig, John C. Lattanzio, Roberto Gallino, & Oscar Straniero.* 586, 1305 (2003)

The Position of Sagittarius A*. II. Accurate Positions and Proper Motions of Stellar SiO Masers near the Galactic Center. *M. J. Reid, K. M. Menten, R. Genzel, T. Ott, R. Schödel, & A. Eckart.* 587, 208 (2003)

Abundances of Post–Iron-Peak Elements in HD 35155: A Symbiotic Star of Spectral Type S. *Andrew D. Vanture, George Wallerstein, Roberto Gallino, & Stefano Masera.* 587, 384 (2003)

STARS: ATMOSPHERES

Equation of State and Opacities for Hydrogen Atmospheres of Neutron Stars with Strong Magnetic Fields. *Alexander Y. Potekhin & Gilles Chabrier.* 585, 955 (2003)

Transition from L to T Dwarfs of the Color-Magnitude Diagram. *Takashi Tsuji & Tadashi Nakajima.* 585, L151 (2003)

Explaining the Observed Polarization from Brown Dwarfs by Single Dust Scattering. *Sujan Sengupta.* 585, L155 (2003)

Eddington Limit and Radiative Transfer in Highly Inhomogeneous Atmospheres. *Mateusz Ruszkowski & Mitchell C. Begelman.* 586, 384 (2003)

Magnetic Fields in Massive Stars. II. The Buoyant Rise of Magnetic Flux Tubes through the Radiative Interior. *K. B. MacGregor & J. P. Cassinelli.* 586, 480 (2003)

Modeling the Formation of Clouds in Brown Dwarf Atmospheres. *Curtis S. Cooper, David Sudarsky, John A. Milsom, Jonathan I. Lumine, & Adam Burrows.* 586, 1320 (2003)

"Weather" Variability of Close-in Extrasolar Giant Planets. *Kristen Menou, James Y-K. Cho, Sara Seager, & Bradley M. S. Hansen.* 587, L113 (2003)

The Changing Face of the Extrasolar Giant Planet HD 209458b. *Kristen Menou, James Y-K. Cho, Bradley M. S. Hansen, & Sara Seager.* 587, L117 (2003)

STARS: BINARIES: CLOSE

Numerical Simulations of Mass Outflows Driven from Accretion Disks by Radiation and Magnetic Forces. *Daniel Proga.* 585, 406 (2003)

The Optical Light Curves of XTE J2123−058. III. The Mass of the Binary Components and the Structure of the Quiescent Accretion Disk. *T. Shahbaz, C. Zurita, J. Casares, G. Dubus, P. A. Charles, R. Mark Wagner, & E. Ryan.* 585, 443 (2003)

Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

X-Ray Spectral Properties of Low-Mass X-Ray Binaries in Nearby Galaxies. *Jimmy A. Irwin, Alex E. Athey, & Joel N. Bregman.* 587, 356 (2003)

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

High-Velocity Jets in Recurrent Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 587, L39 (2003)

Doppler Modulation of X-Ray Lines in Cygnus X-3. *Michael Stark & Malinda Saia.* 587, L101 (2003)

STARS: BINARIES: ECLIPSING

A Unique Solution of Planet and Star Parameters from an Extrasolar Planet Transit Light Curve. *S. Seager & G. Mallén-Ornelas.* 585, 1038 (2003)

Fundamental Properties and Distances of Large Magellanic Cloud Eclipsing Binaries. IV. HV 5936. *E. L. Fitzpatrick, I. Ribas, E. F. Guinan, F. P. Maloney, & A. Claret.* 587, 685 (2003)

STARS: BINARIES: GENERAL

Angular Radii of Stars via Microlensing. *B. Scott Gaudi, David S. Graff, & Cheongho Han.* 586, 451 (2003)

A Comprehensive Study of the L1551 IRS 5 Binary System. *Mayra Osorio, Paolo D'Alessio, James Muzerolle, Nuria Calvet, & Lee Hartmann.* 586, 1148 (2003)

Cool Companions to White Dwarfs from the Two Micron All-Sky Survey Second Incremental Data Release. *Stefanie Wachter, D. W. Hoard, Kathryn H. Hansen, Rebecca E. Wilcox, Hilda M. Taylor, & Steven L. Finkelstein.* 586, 1356 (2003)

Detection of Nine M8.0–L0.5 Binaries: The Very Loss Mass Binary Population and Its Implications for Brown Dwarf and Very Low Mass Star Formation. *Laird M. Close, Nick Siegler, Melanie Freed, & Beth Biller.* 587, 407 (2003)

Ejection of a Low-Mass Star in a Young Stellar System in Taurus. *Laurent Loinard, Luis F. Rodríquez, & Monica I. Rodríguez.* 587, L47 (2003)

STARS: BINARIES: VISUAL

ι Cassiopeiae: Orbit, Masses, and Photometry from Adaptive Optics Imaging in the *I* and *H* Bands. *Jack Drummond, Scott Milster, Patrick Ryan, & Lewis C. Roberts, Jr.* 585, 1007 (2003)

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

STARS: CHROMOSPHERES

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

STARS: CIRCUMSTELLAR MATTER

A Survey for Circumstellar Disks around Young Substellar Objects. *Michael C. Liu, Joan Najita, & Alan T. Tokunaga.* 585, 372 (2003)

Neutral Carbon in Post–Asymptotic Giant Branch Stars and Planetary Nebulae. *Tatsuhiko I. Hasegawa & Sun Kwok.* 585, 475 (2003)

Hubble Space Telescope/NICMOS Near-Infrared Imaging of the Proto–Planetary Nebula OH 231.8+4.2. *C. A. Meakin, J. H. Bieging, W. B. Latter, J. L. Hora, & A. G. G. M. Tielens.* 585, 482 (2003)

Ground-based Near-Infrared Imaging of the HD 141569 Circumstellar Disk. *A. Boccaletti, J.-C. Augereau, F. Marchis, & J. Hahn.* 585, 494 (2003)

Detection of Crystalline Silicates around the T Tauri Star Hen 3-600A. *Mitsuhiko Honda, Hirokazu Kataza, Yoshiko K. Okamoto, Takashi Miyata, Takuya Yamashita, Shigeyuki Sako, Shinya Takubo, & Takashi Onaka.* 585, L59 (2003)

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

Latitude-dependent Effects in the Stellar Wind of η Carinae. *Nathan Smith, Kris Davidson, Theodore R. Gull, Kazunori Ishibashi, & D. John Hillier.* 586, 432 (2003)

High-Resolution *Chandra* Spectroscopy of τ Scorpii: A Narrow-Line X-Ray Spectrum from a Hot Star. *David H. Cohen, Geneviève E. de Messières, Joseph J. MacFarlane, Nathan A. Miller, Joseph P. Cassinelli, Stanley P. Owocki, & Duane A. Liedahl.* 586, 495 (2003)

An Icy, Bipolar Proto–Planetary Nebula with Knotty Jets: IRAS 22036+5306. *R. Sahai, A. Zijlstra, C. Sánchez Contreras, & M. Morris.* 586, L81 (2003)

Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

Mid-Infrared Imaging of the First-Ascent Giant HD 233517. *R. Scott Fisher, C. M. Telesco, Robert K. Piña, & Roger F. Knacke.* 586, L91 (2003)

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

A Comprehensive Study of the L1551 IRS 5 Binary System. *Mayra Osorio, Paolo D'Alessio, James Muzerolle, Nuria Calvet, & Lee Hartmann.* 586, 1148 (2003)

2-DUST: A Dust Radiative Transfer Code for an Axisymmetric System. *Toshiya Ueta & Margaret Meixner.* 586, 1338 (2003)

Optical Polarization and Near-Infrared Photometry of the Proto–Planetary Nebula Henize 3-1475. *Claudia V. Rodrigues, Francisco J. Jablonski, Jane Gregario-Hetem, Gabriel R. Hickel, & Marilla J. Sartori.* 587, 312 (2003)

Are TiC Grains a Carrier of the 21 Micron Emission Band Observed around Post–Asymptotic Giant Branch Objects? *Takeshi Chigai, Tetsuo Yamamoto, Chihiro Kaito, & Yuki Kimura.* 587, 771 (2003)

Evidence for Grain Growth in the Protostellar Disks of Orion. *R. Y. Shuping, John Bally, Mark Morris, & Henry Throop.* 587, L109 (2003)

STARS: CORONAE

A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

Coronal X-Ray Emission from an Intermediate-Age Brown Dwarf. *Yohko Tsuboi, Yoshitomo Maeda, Eric D. Feigelson, Gordon P. Garmire, George Chartas, Koji Mori, & Steven H. Pravdo.* 587, L51 (2003)

STARS: DISTANCES

LSR 0602+3910: Discovery of a Bright Nearby L-Type Brown Dwarf. *Samir Salim, Sébastien Lépine, R. Michael Rich, & Michael M. Shara.* 586, L149 (2003)

Fundamental Properties and Distances of Large Magellanic Cloud Eclipsing Binaries. IV. HV 5936. *E. L. Fitzpatrick, I. Ribas, E. F. Guinan, F. P. Maloney, & A. Claret.* 587, 685 (2003)

STARS: EARLY-TYPE

Magnetic Fields in Massive Stars. II. The Buoyant Rise of Magnetic Flux Tubes through the Radiative Interior. *K. B. MacGregor & J. P. Cassinelli.* 586, 480 (2003)

High-Resolution *Chandra* Spectroscopy of τ Scorpii: A Narrow-Line X-Ray Spectrum from a Hot Star. *David H. Cohen, Geneviève E. de Messières, Joseph J. MacFarlane, Nathan A. Miller, Joseph P. Cassinelli, Stanley P. Owocki, & Duane A. Liedahl.* 586, 495 (2003)

Constraints on the Ionization Balance of Hot-Star Winds from *FUSE* Observations of O Stars in the Large Magellanic Cloud. *D. Massa, A. W. Fullerton, G. Sonneborn, & J. B. Hutchings.* 586, 996 (2003)

STARS: EVOLUTION

Carbon Isotopes in Globular Clusters Down to the Bump in the Luminosity Function. *Matthew D. Shetrone.* 585, L45 (2003)

On the Baryometric Status of ^{3}He. *Elisabeth Vangioni-Flam, Keith A. Olive, Brian D. Fields, & Michel Cassé.* 585, 611 (2003)

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

Fuel-Supply–limited Stellar Relaxation Oscillations: Application to Multiple Rings around Asymptotic Giant Branch Stars and Planetary Nebulae. *Hugh M. Van Horn, John H. Thomas, Adam Frank, & Eric G. Blackman.* 585, 983 (2003)

Modeling Accretional Heating in Dwarf Novae. *Patrick Godon & Edward M. Sion.* 586, 427 (2003)

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

s-Process Nucleosynthesis in Asymptotic Giant Branch Stars: A Test for Stellar Evolution. *Maria Lugaro, Falk Herwig, John C. Lattanzio, Roberto Gallino, & Oscar Straniero.* 586, 1305 (2003)

Abundances of Post–Iron-Peak Elements in HD 35155: A Symbiotic Star of Spectral Type S. *Andrew D. Vanture, George Wallerstein, Roberto Gallino, & Stefano Masera.* 587, 384 (2003)

Detection of Nine M8.0–L0.5 Binaries: The Very Loss Mass Binary Population and Its Implications for Brown Dwarf and Very Low Mass Star Formation. *Laird M. Close, Nick Siegler, Melanie Freed, & Beth Biller.* 587, 407 (2003)

STARS: FLARE

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

STARS: FORMATION

Chemical Evolution in Protostellar Envelopes: Cocoon Chemistry. *S. D. Rodgers & S. B. Charnley.* 585, 355 (2003)

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Comments on Inferences of Star Formation Histories and Birth Lines. *Lee Hartmann.* 585, 398 (2003)

CO Depletion and Deuterium Fractionation in Prestellar Cores. *A. Bacmann, B. Lefloch, C. Ceccarelli, J. Steinacker, A. Castets, & L. Loinard.* 585, L55 (2003)

The Formation of Massive Stars from Turbulent Cores. *Christopher F. McKee & Jonathan C. Tan.* 585, 850 (2003)

A Holistic Scenario of Turbulent Molecular Cloud Evolution and Control of the Star Formation Efficiency: First Tests. *E. Vázquez-Semadeni, J. Ballesteros-Paredes, & R. S. Klessen.* 585, L131 (2003)

Three Epochs of Star Formation in the High-Redshift Universe. *Jonathan Mackey, Volker Bromm, & Lars Hernquist.* 586, 1 (2003)

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Expansion of the R4 H_2O Maser Arc near Cepheus A HW2. *J. F. Gallimore, R. J. Cool, M. D. Thornley, & J. McMullin.* 586, 306 (2003)

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Reionization of Hydrogen and Helium by Early Stars and Quasars. *J. Stuart B. Wyithe & Abraham Loeb.* 586, 693 (2003)

Interactions between a Bright Young Stellar Object and the *Micourse Space Experiment* Infrared-dark Cloud G79.3+0.3: An Early Stage of Triggered Star Formation? *R. O. Redman, P. A. Feldman, F. Wyrowski, S. Côté, S. J. Carey, & M. P. Egan.* 586, 1127 (2003)

A Comprehensive Study of the L1551 IRS 5 Binary System. *Mayra Osorio, Paolo D'Alessio, James Muzerolle, Nuria Calvet, & Lee Hartmann.* 586, 1148 (2003)

Interferometric Observations of the T Tauri Stars in the MBM 12 Cloud. *Yoichi Itoh, Koji Sugitani, Naoya Fukuda, Kouichiro Nakanishi, Katsuo Ogura, Motohide Tamura, Kazuko Marui, Kenta Fujita, Yumiko Oasa, & Misato Fukagawa.* 586, L141 (2003)

Numerical Simulations of High-Redshift Star Formation in Dwarf Galaxies. *Konstantinos Tassis, Tom Abel, Greg L. Bryan, & Michael L. Norman.* 587, 13 (2003)

The Sloan Digital Sky Survey: The Cosmic Spectrum and Star Formation History. *Karl Glazebrook, Ivan K. Baldry, Michael R. Blanton, Jon Brinkmann, Andrew Connolly, István Csabai, Masataka Fukugita, Željko Ivezić, Jon Loveday, Avery Meiksin, Robert Nichol, Eric Peng, Don Schneider, Mark SubbaRao, Christy Tremonti, & Donald G. York.* 587, 55 (2003)

Detection of Nine M8.0–L0.5 Binaries: The Very Loss Mass Binary Population and Its Implications for Brown Dwarf and Very Low Mass Star Formation. *Laird M. Close, Nick Siegler, Melanie Freed, & Beth Biller.* 587, 407 (2003)

Ejection of a Low-Mass Star in a Young Stellar System in Taurus. *Laurent Loinard, Luis F. Rodríquez, & Monica I. Rodríguez.* 587, L47 (2003)

Resolution of Distance Ambiguities of Inner Galaxy Massive Star Formation Regions. II. *C. Watson, E. Araya, M. Sewilo, E. Churchwell, P. Hofner, & S. Kurtz.* 587, 714 (2003)

A Triple Radio Continuum Source Associated with IRAS 16547−4247: A Collimated Stellar Wind Emanating from a Massive Protostar. *Guido Garay, Kate J. Brooks, Diego Mardones, & Ray P. Norris.* 587, 739 (2003)

Radiative Relaxation and Isomeric Branching of Highly Excited H/C/N: The Importance of Delocalized Vibrational States. *Troy Barger, Alec M. Wodtke, & Joel M. Bowman.* 587, 841 (2003)

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

Evidence for Grain Growth in the Protostellar Disks of Orion. *R. Y. Shuping, John Bally, Mark Morris, & Henry Throop.* 587, L109 (2003)

STARS: FUNDAMENTAL PARAMETERS

Discovery of an Ultracool Subdwarf: LSR 1425+7102, the First Star with Spectral Type sdM8.0. *Sébastien Lépine, Michael M. Shara, & R. Michael Rich.* 585, L69 (2003)

ι Cassiopeiae: Orbit, Masses, and Photometry from Adaptive Optics Imaging in the *I* and *H* Bands. *Jack Drummond, Scott Milster, Patrick Ryan, & Lewis C. Roberts, Jr.* 585, 1007 (2003)

Transition from L to T Dwarfs of the Color-Magnitude Diagram. *Takashi Tsuji & Tadashi Nakajima.* 585, L151 (2003)

Angular Radii of Stars via Microlensing. *B. Scott Gaudi, David S. Graff, & Cheongho Han.* 586, 451 (2003)

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Cool Companions to White Dwarfs from the Two Micron All-Sky Survey Second Incremental Data Release. *Stefanie Wachter, D. W. Hoard, Kathryn H. Hansen, Rebecca E. Wilcox, Hilda M. Taylor, & Steven L. Finkelstein.* 586, 1356 (2003)

Fundamental Properties and Distances of Large Magellanic Cloud Eclipsing Binaries. IV. HV 5936. *E. L. Fitzpatrick, I. Ribas, E. F. Guinan, F. P. Maloney, & A. Claret.* 587, 685 (2003)

STARS: HERTZSPRUNG-RUSSELL DIAGRAM

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

STARS: IMAGING

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

STARS: INDIVIDUAL

Constellation Name: υ Andromedae

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Eccentricity Evolution of Extrasolar Multiple Planetary Systems Due to the Depletion of Nascent Protostellar Disks. *M. Nagasawa, D. N. C. Lin, & S. Ida.* 586, 1374 (2003)

Constellation Name: 20 Aquilae

An Ultrahigh-Resolution Survey of the Interstellar $^7Li/^6Li$ Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Constellation Name: 55 Cancri

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Constellation Name: BH Canum Venaticorum

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

Constellation Name: η Carinae

X-Ray Spectroscopy of η Carinae with *XMM-Newton*. *Maurice A. Leutenegger, Steven M. Kahn, & Gavin Ramsay.* 585, 1015 (2003)

Latitude-dependent Effects in the Stellar Wind of η Carinae. *Nathan Smith, Kris Davidson, Theodore R. Gull, Kazunori Ishibashi, & D. John Hillier.* 586, 432 (2003)

Constellation Name: ι Cassiopeiae

ι Cassiopeiae: Orbit, Masses, and Photometry from Adaptive Optics Imaging in the *I* and *H* Bands. *Jack Drummond, Scott Milster, Patrick Ryan, & Lewis C. Roberts, Jr.* 585, 1007 (2003)

Constellation Name: Cygnus X-3

Doppler Modulation of X-Ray Lines in Cygnus X-3. *Michael Stark & Malinda Saia.* 587, L101 (2003)

Constellation Name: EX Hydrae

Hubble Space Telescope Space Telescope Imaging Spectrograph Spectroscopy of the Intermediate Polar EX Hydrae. *Kunegunda E. Belle, Steve B. Howell, Edward M. Sion, Knox S. Long, & Paula Szkody.* 587, 373 (2003)

Constellation Name: TW Hydrae

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

Constellation Name: ζ Ophiuchi

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Constellation Name: χ Ophiuchi

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Constellation Name: o Persei

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Constellation Name: X Persei

An Ultrahigh-Resolution Survey of the Interstellar ^{7}Li/^{6}Li Isotope Ratio in the Solar Neighborhood. *David C. Knauth, S. R. Federman, & David L. Lambert.* 586, 268 (2003)

Constellation Name: V4134 Sagittarii

An *XMM-Newton* Observation of 4U 1755−33 in Quiescence: Evidence for a Fossil X-Ray Jet. *Lorella Angelini & Nicholas E. White.* 586, L71 (2003)

Constellation Name: V4641 Sagittarii

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

Constellation Name: GG Tauri

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

Constellation Name: T Tauri

Ejection of a Low-Mass Star in a Young Stellar System in Taurus. *Laurent Loinard, Luis F. Rodríquez, & Monica I. Rodríguez.* 587, L47 (2003)

Constellation Name: 47 Ursae Majoris

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Constellation Name: GW Virginis

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

Henry Draper Number: HD 2039

Four New Planets Orbiting Metal-Enriched Stars. *C. G. Tinney, R. Paul Butler, Geoffrey W. Marcy, Hugh R. A. Jones, Alan J. Penny, Chris McCarthy, Brad D. Carter, & Jade Bond.* 587, 423 (2003)

Henry Draper Number: HD 12661

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

A Planetary Companion to HD 40979 and Additional Planets Orbiting HD 12661 and HD 38529. *Debra A. Fischer, Geoffrey W. Marcy, R. Paul Butler, Steven S. Vogt, Gregory W. Henry, Dimitri Pourbaix, Bernard Walp, Anthony A. Misch, & Jason T. Wright.* 586, 1394 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

Henry Draper Number: HD 30177

Four New Planets Orbiting Metal-Enriched Stars. *C. G. Tinney, R. Paul Butler, Geoffrey W. Marcy, Hugh R. A. Jones, Alan J. Penny, Chris McCarthy, Brad D. Carter, & Jade Bond.* 587, 423 (2003)

Henry Draper Number: HD 38529

A Planetary Companion to HD 40979 and Additional Planets Orbiting HD 12661 and HD 38529. *Debra A. Fischer, Geoffrey W. Marcy, R. Paul Butler, Steven S. Vogt, Gregory W. Henry, Dimitri Pourbaix, Bernard Walp, Anthony A. Misch, & Jason T. Wright.* 586, 1394 (2003)

Henry Draper Number: HD 40979

A Planetary Companion to HD 40979 and Additional Planets Orbiting HD 12661 and HD 38529. *Debra A. Fischer, Geoffrey W. Marcy, R. Paul Butler, Steven S. Vogt, Gregory W. Henry, Dimitri Pourbaix, Bernard Walp, Anthony A. Misch, & Jason T. Wright.* 586, 1394 (2003)

Henry Draper Number: HD 73526

Four New Planets Orbiting Metal-Enriched Stars. *C. G. Tinney, R. Paul Butler, Geoffrey W. Marcy, Hugh R. A. Jones, Alan J. Penny, Chris McCarthy, Brad D. Carter, & Jade Bond.* 587, 423 (2003)

Henry Draper Number: HD 76700

Four New Planets Orbiting Metal-Enriched Stars. *C. G. Tinney, R. Paul Butler, Geoffrey W. Marcy, Hugh R. A. Jones, Alan J. Penny, Chris McCarthy, Brad D. Carter, & Jade Bond.* 587, 423 (2003)

Henry Draper Number: HD 82943

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Henry Draper Number: HD 141569A

Ground-based Near-Infrared Imaging of the HD 141569 Circumstellar Disk. *A. Boccaletti, J.-C. Augereau, F. Marchis, & J. Hahn.* 585, 494 (2003)

Henry Draper Number: HD 168443

Eccentricity Evolution of Extrasolar Multiple Planetary Systems Due to the Depletion of Nascent Protostellar Disks. *M. Nagasawa, D. N. C. Lin, & S. Ida.* 586, 1374 (2003)

Henry Draper Number: HD 191877

Deuterium toward Two Milky Way Disk Stars: Probing Extended Sight Lines with the *Far Ultraviolet Spectroscopic Explorer*. *Charles G. Hoopes, Kenneth R. Sembach, Guillaume Hébrard, H. Warren Moos, & David C. Knauth.* 586, 1094 (2003)

Henry Draper Number: HD 195965

Deuterium toward Two Milky Way Disk Stars: Probing Extended Sight Lines with the *Far Ultraviolet Spectroscopic Explorer*. *Charles G. Hoopes, Kenneth R. Sembach, Guillaume Hébrard, H. Warren Moos, & David C. Knauth.* 586, 1094 (2003)

Name: Lanning 23

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

Alphanumeric: CRL 618

Detection of HCN Direct l-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

Alphanumeric: CS 31082-001

Measurement of the Europium Isotope Ratio for the Extremely Metal poor, r-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

Alphanumeric: GD 246

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

Alphanumeric: GD 358

White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)

Alphanumeric: GJ 876

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Alphanumeric: GRO J1719−24

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

Alphanumeric: HE 0107−5240

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

Alphanumeric: HV 5936

Fundamental Properties and Distances of Large Magellanic Cloud Eclipsing Binaries. IV. HV 5936. *E. L. Fitzpatrick, I. Ribas, E. F. Guinan, F. P. Maloney, & A. Claret.* 587, 685 (2003)

Alphanumeric: L1551 IRS 5

A Comprehensive Study of the L1551 IRS 5 Binary System. *Mayra Osorio, Paolo D'Alessio, James Muzerolle, Nuria Calvet, & Lee Hartmann.* 586, 1148 (2003)

The Binary Jet in L1551 IRS 5. *Luis F. Rodríguez, Alicia Porras, Mark J. Claussen, Salvador Curiel, David J. Wilner, & Paul T. P. Ho.* 586, L137 (2003)

Alphanumeric: LkCa 15

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

Alphanumeric: 2MASSI J12171110−0311131

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Alphanumeric: 2MASSI J12255432−2739466

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Alphanumeric: 2MASSI J15344984−2952274

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Alphanumeric: 2MASSI J1628137−243139

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Alphanumeric: SAO 26804

Mid-Infrared Imaging of the First-Ascent Giant HD 233517. *R. Scott Fisher, C. M. Telesco, Robert K. Piña, & Roger F. Knacke.* 586, L91 (2003)

Alphanumeric: sc26_2218

A Brown Dwarf Microlens Candidate from the Second Phase of the Optical Gravitational Lensing Experiment. *Martin C. Smith, Shude Mao, & Przemysław Woźniak.* 585, L65 (2003)

Alphanumeric: SGR 1900+14

An Extended Burst Tail from SGR 1900+14 with a Thermal X-Ray Spectrum. *Geoffrey T. Lenters, Peter M. Woods, Johnathan E. Goupell, Chryssa Kouveliotou, Ersin Goegus, Kevin Hurley, Dmitry Frederiks, Sergey Golenetskii, & Jean Swank.* 587, 761 (2003)

Alphanumeric: WD 2331−475

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

Alphanumeric: XTE J1650−500

X-Ray Temporal Properties of XTE J1650−500 during Outburst Decay. *E. Kalemci, J. A. Tomsick, R. E. Rothschild, K. Pottschmidt, S. Corbel, R. Wijnands, J. M. Miller, & P. Kaaret.* 586, 419 (2003)

High-Frequency Quasi-Periodic Oscillations in the Black Holes X-Ray Transient XTE J1650−500. *Jeroen Homan, Marc Klein-Wolt, Sabrina Rossi, Jon M. Miller, Rudy Wijnands, Tomaso Belloni, Michiel van der Klis, & Walter H. G. Lewin.* 586, 1262 (2003)

Alphanumeric: XTE J2123−058

The Optical Light Curves of XTE J2123−058. III. The Mass of the Binary Components and the Structure of the Quiescent Accretion Disk. *T. Shahbaz, C. Zurita, J. Casares, G. Dubus, P. A. Charles, R. Mark Wagner, & E. Ryan.* 585, 443 (2003)

STARS: INTERIORS

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

Magnetic Fields in Massive Stars. II. The Buoyant Rise of Magnetic Flux Tubes through the Radiative Interior. *K. B. MacGregor & J. P. Cassinelli.* 586, 480 (2003)

White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. I. Analytical Approach. *Sylvie Vauclair & Sylvie Théado.* 587, 777 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

STARS: KINEMATICS

A Critical Examination of Halo White Dwarf Candidates. *P. Bergeron.* 586, 201 (2003)

STARS: LATE-TYPE

Discovery of an Ultracool Subdwarf: LSR 1425+7102, the First Star with Spectral Type sdM8.0. *Sébastien Lépine, Michael M. Shara, & R. Michael Rich.* 585, L69 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

Transition from L to T Dwarfs of the Color-Magnitude Diagram. *Takashi Tsuji & Tadashi Nakajima.* 585, L151 (2003)

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

STARS: LOW-MASS, BROWN DWARFS

A Survey for Circumstellar Disks around Young Substellar Objects. *Michael C. Liu, Joan Najita, & Alan T. Tokunaga.* 585, 372 (2003)

A Brown Dwarf Microlens Candidate from the Second Phase of the Optical Gravitational Lensing Experiment. *Martin C. Smith, Shude Mao, & Przemysław Woźniak.* 585, L65 (2003)

Discovery of an Ultracool Subdwarf: LSR 1425+7102, the First Star with Spectral Type sdM8.0. *Sébastien Lépine, Michael M. Shara, & R. Michael Rich.* 585, L69 (2003)

Transition from L to T Dwarfs of the Color-Magnitude Diagram. *Takashi Tsuji & Tadashi Nakajima.* 585, L151 (2003)

Explaining the Observed Polarization from Brown Dwarfs by Single Dust Scattering. *Sujan Sengupta.* 585, L155 (2003)

Binarity in Brown Dwarfs: T Dwarf Binaries Discovered with the *Hubble Space Telescope* Wide Field Planetary Camera 2. *Adam J. Burgasser, J. Davy Kirkpatrick, I. Neill Reid, Michael E. Brown, Cherie L. Miskey, & John E. Gizis.* 586, 512 (2003)

Modeling the Formation of Clouds in Brown Dwarf Atmospheres. *Curtis S. Cooper, David Sudarsky, John A. Milsom, Jonathan I. Lumine, & Adam Burrows.* 586, 1320 (2003)

A Planetary Companion to HD 40979 and Additional Planets Orbiting HD 12661 and HD 38529. *Debra A. Fischer, Geoffrey W. Marcy, R. Paul Butler, Steven S. Vogt, Gregory W. Henry, Dimitri Pourbaix, Bernard Walp, Anthony A. Misch, & Jason T. Wright.* 586, 1394 (2003)

The Galactic Disk Mass Function: Reconciliation of the *Hubble Space Telescope* and Nearby Determinations. *Gilles Chabrier.* 586, L133 (2003)

LSR 0602+3910: Discovery of a Bright Nearby L-Type Brown Dwarf. *Samir Salim, Sébastien Lépine, R. Michael Rich, & Michael M. Shara.* 586, L149 (2003)

Detection of Nine M8.0–L0.5 Binaries: The Very Loss Mass Binary Population and Its Implications for Brown Dwarf and Very Low Mass Star Formation.

Laird M. Close, Nick Siegler, Melanie Freed, & Beth Biller. 587, 407 (2003)

Coronal X-Ray Emission from an Intermediate-Age Brown Dwarf. *Yohko Tsuboi, Yoshitomo Maeda, Eric D. Feigelson, Gordon P. Garmire, George Chartas, Koji Mori, & Steven H. Pravdo.* 587, L51 (2003)

STARS: LUMINOSITY FUNCTION, MASS FUNCTION

The Galactic Disk Mass Function: Reconciliation of the *Hubble Space Telescope* and Nearby Determinations. *Gilles Chabrier.* 586, L133 (2003)

STARS: MAGNETIC FIELDS

Magnetic Protoneutron Star Winds and r-Process Nucleosynthesis. *Todd A. Thompson.* 585, L33 (2003)

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

Magnetic Fields in Massive Stars. II. The Buoyant Rise of Magnetic Flux Tubes through the Radiative Interior. *K. B. MacGregor & J. P. Cassinelli.* 586, 480 (2003)

Evidence of a Cyclotron Feature in the Spectrum of the Anomalous X-Ray Pulsar 1RXS J170849−400910. *Nanda Rea, Gian Luca Israel, Luigi Stella, Tim Oosterbroek, Sandro Mereghetti, Lorella Angelini, Sergio Campana, & Stefano Covino.* 586, L65 (2003)

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

Dynamo Action in Magnetohydrodynamics and Hall-Magnetohydrodynamics. *Pablo D. Mininni, Daniel O. Gómez, & Swadesh M. Mahajan.* 587, 472 (2003)

STARS: MASS LOSS

Shaping Proto–Planetary and Young Planetary Nebulae with Collimated Fast Winds. *Chin-Fei Lee & Raghvendra Sahai.* 586, 319 (2003)

Detection of HCN Direct l-Type Transitions Probing Hot Molecular Gas in the Proto–Planetary Nebula CRL 618. *S. Thorwirth, F. Wyrowski, P. Schilke, K. M. Menten, S. Brünken, H. S. P. Müller, & G. Winnewisser.* 586, 338 (2003)

Physical Conditions in the Proto–Planetary Nebula CRL 618 Derived from Observationss of Vibrationally Excited HC_3N. *F. Wyrowski, P. Schilke, S. Thorwirth, K. M. Menten, & G. Winnewisser.* 586, 344 (2003)

Interchange Method in Compressible Magnetized Couette Flow: Magnetorotational and Magnetoconvective Instabilities. *Dimitris M. Christodoulou, John Contopoulos, & Demosthenes Kazanas.* 586, 372 (2003)

Latitude-dependent Effects in the Stellar Wind of η Carinae. *Nathan Smith, Kris Davidson, Theodore R. Gull, Kazunori Ishibashi, & D. John Hillier.* 586, 432 (2003)

High-Resolution *Chandra* Spectroscopy of τ Scorpii: A Narrow-Line X-Ray Spectrum from a Hot Star. *David H. Cohen, Geneviève E. de Messières, Joseph J. MacFarlane, Nathan A. Miller, Joseph P. Cassinelli, Stanley P. Owocki, & Duane A. Liedahl.* 586, 495 (2003)

An Icy, Bipolar Proto–Planetary Nebula with Knotty Jets: IRAS 22036+5306. *R. Sahai, A. Zijlstra, C. Sánchez Contreras, & M. Morris.* 586, L81 (2003)

A Radio Flare from GRB 020405: Evidence for a Uniform Medium around a Massive Stellar Progenitor. *E. Berger, A. M. Soderberg, D. A. Frail, & S. R. Kulkarni.* 587, L5 (2003)

Are TiC Grains a Carrier of the 21 Micron Emission Band Observed around Post–Asymptotic Giant Branch Objects? *Takeshi Chigai, Tetsuo Yamamoto, Chihiro Kaito, & Yuki Kimura.* 587, 771 (2003)

STARS: NEUTRON

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

Magnetic Protoneutron Star Winds and r-Process Nucleosynthesis. *Todd A. Thompson.* 585, L33 (2003)

The Pulsar Wind Nebula Torus of PSR J0538+2817 and the Origin of Pulsar Velocities. *Roger W. Romani & C.-Y. Ng.* 585, L41 (2003)

The Quiescent Counterpart of the Soft Gamma-Ray Repeater SGR 0526−66. *S. R. Kulkarni, D. L. Kaplan, H. L. Marshall, D. A. Frail, T. Murakami, & D. Yonetoku.* 585, 948 (2003)

Equation of State and Opacities for Hydrogen Atmospheres of Neutron Stars with Strong Magnetic Fields. *Alexander Y. Potekhin & Gilles Chabrier.* 585, 955 (2003)

Polarized Gravitational Waves from Gamma-Ray Bursts. *Shiho Kobayashi & Peter Mészáros.* 585, L89 (2003)

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

r-Modes of Neutron Stars with Superfluid Cores. *Umin Lee & Shijun Yoshida.* 586, 403 (2003)

Detectability of Gravitational Waves from SN 1987A. *Giovanni Santostasi, Warren Johnson, & Juhan Frank.* 586, 1191 (2003)

Gamma-Ray Bursts from Delayed Collapse of Neutron Stars to Quark Matter Stars. *Z. Berezhiani, I. Bombaci, A. Drago, F. Frontera, & A. Lavagno.* 586, 1250 (2003)

The Evolution of LMC X-4 Flares: Evidence for Super Eddington Radiation Oosing through Inhomogeneous Polar Cap Accretion Flows? *Dae-Sik Moon, Stephen S. Eikenberry, & Ira M. Wasserman.* 586, 1280 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

Chandra Observations of the Anomalous X-Ray Pulsar 4U 0142+61. *Sandeep K. Patel, Chryssa Kouveliotou, Peter M. Woods, Allyn F. Tennant, Martin C. Weisskopf, Mark H. Finger, Colleen Wilson-Hodge, Ersin Gogus, Michiel van der Klis, & Tomaso Belloni.* 587, 367 (2003)

X-Ray Spectroscopy of the Accreting Millisecond Pulsar XTE J0929−314 in Outburst. *Adrienne M. Juett, Duncan K. Galloway, & Deepto Chakrabarty.* 587, 754 (2003)

An Extended Burst Tail from SGR 1900+14 with a Thermal X-Ray Spectrum. *Geoffrey T. Lenters, Peter M. Woods, Johnathan E. Goupell, Chryssa Kouveliotou, Ersin Goegus, Kevin Hurley, Dmitry Frederiks, Sergey Golenetskii, & Jean Swank.* 587, 761 (2003)

STARS: NOVAE, CATACLYSMIC VARIABLES

Modeling Accretional Heating in Dwarf Novae. *Patrick Godon & Edward M. Sion.* 586, 427 (2003)

Two Types of X-Ray Spectra in Cataclysmic Variables. *Koji Mukai, A. Kinkhabwala, J. R. Peterson, S. M. Kahn, & F. Paerels.* 586, L77 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

Hubble Space Telescope Space Telescope Imaging Spectrograph Spectroscopy of the Intermediate Polar EX Hydrae. *Kunegunda E. Belle, Steve B. Howell, Edward M. Sion, Knox S. Long, & Paula Szkody.* 587, 373 (2003)

High-Velocity Jets in Recurrent Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 587, L39 (2003)

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

STARS: OSCILLATIONS

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

Fuel-Supply–limited Stellar Relaxation Oscillations: Application to Multiple Rings around Asymptotic Giant Branch Stars and Planetary Nebulae. *Hugh M. Van Horn, John H. Thomas, Adam Frank, & Eric G. Blackman.* 585, 983 (2003)

The Critical Rotation of Strange Stars and Rapidly Rotating Pulsars. *Xiaoping Zheng, Shuhua Yang, & Jiarong Li.* 585, L135 (2003)

r-Modes of Neutron Stars with Superfluid Cores. *Umin Lee & Shijun Yoshida.* 586, 403 (2003)

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

High-Frequency Quasi-Periodic Oscillations in the Black Holes X-Ray Transient XTE J1650−500. *Jeroen Homan, Marc Klein-Wolt, Sabrina Rossi, Jon M. Miller, Rudy Wijnands, Tomaso Belloni, Michiel van der Klis, & Walter H. G. Lewin.* 586, 1262 (2003)

White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)

STARS: PLANETARY SYSTEMS

A Unique Solution of Planet and Star Parameters from an Extrasolar Planet Transit Light Curve. *S. Seager & G. Mallén-Ornelas.* 585, 1038 (2003)

Could the 55 Cancri Planetary System Really Be in the 3:1 Mean Motion Resonance? *Jianghui Ji, Hiroshi Kinoshita, Lin Liu, & Guangyu Li.* 585, L139 (2003)

Method for Spot Detection on Solar-like Stars. *Adriana V. R. Silva.* 585, L147 (2003)

A Planetary Companion to HD 40979 and Additional Planets Orbiting HD 12661 and HD 38529. *Debra A. Fischer, Geoffrey W. Marcy, R. Paul Butler, Steven S. Vogt, Gregory W. Henry, Dimitri Pourbaix, Bernard Walp, Anthony A. Misch, & Jason T. Wright.* 586, 1394 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

Four New Planets Orbiting Metal-Enriched Stars. *C. G. Tinney, R. Paul Butler, Geoffrey W. Marcy, Hugh R. A. Jones, Alan J. Penny, Chris McCarthy, Brad D. Carter, & Jade Bond.* 587, 423 (2003)

"Weather" Variability of Close-in Extrasolar Giant Planets. *Kristen Menou, James Y-K. Cho, Sara Seager, & Bradley M. S. Hansen.* 587, L113 (2003)

The Changing Face of the Extrasolar Giant Planet HD 209458b. *Kristen Menou, James Y-K. Cho, Bradley M. S. Hansen, & Sara Seager.* 587, L117 (2003)

STARS: PLANETARY SYSTEMS: FORMATION

Eccentricity Evolution for Planets in Gaseous Disks. *Peter Goldreich & Re'em Sari.* 585, 1024 (2003)

Halting Planet Migration by Photoevaporation from the Central Source. *Isamu Matsuyama, Doug Johnstone, & Norman Murray.* 585, L143 (2003)

Orbital Migration and Mass Accretion of Protoplanets in Three-dimensional Global Computations with Nested Grids. *Gennaro D'Angelo, Willy Kley, & Thomas Henning.* 586, 540 (2003)

Eccentricity Evolution of Extrasolar Multiple Planetary Systems Due to the Depletion of Nascent Protostellar Disks. *M. Nagasawa, D. N. C. Lin, & S. Ida.* 586, 1374 (2003)

STARS: PLANETARY SYSTEMS: PROTOPLANETARY DISKS

A Survey for Circumstellar Disks around Young Substellar Objects. *Michael C. Liu, Joan Najita, & Alan T. Tokunaga.* 585, 372 (2003)

Eccentricity Evolution for Planets in Gaseous Disks. *Peter Goldreich & Re'em Sari.* 585, 1024 (2003)

Halting Planet Migration by Photoevaporation from the Central Source. *Isamu Matsuyama, Doug Johnstone, & Norman Murray.* 585, L143 (2003)

Expansion of the R4 H_2O Maser Arc near Cepheus A HW2. *J. F. Gallimore, R. J. Cool, M. D. Thornley, & J. McMullin.* 586, 306 (2003)

Eccentricity Evolution of Extrasolar Multiple Planetary Systems Due to the Depletion of Nascent Protostellar Disks. *M. Nagasawa, D. N. C. Lin, & S. Ida.* 586, 1374 (2003)

Numerous Proplyd Candidates in the Harsh Environment of the Carina Nebula. *Nathan Smith, John Bally, & Jon A. Morse.* 587, L105 (2003)

STARS: POPULATION II

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivezić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

Measurement of the Europium Isotope Ratio for the Extremely Metal poor, r-Process–enhanced Star CS 31082-001. *Wako Aoki, Satoshi Honda, Timothy C. Beers, & Christopher Sneden.* 586, 506 (2003)

STARS: PRE–MAIN-SEQUENCE

A Survey for Circumstellar Disks around Young Substellar Objects. *Michael C. Liu, Joan Najita, & Alan T. Tokunaga.* 585, 372 (2003)

Mid-Infrared Imaging of the Protostellar Binary L1448N IRS 3(A,B). *David R. Ciardi, Charles M. Telesco, Jonathan P. Williams, R. Scott Fisher, Chris Packham, Robert Piña, & James Radomski.* 585, 392 (2003)

Comments on Inferences of Star Formation Histories and Birth Lines. *Lee Hartmann.* 585, 398 (2003)

Detection of Crystalline Silicates around the T Tauri Star Hen 3-600A. *Mitsuhiko Honda, Hirokazu Kataza, Yoshiko K. Okamoto, Takashi Miyata, Takuya Yamashita, Shigeyuki Sako, Shinya Takubo, & Takashi Onaka.* 585, L59 (2003)

Spatial Study with the Very Large Telescope of a New Resolved Edge-on Circumstellar Dust Disk Discovered at the Periphery of the ρ Ophiuchi Dark Cloud. *N. Grosso, J. Alves, K. Wood, R. Neuhäuser, T. Montmerle, & J. E. Bjorkman.* 586, 296 (2003)

Expansion of the R4 H_2O Maser Arc near Cepheus A HW2. *J. F. Gallimore, R. J. Cool, M. D. Thornley, & J. McMullin.* 586, 306 (2003)

Interactions between a Bright Young Stellar Object and the *Micourse Space Experiment* Infrared-dark Cloud G79.3+0.3: An Early Stage of Triggered Star Formation? *R. O. Redman, P. A. Feldman, F. Wyrowski, S. Côté, S. J. Carey, & M. P. Egan.* 586, 1127 (2003)

Detections of Rovibrational H_2 Emission from the Disks of T Tauri Stars. *Jeffrey S. Bary, David A. Weintraub, & Joel H. Kastner.* 586, 1136 (2003)

A Comprehensive Study of the L1551 IRS 5 Binary System. *Mayra Osorio, Paolo D'Alessio, James Muzerolle, Nuria Calvet, & Lee Hartmann.* 586, 1148 (2003)

Ejection of a Low-Mass Star in a Young Stellar System in Taurus. *Laurent Loinard, Luis F. Rodríquez, & Monica I. Rodríguez.* 587, L47 (2003)

Evidence for Grain Growth in the Protostellar Disks of Orion. *R. Y. Shuping, John Bally, Mark Morris, & Henry Throop.* 587, L109 (2003)

STARS: PULSARS: GENERAL

Evidence of a Cyclotron Feature in the Spectrum of the Anomalous X-Ray Pulsar 1RXS J170849−400910. *Nanda Rea, Gian Luca Israel, Luigi Stella, Tim Oosterbroek, Sandro Mereghetti, Lorella Angelini, Sergio Campana, & Stefano Covino.* 586, L65 (2003)

Detectability of Gravitational Waves from SN 1987A. *Giovanni Santostasi, Warren Johnson, & Juhan Frank.* 586, 1191 (2003)

STARS: PULSARS: INDIVIDUAL

Alphanumeric: B0943+10

Drifting Subpulses in PSR B0943+10. *Janusz A. Gil & Marek Sendyk.* 585, 453 (2003)

Alphanumeric: LMC X-4

The Evolution of LMC X-4 Flares: Evidence for Super Eddington Radiation Oosing through Inhomogeneous Polar Cap Accretion Flows? *Dae-Sik Moon, Stephen S. Eikenberry, & Ira M. Wasserman.* 586, 1280 (2003)

Alphanumeric: PSR J0538+2817

The Pulsar Wind Nebula Torus of PSR J0538+2817 and the Origin of Pulsar Velocities. *Roger W. Romani & C.-Y. Ng.* 585, L41 (2003)

Alphanumeric: SGR 0526−66

The Quiescent Counterpart of the Soft Gamma-Ray Repeater SGR 0526−66. *S. R. Kulkarni, D. L. Kaplan, H. L. Marshall, D. A. Frail, T. Murakami, & D. Yonetoku.* 585, 948 (2003)

Alphanumeric: XTE J0929−314

X-Ray Spectroscopy of the Accreting Millisecond Pulsar XTE J0929−314 in Outburst. *Adrienne M. Juett, Duncan K. Galloway, & Deepto Chakrabarty.* 587, 754 (2003)

STARS: ROTATION

The Pulsar Wind Nebula Torus of PSR J0538+2817 and the Origin of Pulsar Velocities. *Roger W. Romani & C.-Y. Ng.* 585, L41 (2003)

The Critical Rotation of Strange Stars and Rapidly Rotating Pulsars. *Xiaoping Zheng, Shuhua Yang, & Jiarong Li.* 585, L135 (2003)

r-Modes of Neutron Stars with Superfluid Cores. *Umin Lee & Shijun Yoshida.* 586, 403 (2003)

On the Rotational Evolution of Solar- and Late-Type Stars, Its Magnetic Orgins, and the Possibility of Stellar Gyrochronology. *Sydney A. Barnes.* 586, 464 (2003)

A Connection between the Morphology of the X-Ray Emission and Rotation for Solar-Type Stars in Open Clusters. *Sydney A. Barnes.* 586, L145 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. I. Analytical Approach. *Sylvie Vauclair & Sylvie Théado.* 587, 777 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. II. Numerical Approach. *Sylvie Théado & Sylvie Vauclair.* 587, 784 (2003)

On the Coupling between Helium Settling and Rotation-induced Mixing in Stellar Radiative Zones. III. Applications to Light Elements in Population I Main-Sequence Stars. *Sylvie Théado & Sylvie Vauclair.* 587, 795 (2003)

STARS: SPOTS

Method for Spot Detection on Solar-like Stars. *Adriana V. R. Silva.* 585, L147 (2003)

STARS: SUBDWARFS

Discovery of an Ultracool Subdwarf: LSR 1425+7102, the First Star with Spectral Type sdM8.0. *Sébastien Lépine, Michael M. Shara, & R. Michael Rich.* 585, L69 (2003)

STARS: SUPERNOVAE: GENERAL

Constraints on Cardassian Expansion from Distant Type Ia Supernovae. *Zhong-Hong Zhu & Masa-Katsu Fujimoto.* 585, 52 (2003)

p-Process Nucleosynthesis inside Supernova-driven Supercritical Accretion Disks. *Shin-ichirou Fujimoto, Masa-aki Hashimoto, Osamu Koike, Kenzo Arai, & Ryuichi Matsuba.* 585, 418 (2003)

Corrective Lenses for High-Redshift Supernovae. *Neal Dalal, Daniel E. Holz, Xuelei Chen, & Joshua A. Frieman.* 585, L11 (2003)

Magnetic Protoneutron Star Winds and *r*-Process Nucleosynthesis. *Todd A. Thompson.* 585, L33 (2003)

Ozone Depletion from Nearby Supernovae. *Neil Gehrels, Claude M. Laird, Charles H. Jackman, John K. Cannizzo, Barbara J. Mattson, & Wan Chen.* 585, 1169 (2003)

Excavation of the First Stars. *Toshikazu Shigeyama, Takuji Tsujimoto, & Yuzuru Yoshii.* 586, L57 (2003)

Very Long Baseline Array Continuum and H I Absorption Observations of the Ultraluminous Infrared Galaxy IRAS 17208−0014. *Emmanuel Momjian, Jonathan D. Romney, Christopher L. Carilli, Thomas H. Troland, & Gregory B. Taylor.* 587, 160 (2003)

Electron Neutrino Pair Annihilation: A New Source for Muon and Tau Neutrinos in Supernovae. *Robert Buras, Hans-Thomas Janka, Mathias Th. Keil, Georg G. Raffelt, & Markus Rampp.* 587, 320 (2003)

The Nonlinear Evolution of Massive Stellar Core Collapses That "Fizzle." *James N. Imamura, Brian K. Pickett, & Richard H. Durisen.* 587, 341 (2003)

The Rate and the Origin of Type Ia Supernovae in Radio Galaxies. *Massimo Della Valle & Nino Panagia.* 587, L71 (2003)

STARS: SUPERNOVAE: INDIVIDUAL

Alphanumeric: SN 1006

The SN 1006 Remnant: Optical Proper Motions, Deep Imaging, Distance, and Brightness at Maximum. *P. Frank Winkler, Gaurav Gupta, & Knox S. Long.* 585, 324 (2003)

Alphanumeric: SN 1987A

Ozone Depletion from Nearby Supernovae. *Neil Gehrels, Claude M. Laird, Charles H. Jackman, John K. Cannizzo, Barbara J. Mattson, & Wan Chen.* 585, 1169 (2003)

Detectability of Gravitational Waves from SN 1987A. *Giovanni Santostasi, Warren Johnson, & Juhan Frank.* 586, 1191 (2003)

Alphanumeric: SN 1993W

Determination of Primordial Metallicity and Mixing in the Type II-P Supernova 1993W. *E. Baron, Peter E. Nugent, David Branch, Peter H. Hauschildt, M. Turatto, & E. Cappellaro.* 586, 1199 (2003)

STARS: VARIABLES: CEPHEIDS

Reconstructing Cepheid Light Curve with Fourier Techniques. I. The Fourier Expansion and Interrelations. *Chow-Choong Ngeow, Shashi M. Kanbur, Sergei Nikolaev, Nial R. Tanvir, & Martin A. Hendry.* 586, 959 (2003)

STARS: VARIABLES: OTHER

A Pulsation Mechanism for GW Virginis Variables. *Arthur N. Cox.* 585, 975 (2003)

The Position of Sagittarius A*. II. Accurate Positions and Proper Motions of Stellar SiO Masers near the Galactic Center. *M. J. Reid, K. M. Menten, R. Genzel, T. Ott, R. Schödel, & A. Eckart.* 587, 208 (2003)

STARS: WHITE DWARFS

A Critical Examination of Halo White Dwarf Candidates. *P. Bergeron.* 586, 201 (2003)

Modeling Accretional Heating in Dwarf Novae. *Patrick Godon & Edward M. Sion.* 586, 427 (2003)

Cool Companions to White Dwarfs from the Two Micron All-Sky Survey Second Incremental Data Release. *Stefanie Wachter, D. W. Hoard, Kathryn H. Hansen, Rebecca E. Wilcox, Hilda M. Taylor, & Steven L. Finkelstein.* 586, 1356 (2003)

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

Hubble Space Telescope Space Telescope Imaging Spectrograph Spectroscopy of the Intermediate Polar EX Hydrae. *Kunegunda E. Belle, Steve B. Howell, Edward M. Sion, Knox S. Long, & Paula Szkody.* 587, 373 (2003)

White Dwarf Asteroseismology and the $^{12}C(\alpha, \gamma)^{16}O$ Rate. *Travis S. Metcalfe.* 587, L43 (2003)

STARS: WINDS, OUTFLOWS

Magnetic Protoneutron Star Winds and *r*-Process Nucleosynthesis. *Todd A. Thompson.* 585, L33 (2003)

Ram Pressure Stripping in Planetary Nebulae. *Eva Villaver, Guillermo García-Segura, & Arturo Manchado.* 585, L49 (2003)

Shaping Proto–Planetary and Young Planetary Nebulae with Collimated Fast Winds. *Chin-Fei Lee & Raghvendra Sahai.* 586, 319 (2003)

Latitude-dependent Effects in the Stellar Wind of η Carinae. *Nathan Smith, Kris Davidson, Theodore R. Gull, Kazunori Ishibashi, & D. John Hillier.* 586, 432 (2003)

Multiple Molecular H_2 Outflows in AFGL 618. *P. Cox, P. J. Huggins, J.-P. Maillard, C. Muthu, R. Bachiller, & T. Forveille.* 586, L87 (2003)

Constraints on the Ionization Balance of Hot-Star Winds from *FUSE* Observations of O Stars in the Large Magellanic Cloud. *D. Massa, A. W. Fullerton, G. Sonneborn, & J. B. Hutchings.* 586, 996 (2003)

High-Velocity Jets in Recurrent Nova Outbursts. *Mariko Kato & Izumi Hachisu.* 587, L39 (2003)

STELLAR DYNAMICS

Orbital Decay and Tidal Disruption of a Star Cluster: Analytical Calculation. *Hideaki Mouri & Yoshiaki Taniguchi.* 585, 250 (2003)

Helium-Core White Dwarfs in Globular Clusters. *Brad M. S. Hansen, Vassiliki Kalogera, & Frederic A. Rasio.* 586, 1364 (2003)

The Janus Head of the HD 12661 Planetary System. *Krzysztof Goździewski & Andrzej J. Maciejewski.* 586, L153 (2003)

Bars and Dark Matter Halo Cores. *J. A. Sellwood.* 587, 638 (2003)

SUBMILLIMETER

The Properties of Microjansky Radio Sources in the Hubble Deep Field–North, SSA 13, and SSA 22 Fields. *S. C. Chapman, A. J. Barger, L. L. Cowie, D. Scott, C. Borys, P. Capak, E. B. Fomalont, G. F. Lewis, E. A. Richards, A. T. Steffen, G. Wilson, & M. Yun.* 585, 57 (2003)

CO $J = 7 \rightarrow 6$ Observations of NGC 253: Cosmic-Ray–heated Warm Molecular Gas. *C. M. Bradford, T. Nikola, G. J. Stacey, A. D. Bolatto, J. M. Jackson, M. L. Savage, J. A. Davidson, & S. J. Higdon.* 586, 891 (2003)

The Canada-UK Deep Submillimeter Survey. VI. The 3 Hour Field. *T. M. Webb, S. A. Eales, S. J. Lilly, D. L. Clements, L. Dunne, W. K. Gear, R. J. Ivison, H. Flores, & M. Yun.* 587, 41 (2003)

A ^{12}CO Map of M82: The Significance of Warm Molecular Gas. *John S. Ward, Jonas Zmuidzinas, Andrew I. Harris, & Kate G. Isaak.* 587, 171 (2003)

SUN: ABUNDANCES

Elemental Abundances for the 1996 Streamer Belt. *M. Uzzo, Y.-K. Ko, J. C. Raymond, P. Wurz, & F. M. Ipavich.* 585, 1062 (2003)

SUN: ACTIVITY

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

Nonthermal Mass Motions within the High-Temperature Plasmas above a Complex Solar Active Region. *U. Feldman, E. Landi, & W. Curdt.* 585, 1087 (2003)

Hot Spots for Solar Flares Persisting for Decades: Longitude Distributions of Flares of Cycles 19–23. *T. Bai.* 585, 1114 (2003)

Evolution of Conjugate Footpoints inside Flare Ribbons during a Great Two-Ribbon Flare on 2001 April 10. *Ayumi Asai, Takako T. Ishii, Hiroki Kurokawa, Takaaki Yokoyama, & Masumi Shimojo.* 586, 624 (2003)

Chromospheric Evaporation and Warm Rain during a Solar Flare Observed in High Time Resolution with the Coronal Diagnostic Spectrometer aboard the *Solar and Heliospheric Observatory*. *Jeffrey W. Brosius.* 586, 1417 (2003)

Transition Region and Coronal Explorer and Soft X-Ray Telescope Active Region Loop Observations: Comparisons with Static Solutions of the Hydrodynamic Equations. *Amy R. Winebarger, Harry P. Warren, & John T. Mariska.* 587, 439 (2003)

SUN: ATMOSPHERE

Injection of Magnetic Energy and Magnetic Helicity into the Solar Atmosphere by an Emerging Magnetic Flux Tube. *T. Magara & D. W. Longcope.* 586, 630 (2003)

SUN: ATMOSPHERIC MOTIONS

Motions of Isolated *G*-Band Bright Points in the Solar Photosphere. *P. Nisenson, A. A. van Ballegooijen, A. G. de Wijn, & P. Suetterlin.* 587, 458 (2003)

SUN: CHROMOSPHERE

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

Evolution of Conjugate Footpoints inside Flare Ribbons during a Great Two-Ribbon Flare on 2001 April 10. *Ayumi Asai, Takako T. Ishii, Hiroki Kurokawa, Takaaki Yokoyama, & Masumi Shimojo.* 586, 624 (2003)

Photospheric Sources and Brightening of the Internetwork Chromosphere. *A. C. Cadavid, J. K. Lawrence, T. E. Berger, & A. Ruzmaikin.* 586, 1409 (2003)

Observational Evidence for Mode Coupling in the Chromospheric Network. *R. T. James McAteer, Peter T. Gallagher, David R. Williams, Mihalis Mathioudakis, D. Shaun Bloomfield, Kenneth J. H. Phillips, & Francis P. Keenan.* 587, 806 (2003)

SUN: CORONA

Spectroscopic Studies of the Solar Corona. IV. Physical Properties of Coronal Structure. *Jagdev Singh, Kiyoshi Ichimoto, Takashi Sakurai, & S. Muneer.* 585, 516 (2003)

Elemental Abundances for the 1996 Streamer Belt. *M. Uzzo, Y.-K. Ko, J. C. Raymond, P. Wurz, & F. M. Ipavich.* 585, 1062 (2003)

Nonthermal Mass Motions within the High-Temperature Plasmas above a Complex Solar Active Region. *U. Feldman, E. Landi, & W. Curdt.* 585, 1087 (2003)

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

Prominence Eruptions and Coronal Mass Ejection: A Statistical Study using Microwave Observations. *N Gopalswamy, M. Shimojo, W. Lu, S. Yashiro, K. Shibasaki, & R. A. Howard.* 586, 562 (2003)

The Long-Term Evolution of AR 7978: The Scalings of the Coronal Plasma Parameters with the Mean Photospheric Magnetic Field. *L. van Driel-Gesztelyi, P. Démoulin, C. H. Mandrini, L. Harra, & J. A. Klimchuk.* 586, 579 (2003)

The Long-Term Evolution of AR 7978: Testing Coronal Heating Models. *P. Démoulin, L. van Driel-Gesztelyi, C. H. Mandrini, J. A. Klimchuk, & L. Harra.* 586, 592 (2003)

Chromospheric Evaporation and Warm Rain during a Solar Flare Observed in High Time Resolution with the Coronal Diagnostic Spectrometer aboard the *Solar and Heliospheric Observatory*. *Jeffrey W. Brosius.* 586, 1417 (2003)

Imaging and Spectroscopic Investigations of a Solar Coronal Wave: Properties of the Wave Front and Associated Erupting Material. *Louise K. Harra & Alphonse C. Sterling.* 587, 429 (2003)

Transition Region and Coronal Explorer and Soft X-Ray Telescope Active Region Loop Observations: Comparisons with Static Solutions of the Hydrodynamic Equations. *Amy R. Winebarger, Harry P. Warren, & John T. Mariska.* 587, 439 (2003)

The Solar Wind and Its Magnetic Sources at Sunspot Maximum. *Y.-M. Wang & N. R. Sheeley, Jr.* 587, 818 (2003)

Experimental Transition Rate of the Green Coronal Line of Fe XIV. *P. Beiersdorfer, E. Trabert, & E. H. Pinnington.* 587, 836 (2003)

SUN: CORONAL MASS EJECTIONS (CMES)

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

Prominence Eruptions and Coronal Mass Ejection: A Statistical Study using Microwave Observations. *N Gopalswamy, M. Shimojo, W. Lu, S. Yashiro, K. Shibasaki, & R. A. Howard.* 586, 562 (2003)

Low Coronal Signatures of Large Solar Energetic Particle Events. *Nariaki V. Nitta, Edward W. Cliver, & Allan J. Tylka.* 586, L103 (2003)

The Origin of High-Energy ^{3}He-rich Solar Particle Events. *L. Kocharov & J. Torsti.* 586, 1430 (2003)

Imaging and Spectroscopic Investigations of a Solar Coronal Wave: Properties of the Wave Front and Associated Erupting Material. *Louise K. Harra & Alphonse C. Sterling.* 587, 429 (2003)

SUN: FACULAE, PLAGES

Motions of Isolated *G*-Band Bright Points in the Solar Photosphere. *P. Nisenson, A. A. van Ballegooijen, A. G. de Wijn, & P. Suetterlin.* 587, 458 (2003)

SUN: FILAMENTS

Prominence Eruptions and Coronal Mass Ejection: A Statistical Study using Microwave Observations. *N Gopalswamy, M. Shimojo, W. Lu, S. Yashiro, K. Shibasaki, & R. A. Howard.* 586, 562 (2003)

SUN: FLARES

Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)

Coronal Mass Ejection: Initiation, Magnetic Helicity, and Flux Ropes. I. Boundary Motion–driven Evolution. *T. Amari, J. F. Luciani, J. J. Aly, Z. Mikic, & J. Linker.* 585, 1073 (2003)

Hot Spots for Solar Flares Persisting for Decades: Longitude Distributions of Flares of Cycles 19–23. *T. Bai.* 585, 1114 (2003)

The Effects of Low- and High-Energy Cutoffs on Solar Flare Microwave and Hard X-Ray Spectra. *Gordon D. Holman.* 586, 606 (2003)

Cause of Proton Depletion in Solar Impulsive Particle Events. *K. Ohki.* 586, 617 (2003)

Evolution of Conjugate Footpoints inside Flare Ribbons during a Great Two-Ribbon Flare on 2001 April 10. *Ayumi Asai, Takako T. Ishii, Hiroki Kurokawa, Takaaki Yokoyama, & Masumi Shimojo.* 586, 624 (2003)

Low Coronal Signatures of Large Solar Energetic Particle Events. *Nariaki V. Nitta, Edward W. Cliver, & Allan J. Tylka.* 586, L103 (2003)

Chromospheric Evaporation and Warm Rain during a Solar Flare Observed in High Time Resolution with the Coronal Diagnostic Spectrometer aboard the *Solar and Heliospheric Observatory*. *Jeffrey W. Brosius.* 586, 1417 (2003)

Petschek-like Reconnection with Current-driven Anomalous Resistivity and Its Application to Solar Flares. *Dmitri A. Uzdensky.* 587, 450 (2003)

Gyrosynchrotron Emission from Anisotropic Electron Distributions. *G. D. Fleishman & V. F. Melnikov.* 587, 823 (2003)

SUN: HELIOSEISMOLOGY

Changes in Solar Dynamics from 1995 to 2002. *Sarbani Basu & H. M. Antia.* 585, 553 (2003)

Temporal Variation of Angular Momentum in the Solar Convection Zone. *R. Komm, R. Howe, B. R. Durney, & F. Hill.* 586, 650 (2003)

SUN: INTERIOR

Changes in Solar Dynamics from 1995 to 2002. *Sarbani Basu & H. M. Antia.* 585, 553 (2003)

Hot Spots for Solar Flares Persisting for Decades: Longitude Distributions of Flares of Cycles 19–23. *T. Bai.* 585, 1114 (2003)

Temporal Variation of Angular Momentum in the Solar Convection Zone. *R. Komm, R. Howe, B. R. Durney, & F. Hill.* 586, 650 (2003)

Numerical Modeling of the Solar Tachocline. II. Forced Turbulence with Imposed Shear. *Mark S. Miesch.* 586, 663 (2003)

SUN: MAGNETIC FIELDS

Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

Nonaxisymmetric Instabilities of a Toroidal Magnetic Field in a Rotating Sphere. *Keke Zhang, Xinhao Liao, & Gerald Schubert.* 585, 1124 (2003)

Kink and Longitudinal Oscillations in the Magnetic Network on the Sun: Nonlinear Effects and Mode Transformation. *S. S. Hasan, W. Kalkofen, A. A. van Ballegooijen, & P. Ulmschneider.* 585, 1138 (2003)

The Long-Term Evolution of AR 7978: The Scalings of the Coronal Plasma Parameters with the Mean Photospheric Magnetic Field. *L. van Driel-Gesztelyi, P. Démoulin, C. H. Mandrini, L. Harra, & J. A. Klimchuk.* 586, 579 (2003)

The Long-Term Evolution of AR 7978: Testing Coronal Heating Models. *P. Démoulin, L. van Driel-Gesztelyi, C. H. Mandrini, J. A. Klimchuk, & L. Harra.* 586, 592 (2003)

Injection of Magnetic Energy and Magnetic Helicity into the Solar Atmosphere by an Emerging Magnetic Flux Tube. *T. Magara & D. W. Longcope.* 586, 630 (2003)

Fast Dynamo Action for a Family of Parametrized Flows. *S. E. M. Tanner & D. W. Hughes.* 586, 685 (2003)

WIND Observations of Anomalous Cosmic Rays from Solar Minimum to Maximum. *D. V. Reames & F. B. McDonald.* 586, L99 (2003)

Photospheric Sources and Brightening of the Internetwork Chromosphere. *A. C. Cadavid, J. K. Lawrence, T. E. Berger, & A. Ruzmaikin.* 586, 1409 (2003)

Transition Region and Coronal Explorer and Soft X-Ray Telescope Active Region Loop Observations: Comparisons with Static Solutions of the Hydrodynamic Equations. *Amy R. Winebarger, Harry P. Warren, & John T. Mariska.* 587, 439 (2003)

Petschek-like Reconnection with Current-driven Anomalous Resistivity and Its Application to Solar Flares. *Dmitri A. Uzdensky.* 587, 450 (2003)

Motions of Isolated *G*-Band Bright Points in the Solar Photosphere. *P. Nisenson, A. A. van Ballegooijen, A. G. de Wijn, & P. Suetterlin.* 587, 458 (2003)

Observational Evidence for Mode Coupling in the Chromospheric Network. *R. T. James McAteer, Peter T. Gallagher, David R. Williams, Mihalis Mathioudakis, D. Shaun Bloomfield, Kenneth J. H. Phillips, & Francis P. Keenan.* 587, 806 (2003)

The Solar Wind and Its Magnetic Sources at Sunspot Maximum. *Y.-M. Wang & N. R. Sheeley, Jr.* 587, 818 (2003)

SUN: OSCILLATIONS

Changes in Solar Dynamics from 1995 to 2002. *Sarbani Basu & H. M. Antia.* 585, 553 (2003)

Kink and Longitudinal Oscillations in the Magnetic Network on the Sun: Nonlinear Effects and Mode Transformation. *S. S. Hasan, W. Kalkofen, A. A. van Ballegooijen, & P. Ulmschneider.* 585, 1138 (2003)

Temporal Variation of Angular Momentum in the Solar Convection Zone. *R. Komm, R. Howe, B. R. Durney, & F. Hill.* 586, 650 (2003)

Numerical Modeling of the Solar Tachocline. II. Forced Turbulence with Imposed Shear. *Mark S. Miesch.* 586, 663 (2003)

Photospheric Sources and Brightening of the Internetwork Chromosphere. *A. C. Cadavid, J. K. Lawrence, T. E. Berger, & A. Ruzmaikin.* 586, 1409 (2003)

Observational Evidence for Mode Coupling in the Chromospheric Network. *R. T. James McAteer, Peter T. Gallagher, David R. Williams, Mihalis Mathioudakis, D. Shaun Bloomfield, Kenneth J. H. Phillips, & Francis P. Keenan.* 587, 806 (2003)

SUN: PARTICLE EMISSION

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

Cause of Proton Depletion in Solar Impulsive Particle Events. *K. Ohki.* 586, 617 (2003)

Low Coronal Signatures of Large Solar Energetic Particle Events. *Nariaki V. Nitta, Edward W. Cliver, & Allan J. Tylka.* 586, L103 (2003)

The Origin of High-Energy ^{3}He-rich Solar Particle Events. *L. Kocharov & J. Torsti.* 586, 1430 (2003)

SUN: PHOTOSPHERE

Polarization of Photospheric Lines from Turbulent Dynamo Simulations. *J. Sánchez Almeida, T. Emonet, & F. Cattaneo.* 585, 536 (2003)

Photospheric Sources and Brightening of the Internetwork Chromosphere. *A. C. Cadavid, J. K. Lawrence, T. E. Berger, & A. Ruzmaikin.* 586, 1409 (2003)

Observational Evidence for Mode Coupling in the Chromospheric Network. *R. T. James McAteer, Peter T. Gallagher, David R. Williams, Mihalis Mathioudakis, D. Shaun Bloomfield, Kenneth J. H. Phillips, & Francis P. Keenan.* 587, 806 (2003)

SUN: PROMINENCES

Prominence Eruptions and Coronal Mass Ejection: A Statistical Study using Microwave Observations. *N Gopalswamy, M. Shimojo, W. Lu, S. Yashiro, K. Shibasaki, & R. A. Howard.* 586, 562 (2003)

SUN: RADIO RADIATION

Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)

Prominence Eruptions and Coronal Mass Ejection: A Statistical Study using Microwave Observations. *N Gopalswamy, M. Shimojo, W. Lu, S. Yashiro, K. Shibasaki, & R. A. Howard.* 586, 562 (2003)

The Effects of Low- and High-Energy Cutoffs on Solar Flare Microwave and Hard X-Ray Spectra. *Gordon D. Holman.* 586, 606 (2003)

SUN: ROTATION

Changes in Solar Dynamics from 1995 to 2002. *Sarbani Basu & H. M. Antia.* 585, 553 (2003)

Hot Spots for Solar Flares Persisting for Decades: Longitude Distributions of Flares of Cycles 19–23. *T. Bai.* 585, 1114 (2003)

Temporal Variation of Angular Momentum in the Solar Convection Zone. *R. Komm, R. Howe, B. R. Durney, & F. Hill.* 586, 650 (2003)

Numerical Modeling of the Solar Tachocline. II. Forced Turbulence with Imposed Shear. *Mark S. Miesch.* 586, 663 (2003)

SUN: SOLAR-TERRESTRIAL RELATIONS

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

SUN: SOLAR WIND

Elemental Abundances for the 1996 Streamer Belt. *M. Uzzo, Y.-K. Ko, J. C. Raymond, P. Wurz, & F. M. Ipavich.* 585, 1062 (2003)

Electron Properties and Coulomb Collisions in the Solar Wind at 1 AU: *WIND* Observations. *C. Salem, D. Hubert, C. Lacombe, S. D. Bale, A. Mangeney, D. E. Larson, & R. P. Lin.* 585, 1147 (2003)

Large-Scale Magnetic Field Fluctuations and Development of the 1999–2000 Global Merged Interaction Region: 1–60 AU. *L. F. Burlaga, C. Wang, J. D. Richardson, & N. F. Ness.* 585, 1158 (2003)

WIND Observations of Anomalous Cosmic Rays from Solar Minimum to Maximum. *D. V. Reames & F. B. McDonald.* 586, L99 (2003)

The Solar Wind and Its Magnetic Sources at Sunspot Maximum. *Y.-M. Wang & N. R. Sheeley, Jr.* 587, 818 (2003)

SUN: SUNSPOTS

Method for Spot Detection on Solar-like Stars. *Adriana V. R. Silva.* 585, L147 (2003)

SUN: TRANSITION REGION

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

Imaging and Spectroscopic Investigations of a Solar Coronal Wave: Properties of the Wave Front and Associated Erupting Material. *Louise K. Harra & Alphonse C. Sterling.* 587, 429 (2003)

SUN: UV RADIATION

Hα, Extreme-Ultraviolet, and Microwave Observations of the 2000 March 22 Solar Flare and Spontaneous Magnetic Reconnection. *Jeongwoo Lee, Peter T. Gallagher, Dale E. Gary, Gelu M. Nita, G. S. Choe, Su-Chan Bong, & Hong Sik Yun.* 585, 524 (2003)

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

Chromospheric Evaporation and Warm Rain during a Solar Flare Observed in High Time Resolution with the Coronal Diagnostic Spectrometer aboard the *Solar and Heliospheric Observatory*. *Jeffrey W. Brosius.* 586, 1417 (2003)

Imaging and Spectroscopic Investigations of a Solar Coronal Wave: Properties of the Wave Front and Associated Erupting Material. *Louise K. Harra & Alphonse C. Sterling.* 587, 429 (2003)

SUN: X-RAYS, GAMMA RAYS

The Solar Chromosphere/Corona Interface. I. Far-Ultraviolet to Extreme-Ultraviolet Observations and Modeling of Unresolved Coronal Funnels. *Dennis S. Martínez-Galarce, Arthur B. C. Walker II, Troy W. Barbee II, & Richard B. Hoover.* 585, 1095 (2003)

The Long-Term Evolution of AR 7978: The Scalings of the Coronal Plasma Parameters with the Mean Photospheric Magnetic Field. *L. van Driel-Gesztelyi, P. Démoulin, C. H. Mandrini, L. Harra, & J. A. Klimchuk.* 586, 579 (2003)

The Long-Term Evolution of AR 7978: Testing Coronal Heating Models. *P. Démoulin, L. van Driel-Gesztelyi, C. H. Mandrini, J. A. Klimchuk, & L. Harra.* 586, 592 (2003)

The Effects of Low- and High-Energy Cutoffs on Solar Flare Microwave and Hard X-Ray Spectra. *Gordon D. Holman.* 586, 606 (2003)

SURVEYS

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivezić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

The Las Campanas Infrared Survey. IV. The Photometric Redshift Survey and the Rest-Frame *R*-Band Galaxy Luminosity Function at $0.5 \leq z \leq 1.5$.

Hsiao-Wen Chen, Ronald O. Marzke, Patrick J. McCarthy, P. Martini, R. G. Carlberg, S. E. Persson, A. Bunker, C. R. Bridge, & R. G. Abraham. 586, 745 (2003)

Cool Companions to White Dwarfs from the Two Micron All-Sky Survey Second Incremental Data Release. *Stefanie Wachter, D. W. Hoard, Kathryn H. Hansen, Rebecca E. Wilcox, Hilda M. Taylor, & Steven L. Finkelstein.* 586, 1356 (2003)

TECHNIQUES: HIGH ANGULAR RESOLUTION

ι Cassiopeiae: Orbit, Masses, and Photometry from Adaptive Optics Imaging in the *I* and *H* Bands. *Jack Drummond, Scott Milster, Patrick Ryan, & Lewis C. Roberts, Jr.* 585, 1007 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

Motions of Isolated *G*-Band Bright Points in the Solar Photosphere. *P. Nisenson, A. A. van Ballegooijen, A. G. de Wijn, & P. Suetterlin.* 587, 458 (2003)

TECHNIQUES: IMAGE PROCESSING

Ground-based Near-Infrared Imaging of the HD 141569 Circumstellar Disk. *A. Boccaletti, J.-C. Augereau, F. Marchis, & J. Hahn.* 585, 494 (2003)

SPINR—a Wide-Field Ultraviolet Spectral Imaging System. *T. A. Cook, V. J. Gsell, J. Golub, & S. Chakrabarti.* 585, 1177 (2003)

TECHNIQUES: INTERFEROMETRIC

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

Very Long Baseline Interferometry Imaging of the RS Canum Venaticorum Binary Star System HR 5110. *R. R. Ransom, N. Bartel, M. F. Bietenholz, M. I. Ratner, D. E. Lebach, I. I. Shapiro, & J. F. Lestrade.* 587, 390 (2003)

TECHNIQUES: PHOTOMETRIC

A Unique Solution of Planet and Star Parameters from an Extrasolar Planet Transit Light Curve. *S. Seager & G. Mallén-Ornelas.* 585, 1038 (2003)

Selection of Metal-poor Giant Stars Using the Sloan Digital Sky Survey Photometric System. *Amina Helmi, Željko Ivesić, Francisco Prada, Laura Pentericci, Constance M. Rockosi, Donald P. Schneider, Eva K. Grebel, Daniel Harbeck, Robert H. Lupton, James E. Gunn, Gillian R. Knapp, Michael A. Strauss, & Jonathan Brinkmann.* 586, 195 (2003)

TECHNIQUES: SPECTROSCOPIC

Spectroscopic Studies of the Solar Corona. IV. Physical Properties of Coronal Structure. *Jagdev Singh, Kiyoshi Ichimoto, Takashi Sakurai, & S. Muneer.* 585, 516 (2003)

X-Ray Spectroscopy of η Carinae with *XMM-Newton*. *Maurice A. Leutenegger, Steven M. Kahn, & Gavin Ramsay.* 585, 1015 (2003)

A Concise New Look at the *l*-Type Spectrum of $H^{12}C^{14}N$. *S. Thorwirth, H. S. P. Müller, F. Lewen, S. Brünken, V. Ahrens, & G. Winnewisser.* 585, L163 (2003)

The First Measurement of Spectral Lines in a Short-Period Star Bound to the Galaxy's Central Black Hole: A Paradox of Youth. *A. M. Ghez, G. Duchêne, K. Matthews, S. D. Hornstein, A. Tanner, J. Larkin, M. Morris, E. E. Becklin, S. Salim, T. Kremenek, D. Thompson, B. T. Soifer, G. Neugebauer, & I. McLean.* 586, L127 (2003)

Experimental Transition Rate of the Green Coronal Line of Fe XIV. *P. Beiersdorfer, E. Trabert, & E. H. Pinnington.* 587, 836 (2003)

TELESCOPES

The Optical Design and Characterization of the *Microwave Anisotropy Probe*. *L. Page, C. Jackson, C. Barnes, C. Bennett, M. Halpern, G. Hinshaw, N. Jarosik, A. Kogut, M. Limon, S. S. Meyer, D. N. Spergel, G. S. Tucker, D. T. Wilkinson, E. Wollack, & E. L. Wright.* 585, 566 (2003)

TIME

The Phase Coherence of Light from Extragalactic Sources: Direct Evidence against First-Order Planck-Scale Fluctuations in Time and Space. *Richard Lieu & Lloyd W. Hillman.* 585, L77 (2003)

The Lack of Observational Evidence for the Quantum Structure of Spacetime at Planck Scales. *Roberto Ragazzoni, Massimo Turatto, & Wolfgang Gaessler.* 587, L1 (2003)

TURBULENCE

Toward an Ab Initio Theory of the Solar Modulation of Cosmic Rays. *S. Parhi, J. W. Bieber, W. H. Matthaeus, & R. A. Burger.* 585, 502 (2003)

The Formation of Massive Stars from Turbulent Cores. *Christopher F. McKee & Jonathan C. Tan.* 585, 850 (2003)

A Holistic Scenario of Turbulent Molecular Cloud Evolution and Control of the Star Formation Efficiency: First Tests. *E. Vázquez-Semadeni, J. Ballesteros-Paredes, & R. S. Klessen.* 585, L131 (2003)

Numerical Modeling of the Solar Tachocline. II. Forced Turbulence with Imposed Shear. *Mark S. Miesch.* 586, 663 (2003)

A Local One-Zone Model of Magnetohydrodynamic Turbulence in Dwarf Nova Disks. *Takayoshi Sano & James M. Stone.* 586, 1297 (2003)

Cosmic-Ray History and Its Implications for Galactic Magnetic Fields. *Ellen G. Zweibel.* 587, 625 (2003)

"Weather" Variability of Close-in Extrasolar Giant Planets. *Kristen Menou, James Y-K. Cho, Sara Seager, & Bradley M. S. Hansen.* 587, L113 (2003)

The Changing Face of the Extrasolar Giant Planet HD 209458b. *Kristen Menou, James Y-K. Cho, Bradley M. S. Hansen, & Sara Seager.* 587, L117 (2003)

Scintillation Caustics in Planetary Occultation Light Curves. *Asantha R. Cooray & J. L. Elliot.* 587, L121 (2003)

ULTRAVIOLET: GALAXIES

The Baldwin Effect and Black Hole Accretion: A Spectral Principal Component Analysis of a Complete Quasar Sample. *Zhaohui Shang, Beverley J. Wills, Edward L. Robinson, D. Wills, Ari Laor, Bingrong Xie, & Juntao Yuan.* 586, 52 (2003)

Estimating Star Formation Rates from Infrared and Radio Luminosities: The Origin of the Radio-Infrared Correlation. *Eric F. Bell.* 586, 794 (2003)

Ultraviolet-Optical Pixel Maps of Face-on Spiral Galaxies: Clues for Dynamics and Star Formation Histories. *Paul B. Eskridge, Jay A. Frogel, Violet A. Taylor, Rogier A. Windhorst, Stephen C. Odewahn, Claudia A. T. C. Chiarenza, Christopher J. Conselice, Richard de Grijs, Lynn D. Matthews, Robert W. O'Connell, & John S. Gallagher III.* 586, 923 (2003)

ULTRAVIOLET: ISM

SPINR—a Wide-Field Ultraviolet Spectral Imaging System. *T. A. Cook, V. J. Gsell, J. Golub, & S. Chakrabarti.* 585, 1177 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Molecular Hydrogen in Intermediate-Velocity Clouds in the Milky Way Halo. *Philipp Richter, Bart P. Wakker, Blair D. Savage, & Kenneth R. Sembach.* 586, 230 (2003)

Ionized Gas in the First 10 Kiloparsecs of the Interstellar Galactic Halo. *J. Christopher Howk, Kenneth R. Sembach, & Blair D. Savage.* 586, 249 (2003)

Highly Ionized Gas in the Galactic Halo: A *FUSE* Survey of O VI Absorption toward 22 Halo Stars. *J. Zsargó, K. R. Sembach, J. C. Howk, & B. D. Savage.* 586, 1019 (2003)

Deuterium toward Two Milky Way Disk Stars: Probing Extended Sight Lines with the *Far Ultraviolet Spectroscopic Explorer*. *Charles G. Hoopes, Kenneth R. Sembach, Guillaume Hébrard, H. Warren Moos, & David C. Knauth.* 586, 1094 (2003)

Far-Ultraviolet and Hα Spectroscopy of SNR 0057−7226 in the Small Magellanic Cloud H II Region N66. *Charles W. Danforth, Ravi Sankrit, William P. Blair, J. Christopher Howk, & You-Hua Chu.* 586, 1179 (2003)

Interstellar Deuterium, Nitrogen, and Oxygen Abundances toward GD 246, WD 2331−475, HZ 21, and Lanning 23: Results from the *FUSE* Mission. *Cristina M. Oliveira, Guillaume Hébrard, J. Christopher Howk, Jeffrey W. Kruk, Pierre Chayer, & H. Warren Moos.* 587, 235 (2003)

ULTRAVIOLET: SOLAR SYSTEM

An S_2 Fluorescence Model for Interpreting High-Resolution Cometary Spectra. I. Model Description and Initial Results. *Celine Reyle & D. C. Boice.* 587, 464 (2003)

ULTRAVIOLET: STARS

A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

SPINR—a Wide-Field Ultraviolet Spectral Imaging System. *T. A. Cook, V. J. Gsell, J. Golub, & S. Chakrabarti.* 585, 1177 (2003)

Spectroscopic Identification of White Dwarfs in the New Luyten Two-Tenths Survey. *Stéphane Vennes & Adela Kawka.* 586, L95 (2003)

Spectroscopic Identification of White Dwarfs in the New Luyten Two-Tenths Survey. *Stéphane Vennes & Adela Kawka.* 586, L95 (2003)

Constraints on the Ionization Balance of Hot-Star Winds from *FUSE* Observations of O Stars in the Large Magellanic Cloud. *D. Massa, A. W. Fullerton, G. Sonneborn, & J. B. Hutchings.* 586, 996 (2003)

WAVES

Scintillation Caustics in Planetary Occultation Light Curves. *Asantha R. Cooray & J. L. Elliot.* 587, L121 (2003)

X-RAYS: BINARIES

Chandra Studies of the X-Ray Point Source Luminosity Functions of M31. *Albert K. H. Kong, Rosanne DiStefano, Michael R. Garcia, & Jochen Greiner.* 585, 298 (2003)

Diffusive Nuclear Burning in Neutron Star Envelopes. *Philip Chang & Lars Bildsten.* 585, 464 (2003)

X-Ray Source Population in the Elliptical Galaxy NGC 720 with *Chandra*. *Tesla E. Jeltema, Claude R. Canizares, David A. Buote, & Gordon P. Garmire.* 585, 756 (2003)

Two-dimensional Monte Carlo/Fokker-Planck Simulations of Flares in Accretion Disk Corona Models. *M. Böttcher, D. R. Jackson, & E. P. Liang.* 586, 389 (2003)

Two Types of X-Ray Spectra in Cataclysmic Variables. *Koji Mukai, A. Kinkhabwala, J. R. Peterson, S. M. Kahn, & F. Paerels.* 586, L77 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

High-Frequency Quasi-Periodic Oscillations in the Black Holes X-Ray Transient XTE J1650−500. *Jeroen Homan, Marc Klein-Wolt, Sabrina Rossi, Jon M. Miller, Rudy Wijnands, Tomaso Belloni, Michiel van der Klis, & Walter H. G. Lewin.* 586, 1262 (2003)

Jet-induced Nucleosynthesis in Misaligned Microquasars. *Yousaf M. Butt, Thomas J. Maccarone, & Nikos Prantzos.* 587, 748 (2003)

Doppler Modulation of X-Ray Lines in Cygnus X-3. *Michael Stark & Malinda Saia.* 587, L101 (2003)

X-RAYS: BURSTS

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

The Evolution of LMC X-4 Flares: Evidence for Super Eddington Radiation Oosing through Inhomogeneous Polar Cap Accretion Flows? *Dae-Sik Moon, Stephen S. Eikenberry, & Ira M. Wasserman.* 586, 1280 (2003)

X-Ray Spectroscopy of the Accreting Millisecond Pulsar XTE J0929−314 in Outburst. *Adrienne M. Juett, Duncan K. Galloway, & Deepto Chakrabarty.* 587, 754 (2003)

An Extended Burst Tail from SGR 1900+14 with a Thermal X-Ray Spectrum. *Geoffrey T. Lenters, Peter M. Woods, Johnathan E. Goupell, Chryssa Kouveliotou, Ersin Goegus, Kevin Hurley, Dmitry Frederiks, Sergey Golenetskii, & Jean Swank.* 587, 761 (2003)

X-RAYS: DIFFUSE BACKGROUND

Imaging Large-Scale Structure in the X-Ray Sky. *Yuxuan Yang, R. F. Mushotzky, A. J. Barger, L. L. Cowie, D. B. Sanders, & A. T. Steffen.* 585, L85 (2003)

A *Chandra* Minisurvey of X-Ray–weak Quasars. *G. Risaliti, M. Elvis, R. Gilli, & M. Salvati.* 587, L9 (2003)

X-RAYS: GALAXIES

The Infrared Counterparts of the Optically Unidentified Chandra Deep Field–South 1 Ms Sources. *Haojing Yan, Rogier A. Windhorst, Huub J. A. Röttgering, Seth H. Cohen, Stephen C. Odewahn, Scott C. Chapman, & William C. Keel.* 585, 67 (2003)

Modeling Intracluster Gas in Triaxial Dark Halos: An Analytic Approach. *Jounghun Lee & Yasushi Suto.* 585, 151 (2003)

Chandra Studies of the X-Ray Point Source Luminosity Functions of M31. *Albert K. H. Kong, Rosanne DiStefano, Michael R. Garcia, & Jochen Greiner.* 585, 298 (2003)

No X-Ray–bright Type II Quasars among the Lyα Emitters. *S. Malhotra, J. X. Wang, J. E. Rhoads, T. M. Heckman, & C. A. Norman.* 585, L25 (2003)

An *Extreme Ultraviolet Explorer* Atlas of Seyfert Galaxy Light Curves: Search for Periodicity. *J. P. Halpern, K. M. Leighly, & H. L. Marshall.* 585, 665 (2003)

The Nuclear Accretion in the FR I Radio Galaxy IC 4296 from *Chandra* and Very Long Baseline Array Observations. *S. Pellegrini, T. Venturi, A. Comastri, G. Fabbiano, F. Fiore, C. Vignali, R. Morganti, & G. Trinchieri.* 585, 677 (2003)

X-Ray Source Population in the Elliptical Galaxy NGC 720 with *Chandra*. *Tesla E. Jeltema, Claude R. Canizares, David A. Buote, & Gordon P. Garmire.* 585, 756 (2003)

Radio/X-Ray Offsets of Large-Scale Jets Caused by Synchrotron Time Lags. *J. M. Bai & Myung Gyoon Lee.* 585, L113 (2003)

Neutral Beams from Blazar Jets. *Armen M. Atoyan & Charles D. Dermer.* 586, 79 (2003)

Using Multiwavelength Observations to Determine the Black Hole Mass and Accretion Rate in the Type 1 Seyfert Galaxy NGC 5548. *James Chiang & Omer Blaes.* 586, 97 (2003)

Detection of X-Ray Emission from the Eastern Radio Lobe of Pictor A. *Paola Grandi, Matteo Guainazzi, Laura Maraschi, Raffaella Morganti, Roberto Fusco-Femiano, Mariateresa Fiocchi, Lucia Ballo, & Fabrizio Tavecchio.* 586, 123 (2003)

The *XMM-Newton* View of the Nucleus of NGC 4261. *R. M. Sambruna, M. Gliozzi, M. Eracleous, W. N. Brandt, & R. Mushotzky.* 586, L37 (2003)

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

The Low Mass X-Ray Binary–Globular Cluster Connection. II. NGC 4472 X-Ray Source Properties and Source Catalogs. *Thomas J. Maccarone, Arunav Kundu, & Stephen E. Zepf.* 586, 814 (2003)

Chandra X-Ray Observations of NGC 1316 (Fornax A). *Dong-Woo Kim & G. Fabbiano.* 586, 826 (2003)

X-Ray Spectral Properties of Low-Mass X-Ray Binaries in Nearby Galaxies. *Jimmy A. Irwin, Alex E. Athey, & Joel N. Bregman.* 587, 356 (2003)

Cold Fronts in Cold Dark Matter Clusters. *Daisuke Nagai & Andrey V. Kravtsov.* 587, 514 (2003)

Spectra from a Magnetic Reconnection–heated Corona in Active Galactic Nuclei. *B. F. Liu, S. Mineshige, & K. Ohsuga.* 587, 571 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

X-RAYS: GALAXIES: CLUSTERS

Chandra Observations of the Cooling Flow Cluster Abell 2052. *Elizabeth L. Blanton, Craig L. Sarazin, & Brian R. McNamara.* 585, 227 (2003)

Importance of Cluster Structural Evolution in Using X-Ray and Sunyaev-Zeldovich Effect Galaxy Cluster Surveys to Study Dark Energy. *Subhabrata Majumdar & Joseph J. Mohr.* 585, 603 (2003)

Properties of the Brightest Cluster Galaxy and Its Host Cluster. *Haruyoshi Katayama, Kiyoshi Hayashida, Fumio Takahara, & Yutaka Fujita.* 585, 687 (2003)

A Massive Warm Baryonic Halo in the Coma Cluster. *Massimiliano Bonamente, Marshall K. Joy, & Richard Lieu.* 585, 722 (2003)

Chandra Observations of A2029: The Dark Matter Profile Down to below $0.01r_{\rm vir}$ in an Unusually Relaxed Cluster. *Aaron D. Lewis, David A. Buote, & John T. Stocke.* 586, 135 (2003)

Chandra Temperature Map of A754 and Constraints on Thermal Conduction. *M. Markevitch, P. Mazzotta, A. Vikhlinin, D. Burke, Y. Butt, L. David, H. Donnelly, W. R. Forman, D. Harris, D.-W. Kim, S. Virani, & J. Vrtilek.* 586, L19 (2003)

Effect of Internal Flows on Sunyaev-Zeldovich Measurements of Cluster Peculiar Velocities. *Daisuke Nagai, Andrey V. Kravtsov, & Arthur Kosowsky.* 587, 524 (2003)

Feedback Heating in Cluster and Galactic Cooling Flows. *Fabrizio Brighenti & William G. Mathews.* 587, 580 (2003)

Chandra X-Ray Analysis of the Massive High-Redshift Galaxy Clusters Cl J1113.1−2615 and Cl J0152.7−1357. *B. J. Maughan, L. R. Jones, H. Ebeling, E. Perlman, P. Rosati, C. Frye, & C. R. Mullis.* 587, 589 (2003)

Chandra Observations of the Galaxy Cluster A478: The Interaction of Hot Gas and Radio Plasma in the Core, and an Improved Determination of the Compton y-Parameter. *M. Sun, C. Jones, S. S. Murray, S. W. Allen, A. C. Fabian, & A. C. Edge.* 587, 619 (2003)

On the Relationship between Cooling Flows and Bubbles. *Ian G. McCarthy, Arif Babul, Neal Katz, & Michael L. Balogh.* 587, L75 (2003)

X-RAYS: GENERAL

Charge Abundances of the Solar Wind Ions Inferred from Cometary X-Ray Spectra. *V. Kharchenko, Matt Rigazio, A. Dalgarno, & V. A. Krasnopolsky.* 585, L73 (2003)

On the X-Ray Lines in the Afterglows of Gamma-Ray Bursts. *Shlomo Dado, Arnon Dar, & A. De Rújula.* 585, 890 (2003)

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

High-Resolution Grating Spectroscopy of GRB 020405 with the *Chandra* Low Energy Transmission Grating Spectrometer. *N. Mirabal, F. Paerels, & J. P. Halpern.* 587, 128 (2003)

Chandra Observations of the Luminous, Oxygen-rich Supernova Remnants in the Irregular Galaxy NGC 4449. *Daniel J. Patnaude & Robert A. Fesen.* 587, 221 (2003)

A Stringent Limit on the Accretion Luminosity of the Possible Central Black Hole in the Globular Cluster M15. *Luis C. Ho, Yuichi Terashima, & Takashi Okajima.* 587, L35 (2003)

X-RAYS: INDIVIDUAL

Name: Coma Cluster

A Massive Warm Baryonic Halo in the Coma Cluster. *Massimiliano Bonamente, Marshall K. Joy, & Richard Lieu.* 585, 722 (2003)

NGC Number: NGC 346

An X-Ray Investigation of the NGC 346 Field in the Small Magellanic Cloud. II. The Field Population. *Y. Nazé, J. M. Hartwell, I. R. Stevens, J. Manfroid, S. Marchenko, M. F. Corcoran, A. F. J. Moffat, & G. Skalkowski.* 586, 983 (2003)

NGC Number: NGC 507

ROSAT HRI Investigation of the NGC 507 X-Ray Halo. *M. Paolillo, G. Fabbiano, G. Peres, & D.-W. Kim.* 586, 850 (2003)

Alphanumeric: SGR 0526−66

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

X-RAYS: ISM

OH (1720 MHz) Masers and Mixed-Morphology Supernova Remnants. *F. Yusef-Zadeh, M. Wardle, J. Rho, & M. Sakano.* 585, 319 (2003)

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

Chandra CCD Imagery of the Northeast and Northwest Limbs of SN 1006. *Knox S. Long, Stephen P. Reynolds, John C. Raymond, P. Frank Winkler, Kristy K. Dyer, & Robert Petre.* 586, 1162 (2003)

X-RAYS: STARS

X-Ray Spectroscopic Evidence for Intermediate-Mass Black Holes: Cool Accretion Disks in Two Ultraluminous X-Ray Sources. *J. M. Miller, G. Fabbiano, M. C. Miller, & A. C. Fabian.* 585, L37 (2003)

ROSAT X-Ray Spectral Properties of Nearby Young Associations: TW Hydrae, Tucana-Horologium, and the β Pictoris Moving Group. *Joel H. Kastner, Lara Crigger, Margaret Rich, & David A. Weintraub.* 585, 878 (2003)

The Quiescent Counterpart of the Soft Gamma-Ray Repeater SGR 0526−66. *S. R. Kulkarni, D. L. Kaplan, H. L. Marshall, D. A. Frail, T. Murakami, & D. Yonetoku.* 585, 948 (2003)

A *Far Ultraviolet Spectroscopic Explorer* Survey of Coronal Forbidden Lines in Late-Type Stars. *Seth Redfield, Thomas R. Ayres, Jeffrey L. Linsky, Thomas B. Ake, A. K. Dupree, Richard D. Robinson, & Peter R. Young.* 585, 993 (2003)

X-Ray Spectroscopy of η Carinae with *XMM-Newton*. *Maurice A. Leutenegger, Steven M. Kahn, & Gavin Ramsay.* 585, 1015 (2003)

X-Ray Emission from Multiphase Shock in the Large Magellanic Cloud Supernova Remnant N49. *Sangwook Park, David N. Burrows, Gordon P. Garmire, John A. Nousek, John P. Hughes, & Rosa Murphy Williams.* 586, 210 (2003)

X-Ray Temporal Properties of XTE J1650−500 during Outburst Decay. *E. Kalemci, J. A. Tomsick, R. E. Rothschild, K. Pottschmidt, S. Corbel, R. Wijnands, J. M. Miller, & P. Kaaret.* 586, 419 (2003)

High-Resolution *Chandra* Spectroscopy of τ Scorpii: A Narrow-Line X-Ray Spectrum from a Hot Star. *David H. Cohen, Geneviève E. de Messières, Joseph J. MacFarlane, Nathan A. Miller, Joseph P. Cassinelli, Stanley P. Owocki, & Duane A. Liedahl.* 586, 495 (2003)

Discovery of X-Ray Quasi-periodic Oscillations from an Ultraluminous X-Ray Source in M82: Evidence against Beaming. *Tod E. Strohmayer & Richard F. Mushotzky.* 586, L61 (2003)

Evidence of a Cyclotron Feature in the Spectrum of the Anomalous X-Ray Pulsar 1RXS J170849−400910. *Nanda Rea, Gian Luca Israel, Luigi Stella, Tim Oosterbroek, Sandro Mereghetti, Lorella Angelini, Sergio Campana, & Stefano Covino.* 586, L65 (2003)

An *XMM-Newton* Observation of 4U 1755−33 in Quiescence: Evidence for a Fossil X-Ray Jet. *Lorella Angelini & Nicholas E. White.* 586, L71 (2003)

Fast X-Ray Transients and Their Connection to Gamma-Ray Bursts. *Vadim A. Arefiev, William C. Priedhorsky, & Konstantin N. Borozdin.* 586, 1238 (2003)

High-Frequency Quasi-Periodic Oscillations in the Black Holes X-Ray Transient XTE J1650−500. *Jeroen Homan, Marc Klein-Wolt, Sabrina Rossi, Jon M. Miller, Rudy Wijnands, Tomaso Belloni, Michiel van der Klis, & Walter H. G. Lewin.* 586, 1262 (2003)

The Evolution of LMC X-4 Flares: Evidence for Super Eddington Radiation Oosing through Inhomogeneous Polar Cap Accretion Flows? *Dae-Sik Moon, Stephen S. Eikenberry, & Ira M. Wasserman.* 586, 1280 (2003)

X-Ray Spectral Properties of Low-Mass X-Ray Binaries in Nearby Galaxies. *Jimmy A. Irwin, Alex E. Athey, & Joel N. Bregman.* 587, 356 (2003)

Chandra Observations of the Anomalous X-Ray Pulsar 4U 0142+61. *Sandeep K. Patel, Chryssa Kouveliotou, Peter M. Woods, Allyn F. Tennant, Martin C. Weisskopf, Mark H. Finger, Colleen Wilson-Hodge, Ersin Gogus, Michiel van der Klis, & Tomaso Belloni.* 587, 367 (2003)

Coronal X-Ray Emission from an Intermediate-Age Brown Dwarf. *Yohko Tsuboi, Yoshitomo Maeda, Eric D. Feigelson, Gordon P. Garmire, George Chartas, Koji Mori, & Steven H. Pravdo.* 587, L51 (2003)

X-Ray Spectroscopy of the Accreting Millisecond Pulsar XTE J0929−314 in Outburst. *Adrienne M. Juett, Duncan K. Galloway, & Deepto Chakrabarty.* 587, 754 (2003)
